A Pest!

The European Corn Borer

Great damage to corn crops in certain sections of Ontario has been caused in recent years by the European Corn Borer. To check this pest, follow closely recommendations of the Department.

Its Life History

The moth appears about the middle of June and lasts until about the last week in July.

Egg Laying

In this period the female lays its eggs on the undersides of the corn leaves, preferably on the most advanced corn.

The Borer

The damage is done by the borer stage. The "worm" develops from the egg, eating into the stalks and ears. It winters in the stubble or stalks.

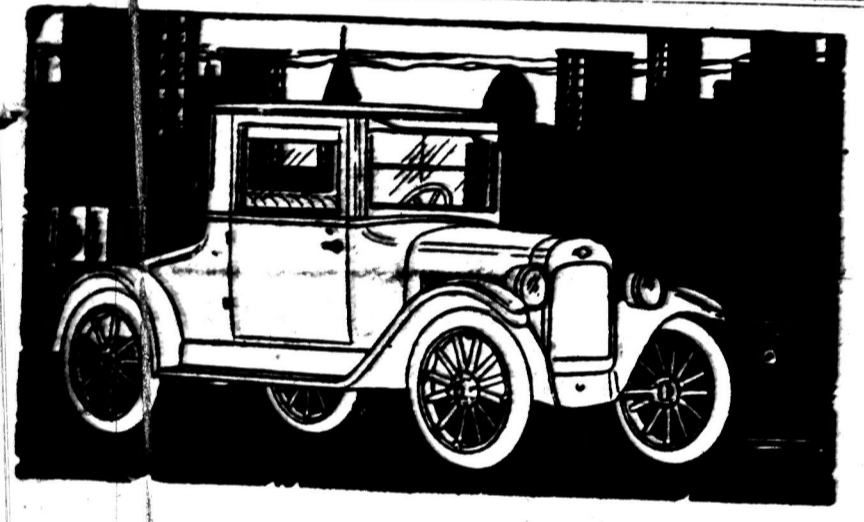

The Pupa

The worm changes to the pupa, which in turn develops into the moth about the second week of June or later.

Dominion Department of Agriculture
 Arthur Gibson—Dominion Entomologist
 Division of Field Crop and Garden Insects, Ottawa, Ont. Field Laboratory, Strathroy, Ont.

NOTE: Address all enquiries to Dominion Entomological Branch, Ottawa. Send all specimens for identification to the Field Laboratory, Strathroy, Ont.

Compare Chevrolet With Any Other Car

Compare Chevrolet with any other car manufactured. Compare it from every possible angle—thoroughly. What do you find?

Price—Chevrolet is the world's lowest-priced, fully-equipped, quality car.

Upkeep—The cost of operation of Chevrolet is lower than that of any other car built.

Performance—Chevrolet is built to do anything and go anywhere possible with any car, and it will go where many others cannot.

Appearance—Chevrolet is beautiful in design and the finish is of the highest grade and extremely durable. Chevrolet closed cars have Fisher bodies—the finest built.

Value—Chevrolet gives you the best transportation per dollar invested that you can buy. Economy in first cost and the lowest operating cost provide a value that stands first in comparison with any other car.
