We Handle Cistern Pumps, Sinks, Gas Fittings, etc.

Your repair needs will receive our prompt attention

OUR WORK IS GUARANTEED

R. A. McCarter Block

JARVIS, ONT.

## EXPECT VITAL DEBATE

Socialists May Force New Alignment of British Parties

LONDON, March 19.—(Special interest attaches to a resolution tabled by Philip Snowden (Labor, Home Office) for this week in the House of Commons declaring that future legislation should be directed towards "gradual suppression of the capitalist system."

The Socialists announce their intention of bringing their whole strength to the support of this resolution.

On the other hand the Unionists, Liberals and the Conservatives, and the Liberal Unionists, are all in agreement in opposing the resolution.

Some prophets declare this week's proceedings will prove momentous in the history of British politics.

It is as if a new era were about to be opened out to the British people, and whatever the motive behind the resolution the effect will be to bring the vital points of difference between the Socialists and the Liberals.

There is a rumor abroad that H. W. Massingham, and Alfred Gardner, the two best known Liberal writers in Great Britain are joining the Labor party.

It appears definite that Massingham and those associated heretofore with the Nation weekly newspaper are departing owing to the change of proprietorship. The possibility of Massingham founding another journal, however, is not overlooked.

FOUND GHASTLY ICICLE.

Man Committed Suicide by Hanging in the Woods.

OTTAWA, March 19.—Hanging with a trolley rope around his neck from a bough of a tall pine tree 40 feet from the ground, the body of a man covered with snow and ice was discovered in a pasture near Aylmer, 12 miles from here, by two boys Saturday afternoon. Eugene Bourgeois and Walter Glandon were hunting rabbits in Lortie's pasture, three-quarters of a mile from Aylmer, when they were startled to see a body covered with ice swaying high above them.

When the body was cut down by the police, and the ice and snow which had preserved it removed, it was found to be that of Edmund Gravelle, aged 46, married, tenant of a house at Connaught Park for fourteen years. The coroner's jury, under Dr. T. B. Davies, returned a verdict of suicide while temporarily insane.

## BRING BACK THE QUAIL

Encourage this Splendid Game Bird on the Farm.

How We Lost Our Quail—Most Birds are Friends of Farmers—Quail Destroy Weed Seeds and Insects—How to Entice Them Back.

(Contributed by Ontario Department of Agriculture, Toronto.)

Why not have lots of quail? When they were plentiful we had a great deal of first-class gunning. By gunning overmuch and not protecting them in the winter, we have almost lost the Bob-White of our boyhood. Now we have the potato bug and gun for it with our partridge. Why not have the quail, plus the sport of gunning, back, and get rid of some of those potato bugs at the same time?

How We Lost the Quail.

In the old days the farm boy shot a few brace of quail. The city sport came out, and a few brace were shot enough for him. Further and further afield he had to go.

The quail, being a natural shelter for the quail, were elevated up and burned. Every foot of ground was cleared for the plough or for pasture.

When the heavy snows came, followed by a hard frost, the quail were not able to stand the cold, and whole flocks were starved or frozen. It was an unequal fight against the cold and nature. Nature alone could be fought, but when man too was to be contended with, the quail gave up the ghost.

Most Birds are the Farmers' Friends.

The question is, do you wish them back? The answer is, you wish them to give it a little thought. You, to-day, are fighting an uphill fight against insects and weeds. Each hour you spend in this way is a distinct loss.

Let us very briefly take up the general question of loss from insects and noxious weeds, and in this connection show what the birds we now have are doing. In the United States 3,000,000. What percentage of this could be saved if the bird population was normal? Our bird population to-day is only one-tenth of what it might be.

To give a concrete example: It is estimated that the State of Massachusetts, with an area of 8,000 square miles, has not less than five million birds, the acre, or a bird population of 25,000,000. From observation and dissection, a conservative estimate of the number of insects consumed by each insectivorous bird is one hundred per day. That means the consumption of the enormous total of 250,000,000 insects. This means the daily consumption of chrysomelids in Massachusetts is 21,000 bushels.

Quail Destroy Weed Seeds and Insects.

One-half of the quail's food consists of weed seeds, one-fourth of grain, mostly taken from the stubble, and about seven per cent. of insects. The insects chiefly consumed are potato beetle, cucumber beetle, chinch bug, wire worms, etc. In winter they destroy the seeds of 125 kinds of noxious weeds. A conservative estimate of amount of food eaten each day would be two ounces. Can you see how your potato bugs would disappear if the Bob-White were plentiful? The United States Department of Agriculture states that each quail on the farm is worth \$20 to the farmer.

Now comes the question of again having these birds plentiful. It cannot be done in a day, nor must you expect it in a year.

There are some quail left. There may be few on your farm. Protect them. They are worth gold dollars to you. Allow no hunting whatever. As you have seen, outside of hunting, the lack of shelter and feed during the winter months, is the chief cause of the disappearance of this valuable bird.

How to Entice the Quail Back.

Place heaps of brush in the fence corners. Plant a Virginia Creeper or Wild Cucumber seed, and instead of a brush heap, it will become a beauty spot. On the brush heap or a stump place several forkfuls of buckwheat straw, unthrashed. This will attract them and make a perfect protection as well as supply food. Tie a small tree or stake, in a protected situation. Leave an opening facing south. Scatter oats, wheat, buckwheat, and corn, around the opening. A few leads running some distance away. Do it now. Get the quail coming to the grain. When a storm comes, they will make for the shelter. Never neglect it, especially in stormy weather and particularly after severe storms. Remember what it is worth to you.

Place the spring, sow some corn, wheat and rye in the fence corners, around your shelters. Let it ripen there. Quail are very fond of it and will remember it when the storms or where. They are most likely to breed near their winter feeding stations.

They May Become as tame as Chickens.

The beautiful little Bob-White! Do you know that if they are protected, they will become almost as tame as chickens. They will wander amongst your potato patch and repay you many times over for the attention you have given them. And if they ever become too plentiful, why, quail on a farm is hard to beat. Think it over. Potato bugs or quail—H. R. York, Honorary Game Officer, M. B. Toronto.

The Pickfords Again.

LOS ANGELES, March 19.—(Revolution of the biggest illegal liquor combinations ever unearthed in the West was forecast by Federal prohibition officers Saturday, when it was announced that the names of Los Angeles, including a number of motion picture actors, both men and women, were included in a list taken from two of the alleged bootleggers, but made public only those of Jack Pickford and Mrs. Alan Forrest, known professionally as Eddie Pickford, screen actors, brother and sister of Mary Pickford, wife of Douglas Fairbanks.

## Here and There

Renfrew, Ont.—Mr. Ritchie, the station agent of the Canadian Pacific Railway, has received instructions from headquarters to rigidly enforce the no trespassing order on the property of this company. This is particularly in reference to people walking down the railway track.

When accidents happen it always entails a trouble to the company and lately there have been complaints that school children have been using the railway as a thoroughfare.

Vancouver.—"I have been in the Alps and the Pyrenees, but I have never seen anything that can compare with Banff," said William Faversham, famous English actor, when speaking at Hotel Vancouver. Mr. Faversham, one of the winners of the international dog races staged at the winter carnival, and said that he had on special invitation visited Banff.

Invermere, B.C.—An appropriation of a depot at the building the Canadian Windermere by Lake Windermere is the depot for the whole of the Lake Windermere being the only station on the Lake den and Port Steele, which has the benefit of an agent since December 1st. A modest little ground, has done duty for all these years but with the proposed opening of the Banff-Windermere road on the thirtieth of June, it is no doubt thought that it is time the old box car took a move.

Ontario.—The Canadian National Parks Branch of the Department of the Interior is commencing the construction of a hydro-electric generating station in Cascade creek in Banff National Park to supply light and power for the town of Banff, Alberta. The dam at the outlet of Lake Minnewanka constructed in will be utilized for power. A steady flow of water for power purposes without further impairing the scenic attractions of the locality. Electric power for Banff is at present obtained from the steam plant of the Bankhead Mines. The work will be undertaken by day labor.

Winnipeg.—Seven thousand cars of grain have been loaded between September 1, 1922, and Feb. 1, 1923, for the western coast by the Canadian Pacific Railway. This represents 10,234,000 bushels of grain for export from Vancouver. The shipments comprised 6,175 cars of wheat, 162 cars, 16 barley and 50 rye. Export from Vancouver for the year ended Jan. 31, 1923, were 900,000 bushels of Canadian Pacific grain in the elevator at Vancouver and 300 cars in transit carrying 735,000 bushels of wheat. The present movement west is averaging 25 cars a day.

Fort William.—The contract for the construction of a building to replace the number five freight shed, was awarded by the Canadian Pacific Railway officials to the C. E. Hall, Aldinger Company, of Winnipeg. It provides for two fire walls which will divide the new structure into three compartments. The new dock along the new shed will be of concrete. It is the present intention to use the end of the shed nearest the Canadian Pacific Railway subway for the handling of local freight instead of the end nearest the city subway dock as was the case with the old shed. It has been decided that the new arrangement will be more satisfactory to company officials and to concerns having business with them.

Discussing the new shed to-day, D. C. Chisholm, division superintendent, said that the new structure would be of frame construction very much like the shed it will replace, aside from the fire walls and the concrete wharf.

Winnipeg.—Under the auspices of the railways, the provincial government and livestock associations of the province, two livestock improvement trains, similar to those which toured the province last year, will be operated in Manitoba during the coming summer. The 1923 trains are to be known as "the Livestock Improvement Trains." They will give attention to the following departments: The benefit of improved quality in cattle; demonstration and sale of purebred sires, both beef and dairy breeds; the production of fodder crops; the growing of cattle and other work in connection with the cattle industry; the breeding, feeding and marketing of bacon hogs; the demonstration of desirable mutation types and docking and castration of lambs; demonstrations and lectures on poultry raising, with the selling of eggs for hatching purposes; home economic lectures and demonstrations for women; and lectures and education motion pictures for girls and boys.

The dates for the trains will be from Monday, April 30, onward for four weeks. This will cover about the same dates as last year which were found very satisfactory.

Yorkton.—Another milestone in the history of railway development in Yorkton and district was marked when the members of the clerical staff of the C. P. R. freight department took up their quarters in the offices of the new freight shed. This building is 240 feet long and 40 feet wide, and provides accommodation for eighteen cars of freight. The building and track alterations involved an expenditure of nearly \$70,000.

Winnipeg.—Great interest in the increasing facilities for the storing and handling of grain at the head of the lakes was reported by Charles Murphy, general manager of the Canadian Pacific Railway, who returned from Fort William. Mr. Murphy stated there would be an enlargement of at least 4,000,000 bushels in the storage capacity during the coming summer, and it was hoped the new equipment would be in working order in time to take care of the next crop. Two privately owned elevators were to be erected and the buildings of the Saskatchewan co-operative company were to be enlarged. One construction outfit was already on the ground and construction was being rushed as soon as weather conditions permitted.

## THIS WEEK IN SIMCOE AT FALL'S

"A Cook's a Cook and a Kettle is a Keettle, but there's just as much difference in Kettles as there is in Cooks"

Every housewife knows Aluminum Kettles or Aluminum Utensils of any description are better—but there are better Aluminum one too—a WEAR-EVER

There's a very large display of WEAR-EVER ALUMINUM in the greatly enlarged Downstairs Store.

A globe-girdler with his hand luggage plastered over with "stickers" need not worry about it's looks, but otherwise everyone likes the baggage the total hop carries ahead, to be quite up-to-date.

There's a large showing of the better kinds of Bags and Suit Cases in the Luggages Department.

Something New Every Day in the Downstairs Store

New shipment of Glassware, Jugs, Fruit Bowls, 6 inch and 8 inch Nappies to match; pickle dishes and cream and Sugars.

Utility Glass-covered Crocks and Covered Butter Dishes for kitchen use. 25c each.

New Green Pottery. Vases, Bulb Bowls, Fern Dishes, Jardiniers; all sizes, all specially priced.

Fine Glass Water Sets, floral design Jugs and six tumblers, \$2.17.

Useful small articles on the tables. Fine Spool Wire, Stainless Steel Paring Knives, Aluminum Tea Spoons and Table Spoons, Flour Sifter, Spatulas.

Wire Strainers, Towel Bars, Bread Slices, Tack Poles, Tacks, Screws, Screw Eyes, Door Pulls, Drawer Handles, etc.

BALLS. Return Balls, Solid Rubber Balls, Soft Balls, small, medium and large sizes, Sponge Balls, beautiful light, inflated Balls.

Cap Guns and Caps.

Catcher's and Pitcher's mitts and Base balls.

Years ago we originated the idea of presenting the youth with a bank account, with his first "Long Trousers" Suit. We are still doing it. It's been a mighty helpful idea for many a boy.

This is Undoubtedly a season of Suits for Women and Young Women

It has been years since suits have been so fashionable, years since they have been so generally worn. Perhaps because the New Spring Suits are more interesting and more becoming than they have been

Our Suits at \$29.50 and \$39.50 are a revelation in styles, materials, linings and general make-up.

Classically simple, straight-lined styles. Spring's leading "wray-around" effects. Elaborate, dressy models.

The new circular treatments.

Hundreds of Pretty New Dresses, Made the exacting Fall's Way, but Priced, \$10 to \$50.

Very new ideas in Bridge Lamps and Floor Lamps will be shown for the first time in the Furniture and Homefurnishing Department (Third Floor).

People whose Awnings are always up in time are the people who place their orders well in advance.

Now is the time to place this order with the Falls Store.

FALL'S

Annual 10 Days Spring SALE OF FOOTWEAR AT DOUGHERTY'S Shoe Store, Hagersville

Sale Opens SATURDAY, MARCH 24th Closes WEDNESDAY, APRIL 4th

\$5,000 Worth of Shoes AT LESS THAN FACTORY COST
