RECORD HAS NEW LINOTYPE

Typesetting. Machine is Installed to Give Better Service to Readers and Advertises of Jarvis and Walpole Newspaper.

The Jarvia Record Printing Company, Limited has installed a Model "L" Linotyte, has installed a Model at a single operation the finished product directly for response to the operation of the keyboard. It composes matter make randly and more economically than, can be done in any other manufer, it does away with worn and buttered type and always gives a new Resident dress. Matter may bekept standing at themere cost of Linotype model. Durhicate slugs may be cast in any quantity automatically. Prior to the advent of the Linotype a machine to get type was the dream of inventors from the time when the nirptnig business first began to assume a position of importance among ent trades.

of inventors from the time when the nirpting business first began to assume a position of importance among that trades. Note of the mechanical contrivances invented along those lines turned but to be utter failures while the opiciation of such few machines as were perfected to a point where they could actually set type was found to be entirely too expensive. The Linotype was the first commercially successful machine and and is today the atandard everywhere. Practically every newspaper of any importance in the United States or Canada is printed from Linotype faces. Linotypeic are also used by thousands of book and job effices, and by more than five thousand small offices having only one or two machines each. The Linotype company has constantly developed and perfected its machine to been pace with the advance of the printing art. For some years after the use of the Linotype became commercially practicable, it was regarded swirtly as a straight matter machine, adapted purely and simply to newspaper composition alone — restricted in its scope and limited in its capacity. Although the bulk of all composition in the general book and job printing officewas and stillis straight matter, it is so complicated with the addition of italic,

stillis straight matter, it is so complicated with the addition of italic, small capitals, and back leter, that entry into this prolific field was largely barredto the Linotype until inventive
