HEALTH EDUCATION

BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health mat- ters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

The span of life is increasing—we live longer than we used to do, according to figures given by the New York Medical Journal covering the past twenty years.

In 1900 the average expectancy of human life was 49.2 years; in 1910 it was 51.5; and in 1920 it was 54.3, a gain of over five years in twenty.

Statistics will show, continue the statistician, that if this rate is maintained unaltered, an average expectancy of seventy years will be attained in 1982, or within two generations as at present estimated.

Commenting editorially on these figures, the Canada Lancet says it is a common remark that our length of days is increasing perceptibly. Middle age recalls that in its youth a man had his willing stick and a woman her cap, and both years were treated with veneration, as one who had reached the Beulah Land and lived, listening only for a call from across

The Diary of a British Journalist

One of the funniest stories told by Sir Henry Lucy in "The Diary of a Journalist," is that concerning Mr. Lloyd George and his chauffeur. It was night, and Mr. Lloyd George was returning home through the country. The chauffeur was ordered to light the lamps.

As the process took some time, Mr. Lloyd George got out of the car and went round to the back to see if all was right with the rear lamp. At the same moment the chauffeur, concluding that his passenger was inside, started off at full speed and the car disappeared in the distance.

Mistaken for a Lunatic.

Mr. Lloyd George set off to walk home, and presently, reaching the county lunatic asylum, he sought the aid of the authorities for a lift.

The porter shook his head, and prepared to close the door. "But," said the wayfarer, "I am the Chancellor of the Exchequer."

"Yes, yes," said the porter, gruffly, "we've got six of 'em inside. You'll go out the gate, turn to the left, and you'll get home before morning."

Here are some more stories told by Sir Henry.

A doctor in Bristol was engaged by the war office during the war to examine the condition of a wounded man sent home from the front, and report upon the possibilities of his being again fit for military service. He replied that having had an arm amputated, the man was permanently incapacitated. Back came the searching official inquiry: "How do you know private—has only one arm?"

"Sir," replied the medical man, "I counted it!"

One day at luncheon at the home of Prince Bismarck, the Princess went up to her husband and deftly adjusted his necktie, which had got almost under his right ear.

"For fifty years," said Bismarck, "I have been battling with my necktie. The bow will never remain in its place, but always turns round, and over to the same side."

In a certain club an old Admiral was pointed out to Sir Henry Lucy as a man who had an extraordinary habit of contradicting anyone with whom he

fore being introduced, he was warned that he must refrain from contradicting any of the Emperor's statements. The Kaiser made enquiries as to the habits of white bears in the region of the South Pole.

"There are no white bears there, your Majesty," said Shackleton.

"No white bears!" exclaimed the Kaiser, regarding the explorer with a withering glance. "Why not?"

On the evening of Coronation Day, Princess Mary was met on the stairs at Buckingham Palace by one of the gentlemen in attendance, who remarked: "Well, little lady, so it's all over." The Princess went straight to her mother and protested, "He ought not to speak to me like that. I am a Princess."

"Yes," said the Queen, "you are Princess now. I hope by and by you may be a lady. You may go and tell I said so."

The Three F's.

The three F's in the transfer of disease are flies, food and fingers. A knowledge of the three F's is just as important as the old curriculum of the three R's.

Flies.—The common house fly breeds in filth and carries on its legs thousands of disease germs. The fly lights on the baby and leaves the germs. It gets into milk and poisons it.

Food.—Food handled by unclean hands; food exposed to dirt and flies, becomes contaminated and may plant the germs of disease directly in the human system.

Fingers.—The fingers collect germs and dirt from stair rails, from car straps, from shoes, rubbers, from ordinary objects in everyday use. And the fingers are constantly making trips to the mouth.

GUARD THE BABY AGAINST COLDS

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly.

It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy and good-natured. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Curious Form of Door.

One of the oldest forms of human inventions is the door swinging on hinges at one side. Some weaving insects, such as trap-door spiders, employ a similar device. But nothing is too old or too good to escape the efforts at improvement. A Belgian, Joseph Henri Dierick, invented a door of a new type, consisting of two triangular parts, which close together on a diagonal line, running from one lower corner to the opposite corner. The two parts, or leaves, are pivoted in such a manner that when opened they swing into partitions in the ceiling, leaving an entirely unobstructed passage.

Money Orders.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

MRS. RALPH SMITH.

Mrs. Ralph Smith, member of the British Columbia Legislature, who went to Great Britain at the beginning of August at the request of the Dominion Government, to encourage emigration from the British Isles to Canada, returns on the Canadian Pacific S.S. Montcalm.

EASY TRICKS

No. 28

The Hidden Number

Number thought of 6
 $6 \times 6 = 36$
 Subtract 1 from number thought of: $6 - 1 = 5$
 $5 \times 5 = 25$
 $36 - 25 = 11$
 $6 + 5 = 11$
 6 is the number thought of

Ask a friend to think of a number and warn him, if he is not a skilled mathematician, not to make it too large. Ask him to square the number—that is—multiply it by itself. Ask him to subtract one from the number he thought of and to square the remainder.

Near he is to subtract the smaller square from the greater and to tell you the remainder.

Immediately you will tell him the number thought of.

It is an excellent number trick because the number he gives you seems to have no easily discoverable relation to the number thought of. The relations is there, however—when you know where to look for it.

To discover the number thought of divide the remainder into two parts, as nearly equal as possible. The larger part will be the number thought of.

(Only this out and paste it, with other of the series, in a scrapbook.)

Ask for Minard's and take no other.

We Need Wood.

Some people (including not a few of those going into the wilds) seem to think that the forests of Canada exist wholly for the pulp and paper mills. The truth is that, despite the use of steel and cement in construction and in a great many other ways, the consumption of wood has not been lessened, but has rather been increased. Forestry authorities contend that there is no likelihood that the Canadian people will ever be able to do without wood. Wood enters into everything. City dweller and farmer alike require it for innumerable purposes. Hence, in aiding the preservation of the forests, the Canadian, wherever situated, is doing something for himself, as well as for his country.

Pollinating Date Trees.

The honey bee seems to be a failure in the modern date orchard, for the California date rancher has to pollinate every fruit cluster by hand. But, according to the experts, the work is simple. In the first place the date grower must know the difference between pollen and fruit blossoms. The pollen blossom is cut as soon as it opens and kept until the fruit flowers appear. When that time comes, the rancher ties a sprig of pollen blossoms at the top of the fruit flower with the open blooms down. One pollination to each fruit cluster is all that is necessary unless there is rain. Pollen palms are raised at the rate of two for every fifty bearing trees.

ASPIRIN

Say "Bayer" and Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians over twenty-three years for

Colds	Headache
Toothache	Lumbago
Earsache	Rheumatism
Neuralgia	Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Drug-gists also sell bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocetylchloride of Salicylic acid. While it is well known that Aspirin means Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Constipation Banished

A druggist says: "For nearly thirty years I have recommended the Extract of Roots, known as Mother Seigel's Curative Syrup, for arresting and permanently relieving constipation and indigestion. It is an old reliable remedy that never fails to do the work." 30 drops thrice daily. Get the Genuine. 50c and \$1.00 bottles.

His Hearing Restored.

The invisible ear drum, invented by A. O. Leonard, which is a miniature telephone, fitting inside the ear cavity out of sight, is restoring the hearing of hundreds of people in New York city. Mr. Leonard invented this drum to relieve himself of deafness and has helped others, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 437, 70 Fifth Avenue, New York city, will be given a prompt reply.

A CHAMPION JUMPER.

1st Bug: Who won the high jumping contest?
 2nd Bug: Why the grasshopper, of course!

The best educated man is he who knows what is to the point.—Sir Henry Hadow.

MURINE You Cannot Stop New Eyes

But you can prevent them. Murine, the only eye medicine that cures eye troubles. Write for Free Eye Cure Book. Murine Eye Remedy Co., 212 West 34th Street, New York, U.S.A.

LAME

Sprained ankles, bruised muscles, and other hurts yield to the healing influence of Minard's.

MINARD'S 'KING OF PAIN' LINIMENT

Lovely Healthy Skin Kept So By Cuticura

Daily use of the Soap keeps the skin fresh and clear, while touches of the Ointment now and then prevent little skin troubles becoming serious. Do not fail to include the exquisitely scented Cuticura Talcum in your toilet preparations.

YOUNG DAUGHTER MADE WELL

Mother Tells How Her Daughter Suffered and Was Made Well by Lydia E. Pinkham's Vegetable Compound

Vancouver, B.C.—"My daughter is a young girl who has been having severe pains and weak and dizzy feelings for some time and had lost her appetite. Through an older daughter who had heard of a woman who was taking it for the same trouble, we were told of Lydia E. Pinkham's Vegetable Compound. My daughter has been taking it for several months and is quite all right now. It has done all it was represented to do and we have told a number of friends about it. I am never without a bottle of it in the house, for I myself take it for that weak, tired, worn-out feeling which sometimes comes to us all. I find it is building me up and I strongly recommend it to women who are suffering as I and my daughter have."—Mrs. J. McDONALD, 2547 26th Ave. East, Vancouver, B.C.

From the age of twelve a girl needs all the care a thoughtful mother can give. Many a woman has suffered years of pain and misery—the victim of thoughtlessness or ignorance of the mother who should have guided her during this time. If she complains of headaches, pains in the back and lower limbs, or if you notice a slowness of thought, nervousness or irritability on the part of your daughter, make life easier for her. Lydia E. Pinkham's Vegetable Compound is especially adapted for such conditions.
