Our financial and commercial interests are demanding the more energetic development of our natural resources to assist in the liquidation of our war debt. This recognition of the value of our national heritage has created and intensified the nand from Canadian and foreign manufacturers for accuratei nformation as to the locurate information as to the loprogress in development of these resources, especially as they pertain to our forests, minerals and water-powers. Raw materials and power supply are the first necessity of industry, and the Department of the Interior at Ottawa, through its Natural Resources Intelligence Service, reports an increasing number of requests regarding these. This branch, fortunately, is in a position to answer such enquiries, and has also issued a series of resource maps and other literature of value to the commercial interests. These are available on application, and it is suggested that our readers make themselves familiar with the services which the Natural Resources Intelligence Service
