

# Canada from Coast to Coast

### St. John's, Nfld.—Embargo

ports are being received from the fishing fleet in the Gulf and indications are that the catch this year will be the best for some time. A despatch from White Bay states that ice floes in the neighborhood are dotted with "white coats" as far as the eye can see. A similar report came from Twillingate, and with the wind keeping the ice packed along the northeast coast, shore fishermen are promised a rich harvest.

### Fredericton, N.B.—Announcement

that the Government of New Brunswick will undertake the development of Grand Falls on the St. John River as a public ownership proposition was made by Premier Veniot in the Legislature. It is intended to develop at present the power which would come from storage possibilities on purely Canadian territory which it is estimated would run from sixty to eighty thousand horse-power.

### Montreal, Que.—It is understood

that the Abitibi Power and Paper Co. is planning to build 25 to 50 new houses for its employees on its townsite at Iroquois Falls this summer. Last year 25 new houses were built, bringing the number up to 235. A regular program of construction will be carried out this year.

### Port Arthur, Ont.—Approximately

ten thousand Finlanders will emigrate from their native land this summer to settle in Canada, according to Eric Korke, Finnish consular agent for the district. Mr. Korke expects that from 1,000 to 1,500 of this number will locate in Northern Ontario.

### Winnipeg, Man.—First

in the history of the Canadian grain trade, wheat has been shipped from the Dominion to the South American continent, one of Canada's largest exporters having the honor of recently handling this first shipment from Winnipeg to Rio de Janeiro. The shipment was made through the port of Vancouver via the Panama Canal.

### Regina, Sask.—Indians in the

Prairie Provinces last season raised the largest crop in their history. They harvested 636,561 bushels of wheat; 574,282 bushels of oats; 62,304 bushels of barley; 68,264 bushels of potatoes; and 10,900 bushels of other vegetables. In addition they summer-fallowed 23,000 acres, broke 6,500 put up 57,000 tons of hay and 9,515 tons of green feed.

### Edmonton, Alta.—Fifty-seven

cream graders were employed in Alberta last season. The grading of cream and butter in this province is now so thoroughly carried out that creamery butter is being sent direct from Alberta creameries to British firms.

### Vancouver, B. C.—One hundred

deep sea ships arrived in Vancouver during February. This is a port record. During January, the arrivals were ninety-two deep sea vessels. Another port record made on February 29th, was the number of ships in port. The previous reported record was forty-three deep sea ships at one time, whereas on February 29th there were forty-six.

The famous seaport of Amalfi, Italy, twenty miles from Naples, was swept by a landslide which affected seven nearby villages. More than a hundred persons are known to have perished and thousands rendered homeless.

## TO BROADCAST HIS MAJESTY'S SPEECH

### King George's Voice Will be Heard Around World When He Opens Exhibition.

A despatch from London says: King George will "speak a piece" that is expected to be heard around the world at 11.30 a.m., Greenwich time, April 23, when he will formally open the British Empire Exhibition at Wembley. For the first time in English history the actual voice of a monarch will be broadcast and heard simultaneously in the homes of hundreds of thousands of his subjects. If Canadian listeners-in are lucky during the early morning hours of that day they may possibly hear the first English King's voice to cross the Atlantic Ocean. His actual speech may not carry to the ends of the empire by wireless, but undersea cables will take his message where the air waves fail. As soon as the words leave the monarch's mouth they will be flashed from a special station in the exposition grounds along the All-British Cable route across Canada to New Zealand and Australia, thence to India and South Africa and back to Wembley, the imperial cable stations completing the circuit within five minutes.

However, the speed with which the cable message will circle the globe will be nothing compared to the swiftness with which the actual royal voice will travel to the furthestmost radio set within tuning distance. The King's tones are deep and rich and each word is clear cut and perfectly enunciated.

The smallest inhabited island is that on which the Eddystone light-house is built. It is just big enough for the foundations of the building.

## U.S. MAY GIVE LONG TERM LOAN TO BELGIUM

### Proposed Credit of \$50,000,000 by Manufacturers Supported by Government

A despatch from New York says: American financial assistance to Belgium, it was reported in the financial district on Thursday, might take the form of a long term loan instead of the temporary credit recently suggested when the Belgian franc soared its sensational advance. A group of manufacturers acting with the support of the Government, was said to be negotiating for a \$50,000,000 loan, the proceeds of which would be used for industrial development. Bonds to be issued would have the security of a Government guaranty.

Active competition for the business is expected to develop among local banking groups if the results of the preliminary negotiations, now in progress, pave the way for a loan. While the United States Bank of New York, being its agents for the Government, previously has handled the Government's financing, other bankers are preparing to submit bids on the ground that the proposed loan is not a strictly Governmental operation.

## German Surgeons Use Knife to Improve Children's Speech

A despatch from Berlin says: German surgeons are now employing operative methods for the cure of lisping, snipping a section from the end of the tongue having been found effective in ending this defect of speech when it is due, as is often the case, to the tongue being too long to find its proper place behind the teeth when pronouncing the S and other sibilant letters.

Usually lisping is due, however, to bad habits which the tongue acquires in childhood. Sometimes the child acquires the habit of misplacing the tongue when learning to talk so that the characteristic lisping results; in other cases it comes when the first teeth are lost, the child acquiring the habit of showing the tongue forward into the holes left by the missing front teeth. In these cases cures are effected by a course of exercises.

## House Adopts Seven Railway Branch Lines

A despatch from Ottawa says: When the House of Commons adjourned on Thursday night, it had adopted resolutions covering construction of seven of the twenty-six branch lines which the Government proposes to build on the Canadian National Railways. The seven bills have been given first reading, involving expenditure of \$6,422,300 out of the twenty-eight millions involved.

## PRINCE OF WALES KEEPS PARIS POLICE WORRIED

### Has Departed for Biarritz to Relief of Secret Service Department.

A despatch from Paris says: The Prince of Wales, after a 24-hour visit to Paris, left on Thursday for Biarritz, to the great relief of the secret police entrusted with the task of keeping discreet watch over the safety of the Royal visitor in France.

The Prince, who is travelling incognito as the Earl of Chester, fooled detectives and reporters newly Thursday morning. A huge automobile, bearing the coat-of-arms of the British Embassy, remained standing in front of his hotel until noon. As the Prince had not appeared, the detectives were much worried.

Afternoon newspapers published photographs of the automobile, with the caption: "The Prince of Wales is the latest riser in Paris."

In the meantime the Earl of Chester escaped by the rear entrance of the hotel and lunched democratically in a modest restaurant.

## FREE STATE MUTINY TO BE INVESTIGATED

### President Cosgrave Announces Inquiry Into Irish Army Mutiny.

A despatch from Dublin says: President Cosgrave announced on Thursday that Judge Richard E. Meredith, Gerald Fitzgibbon, formerly member of the Dail for Trinity College, and Patrick MacGilligan, new Minister of Commerce, had been appointed a committee of inquiry into the recent army mutiny and would be assisted by Daniel Gorey, nominated by the Farmers' party, and Major Bryan Cooper, selected by the Independent party.

The Labor party refused to nominate a representative on the ground that the committee ought to be limited to members of the Dail who, through the executive, were ultimately responsible for the Army Department, against which charges of mutiny and incompetence have been made.

Minister of Defence Richard Mulcahy asked that the committee take evidence under oath, but President Cosgrave said that no legal power existed for the committee to take sworn evidence or compel the attendance of Mr. Mulcahy and several other members complained of the "scandalous treatment" of officers who had served the Free State against the irregulars and declared that the officers would refuse to attend the inquiry and would leave the Government to extricate itself from the situation as best it could.

Busy Visitors.

In making a pound of honey, bees make approximately 2,700,000 visits.

## Canada's 91-Year-Old Natives Was India Veteran

A despatch from Fort William says: Thomas Flaherty, Canada's oldest native, is dead, after a week's illness from pneumonia. He was 91 years of age, and had served in the British Army in India for 27 years. In the early days of the war the familiar figure could be seen around the hotels, acting as a waiter, but of late he had taken to selling newspapers. He had been married 43 years with a friend to pay for his funeral.

## Investigation Into Home Bank Affairs Begins April 16

A despatch from Toronto says: April 16 has been decided upon as the date of the opening of the sittings of the Royal Commission appointed to investigate Home Bank affairs. The first sessions will be held at Ottawa, but as the inquiry develops and books are needed the Commission will sit in this city.

Chief Justice McKeown, of New Brunswick, the Royal Commissioner, will be assisted by the Hon. J. G. G. Home Bank Depositors' National Executive, to prepare for the opening of the sittings.

The depositors will be represented by R. J. McLaughlin, K.C., Toronto; A. G. Browning, K.C., of Hamilton, and W. T. J. Lee, Toronto. E. Lafleur, K.C., of Montreal, is counsel for the Commission.

The English Channel is more salty in winter than in summer.

## TWO KINGS AND AN ACE—ALL IN THE DISCARD

### EX-KING CONSTANTINE, EX-PREMIER VENIZELOS AND EX-KING GEORGE II. OF GREECE

The last Glucksburgs ever likely to wear the crown of Greece are shown above, together with their nemesis, the democratic Eleutherios Venizelos. On the left is ex-King Constantine, who, having married Sophie, sister of Kaiser Wilhelm of Germany, and having succeeded his own father, George I., on the throne in March, 1913, was in an admirable position to help the Germans when the war broke out in 1914. His betrayal of Greek interests resulted in his enforced abdication in June, 1917. However, when his son, Alexander, died from poisoning caused by a monkey-bite, he was recalled in December, 1920. He was again forced to renounce the crown September 27, 1922, and died in exile as Prince Flukesburen on January 11, 1923. His son, George II., shown above on the right, occupied the throne until December 18th last, when he, too, was "asked" to leave Greece. Having been married to Princess Elizabeth of Romania, he now finds refuge in Bucharest. The overthrow of the Glucksburg dynasty and the declaration of a Greek republic were practically effected this past week. In the centre is M. Venizelos, a Greek from the island of Crete, who has time after time saved the Hellenic people from overwhelming disaster and defeat, only to be rewarded with the rankest ingratitude. During the war he was staunchly pro-ally and it was primarily owing to his skillful representation at Versailles that the Greek nation, which then numbered only about four million souls, exercised such influence and obtained such favorable consideration in connection with the peace treaty.

## 70,000 Seals Secured by Newfoundland Fleet

A despatch from St. John's, Nfld., says:—The sealing fleet now has close on to 70,000 seals either killed on the ice or stowed on board their craft, according to latest reports received here. It is expected the next advices from the boats will report all the ships amongst the seals and with sufficient secured to pay a good dividend on the voyage.

## Accident to Prince of Wales More Serious Than Supposed

A despatch from London says: The Prince of Wales, who left London for a rest in Biarritz after his recent accident, is said to be in a more serious condition than was allowed to be known. He was in the Riviera for about two weeks. All his engagements for the next two weeks have been cancelled.
