REGAL THEATRE, HAGERSVILLE

SPEEJACKS' WORLD VOYAGE A LESSON TO ALL MOTORISTS

Motorists, attention! When you are inclined to grumble about the price of gas, bear these facts in mind: Albert V. Gowen, Commodore of the Cleveland Yacht Club, when planning his globe-encircling tour in his newly constructed motor yacht, "Speejacks," met with a seemingly insurmountable obstacle—the problem of obtaining gasoline while hundreds of miles from supply stations. A contract was effected with a nationally recognized fuel oil company whereby gas was to be sent to the "Speejacks" at different ports during its voyage. At one place the "Speejacks" almost missed the fuel ship and as a result departure from that point was delayed for several days. Here are the exact figures according to Mr. Gowen:

"The 'Speejacks' traveled about 39,000 miles, consuming in that time 75,000 gallons of gasoline. At the present-day rate this trip would have cost me somewhere in the neighborhood of \$8,580 for gas alone. As it was, however, with carting costs, etc., I found myself forced to pay prices ranging from 33 cents to \$1.22 per gallon. Although I do not wish to make any estimate as to the cost of the trip, I might add that 'Speejacks' originally stood me \$250,000."

The cruise of the "Speejacks" in motion pictures, entitled "Around the World in the Speejacks," a Paramount picture, will be the feature at the Regal Theatre, Hagersville, next Tuesday and Wednesday.

Ira J. Ingraham was the photographer. Many remarkable scenes of out-of-the-way places in the South Pacific Islands are presented. The picture is a distinct novelty.

PEACH CROP IS SMALL

Estimate from Grimsby Is That Crop Will Only Be Half of Last Year's

Peaches in the Niaga district will be less than half a crop this year, according to the latest estimate made by the Niagara Peninsula Growers Co-operative at Grimsby. "Some time ago," said Manager C. W. Baxter, "we hoped for a fifty per cent crop, but now we consider from thirty-five to forty per cent, a more accurate figure. Last year's crop was a fairly heavy one, and at blossom time this spring we had cold, windy weather that kept the bees away from the blossoms. The St. Johns, Early Crawfords and late Crawfords will be almost a failure this year." The Elbertas make up the bulk of the Niagara peach crop, and these will run around the thirty-five to forty per cent figure already mentioned. Some of the early white-fleshed varieties are moving to market, but once these early varieties are finished there will be a blank until the late peaches come on.

AUTO BREAKS LEG OF DUNNVILLE LAD

At the Dunnville police court on Friday last Miss Jessie Knox of New York State was charged with doing an unlawful act causing bodily harm. She was driving on the Forks Road east of Dunnville where the road is closed and a boy by the name of McVicar was in charge to prevent traffic, other than the trucks drawing material. The prisoner went to go through the closed road while the boy had a bar in his hand. He was knocked down and the car ran over his leg breaking it.

The council for the prisoner asked for an adjournment. The case was adjourned until Saturday, the 23rd inst., on \$500 cash bail being deposited. Harrison Arrell, K.C., appeared for the Crown and W. T. Robb for the prisoner.

O.A.C. DEPARTMENT CHEMISTRY EXHIBIT

The Department of Chemistry, Ontario Agricultural College, will have an exhibit at Cayuga Fair. This will include results from the Experimental Plots located in Welland and Norfolk Counties, and results of experimental work on potatoes, beans, beets, fall wheat and clover which is carried on in eighteen other counties, including Haldimand County.

An interesting feature will be that any farmer who wishes to have his soil tested for acidity or need of lime can have it done at both free of charge. The sample of which a few ounces will be sufficient, should be taken at several points of the field, thoroughly mixed, and all soil brought to the fair.

The exhibits of results from the lime-phosphate experiments conducted in sixteen counties during the past two years, including Haldimand, is very interesting and instructive. Farmers should see photographs of crops and actual root systems showing how acid phosphate prevents winter killing of clover or alfalfa.

Many other interesting features will be present, and much useful information regarding crops, lime, fertilizers, soils and kindred subjects may be had for the asking.

Full information as to the courses conducted at the Ontario Agricultural College, with photographs of the various departments of the institution will be available.

Enquire as to the cost of sending our boy to college!

MRS. DAVISON PLEADED GUILTY OF ARSON

Simcoe, Aug. 15.—Julius Niemcewicz, proprietor of the Henry Massey farm in Woodhouse, and of considerable real estate in Port Dover, and Mrs. Davison, wife of John Davison recently convicted of arson and awaiting sentence here, were on trial yesterday before the police magistrate charged with being parties to the crime for which Davison had been found guilty. Mrs. Davison elected to be tried summarily, pleaded guilty and remanded one week for trial. Niemcewicz elected to be tried by jury and pleaded not guilty.

The Crown rehearsed with 22 witnesses all the evidence brought out at Davison's trial and put Mr. and Mrs. Davison on the stand as crown witnesses. The collapse came about through the fact that another prisoner heard Davison talking in his sleep and advised the authorities. Davison subsequently unloaded as did Mrs. Davison, who told the court that she thought it her duty to shield her husband up to the time when he confessed.

The evidence of the Davisons told of the purchase by Messengers at Beeton, of cans of gasoline and coal oil, of the midnight trip of Mr. and Mrs. Davison to Port Dover, and of the attempt to soak the interior of the building as directed by the owner, Niemcewicz, and of Davison getting the palm of his left hand burned.
