WASHING BABY'S WOOLENS. pan on the stone. I filled a fruit can Cold weather calls for woolens for with hot coffee, wrapped it in a newsthe wee ones, and this means extra paper, fitted it beside the potato dish, it with the ladies newadays, 'specialon another card." care with that part of the washing, filled in all the space with crushed for woolens will shrink at the slight newspapers and laid a magazine on

I always buy the garments that are top of the box where I put in a smallpart cotton or silk, as they do not er pasteboard box of bread and butshrink so easily as the all wool. Then ter sandwiches, fresh fruit and cookafter baby has his bath and has been ies. The heat did not reach these as tucked away for a nice long nap, be- the magazine formed perfect insula- sort of thing, eh, mates?" fore putting his little tub away I fill tion. it with tepid water to which has been The experiment was a success and I added some soft flaky soap chips, soon learned to pack potatoes, a vege-These I stir into a suds and place his table and meat so that these and the woodens in to soak for five minutes, coffee kept hot and, with sandwiches, At the end of that time I gently cake or cookies and fruit, furnished squeeze, not wring, the little garments my husband out at work with as well out and then give them one rinsing in balanced a moal as we could serve on clear water of the same temperature, our home table. We noticed that his When squeezed out I gently pull them health was far better than that or the into shape and hang them up.

Much depends upon the way they are hung. The little stockings should some distance from home, I use the have the feet stretched as far as pos- crate, and stee but put the meat in keeps the stocking foot stretched until the cover fits the pan so everything is it is dry. The shirts should be hung compact. up by the shoulders or, better still, I send roast meat of some kind, put on hangers. The flannel petticoats should be hung by the shoulders duck with the dressing. The pan holds rather than by the seams of the skirt, mashed, escalloped or fried potatoes.

as the hem stretches out unevenly Another box or basket holds paper when pinned up by the hem. And when ironing woolens, only a warm iron should be used, as wool scorches they are away, to myself, knowing easily and is often ruined in this way, they are well fed and will not need -Velma West Sykes.

WHIPPING CREAM.

In the investigational work of the Dairy Department of the Ontario Agricultural College the following conclusions have been reached.

The temperature, richness and age cream are important factors. Cream rich in fat whips in less time and stands up better than does er cream.

Cream containing 28 per cent. fat a satisfactory whipping cream. Cream for whipping should be cooled to 45 deg. F., if possible, and be held for at least 24 hours.

If cream is not held at a low temperature there is danger of having too high acidity.

Lemon juice is a suitable substance to add to cream when it is too fresh. This will cause it to whip better and give a larger yield.

Cream whipped at a low temperature whips in less time and gives a larger yield than that whipped at a higher temperature.

After whipping, the cream should be held at a low temperature until

If cream cannot be whipped in a cool room, the dish containing the cream should be placed in very cold

There is no advantage in adding milk powder to cream for whipping.

STEEL WOOL FOR SCOURING.

As a labor and time saver I believe comfortable model. It will develop that steel wool can't be beat. It is well in gingham or percale, and is good not only for aluminumware but also good for damask, jersey, serge for pottery, enamel and iron wares and other wool fabrics. The sleeve as well. Nothing will remove the may be finished in wrist or short scorch from these metals so complete- length. ly and quickly as a little steel wool. The Pattern is cut in 7 Sizes: 34, By using steel wool for cleaning, the process is accomplished in about half at the foot is 2 yards.

Measure. A 38-inch size requires 4 % writer.

As an As an Assance with the process is accomplished in about half at the foot is 2 yards. the number of motions required when Pattern mailed to any address on ledge that prevails in some quarters steel wool give it great adaptability weeks for receipt of pattern.

MY MAN'S HOT LUNCH.

Two years ago when the graveling of the highway was in progress, the work was done mostly by farmers. They worked well into December and lew of them went home for dinner. With three small children it was apossible for me to carry a hot dinr to the pit.

A one-compartment fireless cooker nd a thermos bottle would have solvthe problem but they were beyond y reach.

I had a well-built egg crate with a losely-fitting cover, a pile of clean d newspapers and magazines and a tone foot warmer minus a undle. With these I went to work. I lined the sides and bottom of the ate with old magazines, heated the sap stone as hot as possible without ming the papers and placed it in

Order Your Farm Help Now

IN VIEW of the great demand for farm help existing in Canada, the Canadian Pacific Railway will continue its Farm Help Service during 1924 and will enlarge its scope to include women domestics and boys. THE COMPANY is in touch with large numbers of good farm

laborers in Great Britain, Norway, Sweden, Denmark, France, Holland, Switzerland and other European countries and through its widespread organization can promptly fill applications for help received from Canadian farmers

In order to have the help reach Canada in time for the Spring operations farmers needing help should arrange to get their applications in early, the earlier the better, as naturally those applications which are received early will receive first attention Blank application forms and full information regarding the service may be obtained from any C.P.R. agent or from any of the officials listed below. THE SERVICE IS ENTIRELY FREE OF CHARGE.
