Canada from Coast to Coast

Halifax, N.S.—An unusually large number of tourists from the United States and Eastern Canada are visiting this province this year, according to a report of the Provincial Tourists Bureau. During one week, 239 American touring cars passed into Nova Scotia along the border between New Brunswick and Nova Scotia.

Montreal, Que.—Contracts for additional wharf construction in the port of Montreal, will shortly be placed by the Montreal Harbor Commissioners. The works will be a continuation of the notable scheme of improvement in progress in that section of the harbor east of the cold storage plant. It is proposed to let contract for the construction of 700 feet of low-level wharfage at sections 31 and 32.

Timmins, Ont.—Production of gold from the mines of Northern Ontario for the first six months of the current year reached an aggregate of \$11,750,000, according to preliminary estimates. The income from investments, bonds, and bank deposits, and from premium on gold sold for New York funds, brought the total income of the gold mines to well above \$12,000,000 for the half year.

Winnipeg, Man.—The Canadian wheat crop will bulk larger in British eyes in 1924 than for any year since world conditions two years after the war made this market independent of supplies from any particular source, according to a London dispatch. Reports from the principal wheat growing countries are to the effect that prospects for the 1924 crop are not very encouraging. In Canada, while the acreage is somewhat less

than in 1923, it is estimated that the yield will be only 19,000,000 bushels less than the record crop of last year, which amounted to approximately 470,000,000 bushels.

Saskatoon, Sask.—A total of 2,619,000 trees were distributed during the past spring from the forestry farm at Sutherland, shipments being made as far east as Portage la Prairie and west to Peace River. The trees included Russian poplar, Manitoba maple, caragana, ash and three varieties of willows.

Edmonton, Alta.—A modern fish freezing plant will be installed at Lesser Slave Lake with a capacity of 150,000 lbs. of fish, for the further development of the fishing industry in this lake, it is stated.

Vancouver, B.C.—Vancouver will be visited, starting in September, by one of the largest grain carrying fleets that ever has called at any port on this continent, according to local shipping men. At one time during the past crop season a fleet of 42 vessels was in port, but next fall, shipping men predict will see a fleet of at least 200 ships here, including vessels making regular calls as well as a large number of tramp steamers.

Dawson, Y.T.—Fur production in the Yukon Territory during the year ended July 31, 1923, showed a considerable decrease in respect to the number of pelts caught, as compared with the previous twelve months period, the totals being 46,198 and 69,796 respectively. There was an increase in the catch of lynx, otter, mink, white fox, silver fox, wolf and coyote, while decreases were registered in weasel, muskrat, wolverine, bear, marten, red fox, and cross fox.

A Stuart McLaren and Flying-Officer J. Plenderleigh, British round-the-world flyers, have recently been located on a tiny Japanese island after being 36 hours overdue at their next scheduled landing place.

HOME BANK DIRECTORS TO ANSWER CHARGES

Jury Trial to be Held on Oct. 13 and Hearing on Other Counts Sept. 9. A despatch from Toronto says:—Tuesday, Sept. 9 was fixed upon by Judge Coatsworth as the date for the trial of the charges laid under the Bank Act against the Home Bank directors and officials. Judge Coatsworth will try the cases without a jury. The same accused persons must face trial by jury on conspiracy charges at the Criminal Assizes opening on Oct. 13. The date for the hearing of the charges under the Bank Act was set upon application of D. L. McCarthy, K.C., special Crown Prosecutor, following the decision of the Privy Council recently rendered. Mr. McCarthy presented charge sheets against the directors and officers collectively, and individual charge sheets against R. P. Gough, S. Casey Wood, K.C., J. F. M. Stewart, F. J. B. Russell, Clarence F. Smith, C. A. Barnard, Ocean G. Smith and Sidney H. Jones. No charge sheet was put in against A. E. Calvert, who was the Acting General Manager when the bank failed. For some time he has been at work on the bank books assisting the Crown and the liquidators, and the announcement of the Crown Prosecutor was somewhat expected. While nothing was said, it is expected the conspiracy charges against Mr. Calvert will also be dropped. All the defendants elected to be tried by Judge Coatsworth without a jury and pleaded not guilty. I. F. Hellmuth, K.C., who appeared for all the defendants, stated that, while he was not making any special complaint, particulars of the charges had not been furnished to the defence. His Honor made an order for particulars subject to anything Mr. McCarthy may desire to bring to the attention of the Court on Wednesday, Aug. 6, at 3 p.m. Mr. Hellmuth promised to let Mr. McCarthy know what particulars are required and the Crown Prosecutor said they would be furnished by Monday or Tuesday next. The charges against the directors and officials follow the original indictments preferred by the Crown.

Horse Able to Retire on Dollar a Day Legacy

A despatch from Kingston says:—Under the will of the late Charles Sandwith Campbell, K.C., of Montreal, who was recently reported as having bequeathed the sum of \$318,000 to the Kingston General Hospital, provision is made for the late Mr. Campbell's favorite horse. This provision of the will is to the effect that Mr. Campbell's horse, Kodak, of which he was very fond, will be provided for by the executors of the estate during its natural life or until such time as the executors believe to be more humane to destroy the animal. A sum of money is being set aside for the horse's maintenance, to be expended at the rate of \$1 per diem until its death.

LONG-SOUGHT TOMB OF RESURRECTION DISCOVERED BY ANTIQUARIANS

A despatch from London says:—It is believed that there has been uncovered the veritable Tomb of the Resurrection, despite the desperate efforts made by the Emperor Hadrian to cover up all traces of a shrine in which centred the interest of the Christians of his day. The discovery has been made near the entrance of the Garden Tomb outside the Damascus Gate of Jerusalem, and its uncovering is the result of the merest accident. Some loose stones were being removed from the ground in front of the entrance to the tomb in the process of tidying up the garden, when one of them attracted the attention of the custodian. Owing to the fact that it had markings upon it, he had it removed, partially cleaned it, and reported the find to the Government Department of Antiquities. A few days after its discovery it was viewed by Professor Bradenburg, who was commissioned by the Berlin Society of Palestinian Research to investigate the rock tombs of Palestine a year ago, and whose reputation as an authority on the rock architecture in the Mediterranean is admittedly high. He immediately and without hesitation identified it as "a shrine of the goddess Cybele or Aphrodite (Venus), with the column and tree of Adonis or Attya beside it," declaring that such shrines were found in the temples of Venus. A more careful cleaning of the stone further endorsed his first impression, for it clearly revealed fruit on the tree. The importance of this discovery, if the identification be correct, as seems probable, lies not so much in itself as in its association with the garden tomb. This tomb is regarded by many as perhaps the very Tomb of the Resurrection. It is a well-known fact of history, that in the year A. D. 135, when, on the suppression of the revolt of the self-styled Messiah Bar-Chochoha, the second and more complete Roman destruction of Jerusalem took place; the Emperor, Hadrian, built a new Roman city, named Aelia Capitolina, on the ruins, and among other things erected a temple of Venus over the purpose of completely desecrating it. It is evident, therefore, that in seeking to identify the Tomb of the Resurrection traces of this temple must first be looked for.

FAMOUS FIGURES IN CANADIAN HISTORY

Descendants of Cabot, Wolfe and Montcalm Represent Ancestors in Empire Pageant.

A despatch from London says:—The descendants of John Cabot, one of the first discoverers of America; of General Wolfe, who won Canada for the British Crown; of the Marquis de Montcalm, who died in an effort to retain it for France, and of two fathers of Confederation will take part in the Canadian section of the Empire Exhibition of the British Empire Exhibition. They will be living links with the history of those historic times which the pageant is designed to represent. There are no fewer than three descendants of John and Sebastian Cabot alive, and one will represent the first-named of the two explorers. Wilfrid Aylward will take the part depicting his ancestor, and it is hoped the Marquis de Montcalm will make his appearance before the pageant is over to represent his famous grandfather. Leonard Tilley will portray the part of Sir Leonard Tilley, and it is hoped to persuade W. J. Tupper, of Winnipeg to act as Sir Charles Tupper in the Fathers of Confederation scene. The descendants of some of Wolfe's generals will represent these military figures in that part of the pageant dealing with the capture of Quebec.

World's Smallest Navy.

Which is the smallest navy in the world? The man who replied "the Swiss Navy" would probably be laughed at, for Switzerland is an inland country. It has a navy, however—a flotilla of motor-boats which patrol the lakes. Monaco also has a navy of sorts, consisting chiefly of motor yachts and launches. Jugo-Slavia, however, is possibly the country with the smallest navy. It had no seaboard before the War, and only possesses a few monitors for service on the Danube.

1924 Russian Harvest Even Less Than in 1920

A despatch from Berlin says:—Soviet official organs in Moscow openly admit that the failure of the crops this year is greater than it was in 1920, the famine year. Harvesters in the Ukraine expect to get only 10 per cent. of the normal crop, while crops in Tzaritsin Province and in other districts along the Lower Volga are a total loss.

An unusual intimate view is given of Nathan Leopold, Jr., and Richard Loeb, millionaire youths, who are standing trial for the murder of Robert Franks, wealthy schoolboy. They are shown talking to their attorney.

WESTERN CROPS AT MERCY OF WEATHER

Opinion General That Prospects for Average Yield Are Faint. Winnipeg, Man., July 24.—Cool dry winds sweeping over the prairies to-night, following a day without moisture, has improved to a marked degree the growing grain. The shot blade has been reached or

passed by most of the wheat and the danger stage is acute. B. W. Snow is sending reports to Chicago traders that fifty per cent. of the stalks in fields of that section are infected, but he is not bearing down so hard on the black rust point as he did earlier in the reports which caused such a panic. The rust is there, but Manitoba authorities still insist it is of the red variety at present, and this is not dangerous. The Saskatchewan Co-operative Elevator Co. has published a report that in central and northern Saskatchewan the damage is irreparable, but that the southern part of three provinces will have a good yield. Regina, Sask., July 24.—F. H. Auld, Deputy Minister of Agriculture for Saskatchewan, in a statement on the crop conditions, said: "There is a fair average crop south of the main line of the C.P.R. In the districts north of the line, half of last year's crop will only be secured under the most favorable weather conditions from now on." Mr. Auld would not venture an estimate on the yield. Calgary, July 24.—Whatever it is, it will be bad, thus declared H. W. Wood, president of the U.F.A. and of the Alberta Wheat Pool, when questioned regarding the Canadian Western crop situation. Mr. Wood declined to make an estimate in bushels, but said that even while rain might improve the crop situation materially, the yield would be poor. Chicago, July 24.—For the first time in history, the world is facing an acute shortage of all bread and food grains, according to a statement issued to-day by J. E. Carney, an official of one of the largest grain houses in Chicago. Mr. Carney says he believes the United States farmer will realize \$2 a bushel for wheat this season, \$1.25 a bushel for corn and 75 cents a bushel for oats.

Fireflies Re-burn All Materials.

Fireflies or lightning bugs burn the same materials over and over again in the production of their lights.

The Prince of Wales, photographed while inspecting partly-made aeroplane wings at the aviation works at Woolston during his recent visit to Southampton, where he officially opened the largest floating dock in the world.
