Here and There

Although it is only 18 years ago that Alberta became a province, its population has increased fourfold, while the grain yield has increased twentyfold. Even at the present low prices, the total agricultural products of Alberta in 1923 were worth \$223,000,000.

Reports concerning the apple crop in the Annapolis Valley show that the entire crop, including the estimated local consumption, was 1,816,000 barrels. It is reported that 70,000 apple trees and 3,000 plum trees will be set out in the valley this spring.

The railways of Canada up to the end of last April earned \$6,000,000 more than they did for the corresponding period in 1923. This favorable result is due entirely to the fact that the people have been doing more business. All authorities are agreed that such a condition means growing trade.

Nearly 68,000 bushels of high class seed were handled at the Alberta government seed-cleaning plant during the past season. A total of 22,823 bushels of Marquis wheat seed was handled, 2,160 bushels of ruby wheat, 23,973 bushels of Victory oats, 17,948 bushels of Banner oats, and 984 bushels of Barkley Barley.

Three prizes for anglers at the bungalow camps on French River, Nipigon River, and the Lake of the Woods, have been offered to Canadian fishermen by the Canadian Pacific Railway. The trophies are silver replicas of the bass and the trout, and a wonderful reproduction of the head of a fighting muscalonge.

Among the speakers to address the great convention of the Associated Advertising Clubs of the World at London, England, to be held July 14-17, will be E. W. Beatty, K.C., Chairman and President of the Canadian Pacific Railway. Mr. Beatty will speak on July 17, and has chosen as his theme "Building an Empire with Advertising."

Canada's national wealth in 1921 was \$22,195,000,000, according to a report just issued by the Dominion Bureau of Statistics. In the tabulation, agricultural wealth comes first with \$7,982,871,126, nearly 35 per cent of the total and about \$908 per head of population. The Western provinces lead, the Yukon topping the list with \$4,058. The first in absolute wealth was Ontario, to which is credited the sum of \$7,358,000,000, or thirty-three per cent of the Dominion total.

Shipping in and out of the port of Vancouver, B.C., for the calendar year 1923, showed an increase in all departments, according to the annual report of the Board of Harbor Commissioners. Over \$133,000,000 worth of goods were exported, an increase of \$30,000,000 over the value of the 1922 exports, while the imports totalled \$224,000,000, an increase of \$13,000,000 over the 1922 figures. Vessels numbering 12,606, representing a total of 8,427,684 net tons, entered and left the port in 1923, an increase over 1922 of 2,939 ships and 792,289 tons.

A party of 200 Canadian Weekly Newspaper Editors and their wives sailed for Europe on June 11th aboard the Canadian Pacific steamship "Melita." The party will visit the battle-fields of France and Belgium, seeing most important points in those countries, including Brussels and Paris and will be received by King Albert. Later, they will tour England and Scotland and are to be presented to the King and Queen at Buckingham Palace on Dominion Day. Returning on the Canadian Pacific steamship "Montclair," they will visit Belfast, where Sir Robert Baird, head of the Belfast Telegraph, will entertain them. They dock at Quebec on August 4th.

ELIMINATION OF DEGENERATION POTATO DISEASES
(Experimental Farms Note.)

Degeneration diseases of potatoes are those such as mosaic, leaf curl, curly dwarf, spindle tuber and the like, which are known to be spread in the field by aphids, plant lice, and which can only be eliminated by removing the source of infection. The source in every case can be traced to tubers which were formed in diseased hills the previous year. The aphids feed on the plants arising from these tubers, and when they go to healthy ones they carry some of the infection with them, and in the course of feeding, inoculate the juice from the diseased plant into the healthy one. In the course of a few weeks the formerly healthy plant is diseased.

In order to prevent the spread of these degeneration diseases it is necessary to go through the field about the time the plants are eight to ten inches high and pull out all that appear undesirable. In doing this be sure to remove the entire plant system, including the seed piece. The removal of plants in this way is known as "roguing." Two or three weeks later the field should be given another thorough inspection and all diseased or undesirable plants rogued. It is also necessary at this time to remove any foreign varieties which may be present. Should it be necessary to rogue a field after the tubers have begun to form, care should be

taken to remove these as well as the plant. This will reduce to a minimum the danger of disease being carried over to next year's crop by means of the tubers.

TEA AND COFFEE DRINKING

Tea and coffee are commodities that seem to be growing in popularity. With the report that the American people are using more coffee now than ever before comes the announcement from England that the British people have never bought so much tea. Last year they used eleven pounds of tea per capita, and Americans used thirteen pounds of coffee. Drinking tea or coffee is as much a social as a personal habit and of late years has been stimulated by extensive advertising.

Where "Bootlegger" Came From

"Bootlegger," says the Boston Globe, is an American term dating back to pioneer days when the sale of whiskey, which was formerly sold without restriction in grocery and other stores, was first regulated. In order to escape the cost of licenses, men made a business of selling whiskey

by the drink from bottles carried on their persons. High leather boots were then worn by many men, and the bootleg was found to be a convenient place to hide a bottle of whiskey. From this fact, illicit whiskey peddlers became known as bootleggers, and the term was extended to include persons selling intoxicants in violation of the prohibition laws.
