BY CLEMENTINE PADDLEPORD.

You have stood in your kitchen door rooms. The city woman pays dearly after a summer shower and watched for nature's color, in the form of a rainbow fade into the midst of a sutumn leaves and berries, wild flow-purple hill. Your eyes counted the ers and tall swamp grass. You have colors red, orange, yellow, green, it for the picking. blue and violet-how soft they were Every season offers her color splashed with the gold of sunlight and schemes for your choosing. Spring with each other and with light and biations can be copied. You have lookshadow all other hues are made. All ed across the fields in summer, wheat the colors of nature which we imitate a tiptoe in the wind golden yellow in our curtains and rugs and pictures leaning against a block of rippling

those of the rainbow. But I could have done as well with three the red the yellow and the blue. Those are HOUSE-CLEANING HINTS FOR the primary colors, green, orange and purple are made by mixing together any two of the primaries. Yellow and blue make green. Yellow and red make orange. Mix red with blue and you have purple.

NATURE'S USE OF COLOR.

Take the primary and secondary cleaning. Mrs. J. S. color families and see how nature uses and the power to make it shrink. It pair of curtains I mark them with sewing and cooking for these little and the power to make it shrink. It pair of curtains I mark them with sewing and cooking for these little has a hidden quality too of stimulating action in those who live in it. Too the last window If th much red is dangerous. Red color is the last window. If there is no up had the same experience and if the like red pepper—important, but to be or down to the curtains the markings lonely, empty and cheerless homes of used sparingly. Spots of it are spien- go at the down end. When they are the country could only realize it they flaming sumac along the ridge of a ing the sun a chance to wear them hill. In a room spots of red bring out the same all over.—Mrs. M. F. other color schemes. Use it in books, bowls, brocades, a lampshade or an solved in water make excellent cleanoccasional piece of furniture.

Yellow is the color of daffodils and laughter. It is the happiest color of the lot. You have seen pastures spot- Mrs. B. M. O. ted with clumps of yellow daisies that seemed laughing in the sun. Used in time by preparing a peck of potatoes, dull rooms and morbid dispositions.

and light-absorbing. Green is another as needed. The soaking makes them cool, light color with a touch of cheer. cook and look like new ones. I also No other colors but these two could boil a kettleful of the smaller potatoes be used without monotony in the wide with their jackets on to have for stretches of sky and water. But even creaming and salad.—Mrs. H. E. K. Can you imagine water or sky one furniture polish. Melt one-half pound never-changing hue? So in our rooms of sealing wax and slowly pour into
