THE REVOLT OF MRS. HUMMINGBIRD

In the midst of our discussions Mrs. Hummingbird grew very tame, there was a whir in the columbines, that summer. As I sat on the steps, the greatest number appearing every and Mr. Hummingbird appeared she would get honey all round me. Il years.

This was so unusual that pony-plans she would get honey all round me. Il years.

There was a flood of climbing nasture. As we gaze at these cun-spots it is thums nearby; I wondered if their impossible for us to conceive of their such a beauty. We must be sure honey could be as piacia-colored as true magnitude.

Many of them are more than 50,000 that from more mildly tinted flowers.

Many of them are more than 50,000 to have more columbines in these beds About me she whizzed, now across my miles across. In 1858, one was obnext year; they suit him so—and he does love them. But—had Mrs. Hum—feet to get into a low-lying petunia, cerved which was 107,000 miles across.

The metter in these sum and to see the second of the metter in these sum and the second of the metter in these sum and the second of the metter in these sum and the second of the metter in these sum and the second of the metter in these sum and the second of the metter in these sum and the second of the mingbird, for once, sent him out to do the work? He had—so far as any thing as transient as a hummingbird den conviction that there were bloscould have the arduous, painstaking expression of one who grapples with plantains, mowing-machines and agrian unaccustomed task: sometimes culture, of the back yard. Beautiful, 20 times as great as that blundered a little, once almost missed for thought. . In an instant, back of miles from the surface of the sun she would come it could have told her ly this was the revolt of Mrs. Humshe would come (I could have told her and fail back upon it, rolling out in
