

Sometime! Why not this time?

RED ROSE TEA "is good tea"

The ORANGE PEKOE is extra good. Try it!

Mother-of-Pearl and Pearls.

Mother-of-pearl, that pretty substance that shines with all the colors of the rainbow, comes from certain shells. We use for delicate ornamentation what was once the dwelling of a glairy animal, near relation to the oyster. Truly, this dwelling is a veritable palace in richness. It shines with all imaginable tints, as if the rainbow had deposited its colors there.

"This is the shell that furnishes the most beautiful mother-of-pearl. It is called the meleagrina margaritifera. Outside it is wrinkled and blackish green; inside it is smoother than polished marble, richer in color than the rainbow. All tints are found there, bright, but soft and changeable, according to the point of view."

"That superb shell is the house of a miserable, slimy animal! In fairy tales the fairies themselves have none to equal it. Oh! how beautiful, how beautiful it is!"

"Every one has his portion in this world. The slimy animal has for his a splendid palace of mother-of-pearl. "Where does the meleagrina live?" "In the seas that wash the shores of Arabia."

"Then those shells are very precious?"

"You shall judge for yourself. First the inner layer of the shell, sawed into sheets and tablets, is the mother-of-pearl that we use for fine ornamentation. Jules' pen-knife handle is covered with a sheet of mother-of-pearl that was part of the inside of a pearl-shell. But that is the least part of what the precious shell produces. There are pearls as well."

"But pearls are not very dear. With a few sous I bought a whole boxful, to embroder you a purse."

"Let us make a distinction: there are pearls and pearls. The pearls you mention are little pieces of colored glass pierced with a hole. Their price is very moderate. The pearls of the meleagrina are globules of a pearl-shell. If a man on the Board Walk at Atlantic City was struck on the head with such force by a clam that a gull had dropped that he was knocked down and for a little while was unconscious. It is an interesting question whether instinct or intelligence impelled the gull to drop the clam just at that moment."

"It is well to know how they are produced."

"Between the two parts of the shell

lives an animal like the oyster. It is a mass of slime in which you would find it difficult to recognize an animal. It digests, however, and breathes, and is sensitive to pain, so sensitive that a grain of dust, a mere nothing, renders existence painful to it. What does the animal do when it feels itself tickled by some foreign substance? It begins to sweat mother-of-pearl around the place that itches. This mother-of-pearl piles up in a little smooth ball, and there you have a pearl made by the sick, slimy animal. If it is of any considerable size, it will cost a fine bag of crowns, and the person who wears it around her neck will be very proud of it."—From "The Story Book of Science," by Jean Henri Fabre.

There Were No Kids in Eden
Wife—"This is the best apartment we've ever had, John. If children were allowed it would be a perfect Paradise."

Hubby—"But the landlord know better than that."

Habit of Gulls.
It is a well-known habit of gulls and some other birds that feed in part on shellfish to carry clams to a considerable height and then drop them on some hard surface to break the shell, richest and finest mother-of-pearl. If a man on the Board Walk at Atlantic City was struck on the head with such force by a clam that a gull had dropped that he was knocked down and for a little while was unconscious. It is an interesting question whether instinct or intelligence impelled the gull to drop the clam just at that moment."

HOST TO A HOST OF GAME

From the dining room of the Miner home. An appreciative gander, inset.

What is, perhaps, the most wonderful hotel in the world, is located on Jack Miner's farm at Kingsville, Ontario. The guests come from as far north as the Arctic Circle and from as far south as the Gulf States. They carry no baggage, are not required to register, pay nothing for board or lodging, stay as long as they wish, and when they get ready to leave, they take the elevator for the sky—and off they go in beautiful winged scuttles, honking and quacking their happiness and gratitude.

This is Jack Miner's wild goose and duck sanctuary, and it is one of the sights of Canada. The birds learned that he was a friend of theirs, communicated that fact to their acquaintances, and now thousands of them in their spring and autumn migrations visit his little watering resort for a few weeks' lay-off and recuperation. Jack's feed bill runs pretty high. It takes from 1,000 to 2,000 bushels of corn per year to satisfy his feathered visitors and not slight anybody. But he loves the birds and the birds love him, and where mutual affection exists, he figures the matter of expense doesn't count.

Work and Worry Weaken Many Women

NEW HEALTH CAN BE HAD THROUGH

Dr. Williams' Pink Pills

They Give New Vitality—and more.

The demands upon a mother's strength are many and severe; her own health trials and her children's welfare exact heavy tolls, while broken rest and much indoor living tend to weaken her constitution. No wonder that the woman at home is often indisposed through sick headache, backache, and nervous troubles. But varied as her health troubles are, the cause is simple, and relief near at hand. When well, it is good blood that keeps a woman well; when ill, she must make her blood rich to renew her health; and the nursing mother—more than any other—needs rich blood and plenty of it.

Care of diet, sufficient rest, fresh air, and Dr. Williams' Pink Pills will keep a woman's health robust and regular; and because these pills make new blood abundantly, thousands of weak wives and mothers have derived prompt health-help from them.

Mrs. Stewart Grant, Stewiacke, N.S., says:—"After the birth of my first baby I did not regain my health. I could scarcely walk across the room because of the pains in my back. I began taking Dr. Williams' Pink Pills and through their use regained good health. Later an attack of influenza left me very weak, and again the pills fully restored me. I can recommend them to any one who is weak or run down."

The Windmill

Behold! a giant am I,
Aloft here in my tower,
With my granite jaws I devour
The maize, and the wheat, and the
rye,
And grind them into flour.

I look down over the farms;
In the fields of grain I see
The harvest that is to be,
And I fling to the air my arms,
For I know it is all for me.

I hear the sound of flails
Far off from the threshing floors
In barns, with their open doors,
And the winds, the wind in my sails,
Louder and louder roars.

I stand here in my place,
With my foot on the rock below,
And whichever way it may blow
I meet it face to face,
As a brave man meets his foe.

And while we wrestle and strive,
My master, the miller, stands,
And feeds me with his hands,
For he knows who makes him thrive,
Who makes him lord of lands.

On Sundays I take my rest;
Church-bells begin to ring,
Their low, melodious din;
I cross my arms upon my breast,
And all is peace within.

—H. W. Longfellow.

MAKE CARE OF BABIES EASIER

Stomach disturbances and constipation are responsible for much of the peevishness of babies and young children. When the baby is cross or irritable the mother should not resort to so-called soothing mixtures to correct the trouble, for in the majority of cases these mixtures simply drug the child into an unnatural sleep. What is needed is a gentle laxative that will sweeten the stomach and regulate the bowels. Such a remedy is found in Baby's Own Tablets. They are easy to take and are guaranteed to be entirely free from opiates and narcotics. Concerning them, Mrs. Jos. T. Williams, Ste. Sophie, Que., writes:—"I would like all mothers to know that I feel there is no other medicine to equal Baby's Own Tablets. I always keep a box in the house and their prompt use never fails to restore my little ones to health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Bull-Fights in Britain.

Bull-fighting, which is declining in favor with the Spaniards, was once a popular sport in England, though in a somewhat different form. It has only been forbidden by law within the last hundred years.

The bull was tied to a stake, after having the points of its horns protected. Fierce dogs were let loose on it, and a terrible battle would ensue. Bulldogs were bred specially for the sport. Their peculiar jaws gave a grip so strong that the bull could not throw them off its attacks once their teeth had met its shoulder.

Bear-baiting, too, was popular at one time. Both Queen Mary and Queen Elizabeth were fond of bear-baiting and bull-fights. Great men kept "rings" and there was one in nearly every place of amusement. "Bank-side" was a noted place for the "sport" in London. The charges for admission were a penny to enter, another penny to go in the "grandstand," and a third penny for the equivalent of reserved seats.

Thursdays and Sundays were the favorite days for baiting bears and bulls. At one time the theatres were ordered to close down on the former days so that competition should not interfere with the baitings.

Ambition Awakened.

Five-year-old Freddie—"Another penny for my birthday! Oh, grandpa, I'm going to try to live a hundred years, so's I'll have a dollar."

If this be a happy year, a year of usefulness, a year in which we shall live to make this earth better, it is because God will direct our pathway. How important, then, to feel our dependence upon Him!—Bishop Mathew Simpson.

The unfinished task not only robs one of the joy of achievement, but it reacts sharply on one's character.—H. C. Spillman.

The best Tobacco for the pipe

OGDEN'S LIVERPOOL

Ogden's CUT PLUG

EASY TRICKS One Hundred

This is a figure puzzle that is not so well known as it should be. The problem is to arrange one digit in such a way that repeated four times it will equal one hundred.

The stunt is easily done and, fortunately, is easily remembered. Figure 1 shows how it is done. A second stunt is to arrange the nine digits in their order in such a manner that the total will be 100. Figure 2 shows how this is done. This stunt is particularly interesting because the digits must be used in their order. Several ways of doing this are possible if this is not required. Perhaps you can discover some of them.

(Clip this out and paste it, with other of the series, in a scrapbook.)

"The Call of Untrodden Ways."

"The Call of Untrodden Ways," recently issued by the Canadian National Parks Branch, is a spirited account of a summer outing in Jasper National Park in northern Alberta. The writer, Rev. G. D. Kilpatrick, of St. Andrew's Presbyterian Church, Ottawa, is a lover of the mountains and an advocate of the great outdoors. He has succeeded in conveying this spirit in a striking manner to the readers of this publication.

In form this booklet rises to the standpoint of excellence usually set by the National Parks Branch of the Department of the Interior in its publications. The cover design is striking and harmoniously blended in color. This delightful little booklet offers something different, in contrast to ordinary scenic descriptive literature. It leans towards the humanitarian and the spiritual, embodying in a marked degree the motive prompting National Parks inception.

The text deals not so much with the outstanding scenic features of this national reserve or the individual points of interest, as with the benefits that are to be obtained through direct association with nature. It is a splendid effort at bringing home to Canadians the realization that the wonders of their native land are lying unappreciated at their very doors.

The reader is taken on a trail trip through the mountains, and a vivid description is given of the beauties of the ever-changing panorama attending such a journey. The daily routine of the pack-train is set forth in a description that draws and holds interest and inspires a desire to participate in such an outing. Even the inclusion of a description of "one of the terrific, though brief, mountain storms adds to the wonder of the journey."

The illustrations are excellent as representing the primeval scenery of the unblazed trails in this, one of our greatest and most extensive wonderlands. The references to the flora and fauna will prove of great interest to all nature lovers.

Avoid loss when sending money by mail—Use Dominion Express Money Orders—the safe, convenient, inexpensive way.

Breathes Through Its Tail.

The young frog has a special breathing organ in its tail.

For Every Ill—Minard's Liniment.

Deceitful Appearances.

A judge of the Bombay Hill Court, who is pompous in manner and never forgets that he is a judge, was walking up and down the platform of a railway station, just before taking his seat in the train. At that moment a hot and perspiring Englishman rushed onto the platform, and said to the judge: "Is this the Bombay train?" The judge coldly remarked: "I am not the station master." The other man at once retorted: "Then confound you, sir, why do you swagger as if you were?"

When Egypt wore the crown of civilization, the Egyptians were frequent bathers; when Greece was the glory of the world, bathing was the glory of the Greeks; when all roads led to Rome all feet led to the Roman baths.

What Interested Percy.

The teacher had been lecturing his class on the wisdom often displayed by animals and birds. He compared it with that of human beings, to the latter's disadvantage. Having finished his discourse, he invited his pupils to ask questions on the subject. Percy held up his hand.

"Well, Percy," said the teacher, "what is it you want to know?"

"I want to know, sir," replied Percy, "what makes chickens know how big our eggcups are?"

For First Aid—Minard's Liniment.

Telling Him.

Harker—"My wife doesn't understand me. Does yours?"

Parker—"I don't think so. I've never heard her even mention your name!"

75 per cent. of the world's output of rubber is used in the manufacture of automobile tires and inner tubes.

No British dreadnought was sunk by torpedo in the Great War, and only one was seriously damaged by a mine.

Wembley's first new exhibit for next year's exhibition is a huge stuffed buffalo, the largest ever seen in this country, which recently arrived in London. It is for the Canadian Pavilion.

Strong Nerves

Pure organic phosphorus, known to most druggists as Bitro-Phosphate, is what nerve-exhausted, tired-out people must have to regain nerve force and energy. That's why it's guaranteed. Price \$1 per pkg. Arrow Chemical Co., 25 Front St. East, Toronto, Ont.

Cuticura Heals Pimples

On rising and retiring gently smear the pimples with Cuticura Ointment on end of the finger. Wash off the Ointment in five minutes with Cuticura Soap and hot water. Continue bathing for some minutes, using the Soap freely.

Sample sent free by mail. Address Canadian Importers, Cuticura, P. O. Box 2616, Montreal. Free Sample, Ontario and Quebec. Try our new Shaving Stick.

For Headache BAYER ASPIRIN

Proved safe by millions and prescribed by physicians for

- Headache Colds
- Pain Neuralgia
- Toothache Lumbago
- Neuritis Rheumatism

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark registered in Canada of Bayer Manufacturing of Monocetate-acid of Salicylic Acid (Acetylsalicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."
