WORRIES IN THE HOME

It is These That Cause Many a Breakdown in Health.

Almost every woman at the head of a home meets daily with little worries in her household affairs. They may be too small to notice an hour afterwards, but it is the same little worries that break down the health of so many women. Their effect may be noticed in nervous headaches, sickle appetite, indigestion, pains in the side or back, and a sallow complexion. To those afflicted in this way Dr. Williams' Pink Pills, by improving and purifying the blood, bring speedy relief. Among thousands of weak women who have tested and proved the merits of this medicine is Mrs. Gustave Hutt, Bruxelles, Man., who says:—"It is with profound thanks that I write to tell you what Dr. Williams' Pink Pills have done for me. Before I began taking these pills I was weak, and my blood thin and watery. I was so thin that I looked like a skeleton. I was troubled with headaches and indigestion, did not sleep well, and was terribly constipated. I decided to try Dr. Williams' Pink Pills and I soon found that they were just what I needed. Under their use my appetite returned, my food digested properly, and I slept better at night, and gained in flesh as well as strength. The result is that now I am a perfectly healthy woman, and there is no doubt that it is due to the use of Dr. Williams' Pink Pills, a supply of which I now always keep in the house, and I would advise other women to do the same."

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sir Walter Raleigh.

A braver soldier, a more daring explorer, or more courtly gentleman never lived than Walter Raleigh, knight and author.

You all know the story of his introduction to the Queen Elizabeth. She was walking with her courtiers from the royal barge, when she came to a place so damp and muddy that she hesitated as to where to step.

Raleigh immediately threw down his fine embroidered cloak for her majesty's dainty feet to step upon, and from that time, as long as she lived, the queen gave him her help and her esteem.

But he was something besides a gallant courtier. He proved himself a brave soldier on land and sea, in wars in the Netherlands and against the Spanish Armada. In his youth he crossed the Atlantic with his brother, the famous Sir Humphrey Gilbert, and he was the first to send ships out which visited our Virginian and North Carolina shores, from which two new strange plants were carried back for English use. These were tobacco and potatoes.

Having heard wonderful stories of the gold lands still further south, he sailed away to the far west, finding little gold, but a strange, rich country, of which he wrote a most glowing description on his return.

The queen, who had been so firm a friend to him, died, and in a change of rulers unjust suspicions were aroused. Sir Walter was charged with trying to place another person on the throne, tried and sentenced to death, but led, instead, to the prison where he spent twelve long years.

It was then he showed his brave heart as well as on the battle-field, and he renewed his old studies, planning and beginning the great work, which he never was to carry out: "The History of the World."

But his adventures were not yet over. Nowhere, in all the outside world, could they find the man they wanted, so they came to the busy scholar in his prison-cell and offered him his liberty if he would only command an expedition to search for gold mines in the far New World.

He went, of course, with the old vigor and daring, but gold-mines are not easily found, and they sailed back without having met with much success. And then what did the strong man do? Did he travel again over far seas, or give his wisdom to affairs of government, or even in his prison finish with ready pen the great volumes he had planned?

He died on the scaffold, under the old charge of treason so long proved false. He met death with the courage of that brave heart which had never failed him; leaving behind not only what he wrote, but the story of his whole brilliant life, so full of adventure and bravery.

Approximately twenty thousand elephants are killed annually for their ivory.

WE WANT CHURNING CREAM

We supply cans and pay express charges. We pay daily by express money orders, which can be cashed anywhere without any charge.

To obtain the top price, Cream must be free from bad flavors and contain not less than 30 per cent. Butter Fat.

EMULATING OLD-TIME INDIAN BRAVES

It is the Lachine Rapids, most spectacular and deadly of all the shallows in the long course of the St. Lawrence River. The river is beaten into a maze of cross currents and undercurrents, whirlpools and foam-laced rocks, peering with jagged teeth just flush with the sweep of the stream which here attains a speed of as high as twenty miles an hour. Looked at from the decks of the Canada Steamship Lines vessels that run these rapids daily, it seems as though no ship could live for a minute in those tormented waters. Yet subtle Indian pilots have long known them to be as safe as any placid stretch of the Lake St. Louis into which the St. Lawrence broadens and through which the ship has just passed. Indian and French-Canadian pilots know the passage of the Rapids is safe, but woe to the man who should attempt to run them without full knowledge of their treacherous depths and shallows. But the old-time spirit of the voyagers and discoverers is not dead today for in the past two months, though the river was swollen by spring freshets, two canoeists have actually dared the dangerous passage and have succeeded. One of them was a man from New York State; the other was a native Montrealer. Both were, of course, experts, and neither would probably try it again for any amount of money.

His Friend.

Paypees, paypees, latest edition, sir, Paypees, paypees, all about the murder!

I am not crying, Mickey, I've got a cold in my head;

Well, I guess you'd be crying, too, if your best friend was dead;

You didn't hear about it, you don't know about Tim?

He was hit by one of those big trucks, that was the last of him.

Paypees, paypees, (you know how bad I feel)

Paypees, paypees, all about the big steal!

Do you remember the hospital the time that I took sick, And Tim he sneaked out after me, gee! but he was quick;

You heard how he trailed that ambulance up to the very gate And when they wouldn't let him in, he just lay down to wait!

Paypees, paypees, (he got there just the same),

Paypees, paypees, all about the league game!

And then, how it came to happen no one could ever say, For somehow the door was open and Tim was on his way;

He made one dash to find me right to the very place,

With his dirty paws on the counterpane,—I can see that nurse's face!

Paypees, paypees, (gee, my bed was a sight!)

Paypees, paypees, all about the prize fight!

Some of them thought him horrid, though most of them found him sweet,

Still, rules is rules, so out he went, but he never left that street;

When I walked down the hospital steps after me clothes was bled, There was Tim a-wagging his dear old tail, I thought he would go wild.

If I could get that guy I'd only bring his neck!

Paypees, paypees, all about the wreck!

—Amy W. Eggleston.

Sunstroke and Heatstroke.

So many cases of prostration in animals come to our notice during the summer months that a word on this subject may not be out of place.

There are two types of stroke, sunstroke, and heatstroke. Sunstroke in horses is caused by the sun's rays striking the back of the head while the animal pulls a heavy load in the hot sun. It is also caused by leaving the horse standing in the hot sun, after heavy work. It comes on suddenly, the animal collapsing and usually becoming unconscious.

Prevention:—Keep a wet sponge on horse's head or bathe frequently with cold water. Give frequent rests in the shade, when possible. Remember the weather is hot and the horse feels it as much as you do. You lighten your work in the sun as much as possible in the hot weather. Do the same for your horse. Do not hurry or worry him, and help him fight the handicap of hot weather by being easy with him.

Treatment:—If the horse collapses, send for a veterinarian. In the meantime first aid treatment consists of wholesale use of cold water from head to foot. Do not apply a quantity locally, but make it wholesale. Keep it up till horse recovers.

Heatstroke may come on without animal having been touched by the sun. It is caused by standing in stables, when the atmosphere is close, humid and damp.

Prevention:—Keep the horse in the yard if stable is very small and close, only in a shady place. Give plenty of water to drink, and use cold water on head. Be sure it has a comfortable place to lie down. A night spent in the atmosphere of a small ill-ventilated stable, reeking of ammonia from lack of cleaning, utterly unfit the animal for work. It is better in the open.

Treatment:—Same as Sunstroke. Dogs and cats and small animals can be dipped in a tub of water. This is the best restorative.

The best remedial agent for hot weather is cold water, internal and external. Keep a tub where dogs may dip several times daily. It will prevent trouble.

"Handy" Hints.

Anybody who believes that character or future events can be "read" from the hand need not consult a professional palmist. Here are a few points on the subject.

If the first finger of the hand curves inward towards the second finger, it is a sign of a money-loving nature.

If the second joint of the thumb is thin, it denotes great tact; and if the first joint is long, it shows strength of will.

When the fingers are long and tapering, it may be taken that the person is of an artistic temperament; when they are square and stumpy, a practical nature is indicated.

When the line of life (at the base of the thumb) is long and thin, a long, healthy life may be expected. If the line is broken up, look for trouble and illness.

Short-hand in one of the arts that have never been lost. A system was practiced in Phoenicia before the Greeks existed as a people, and possibly also in Babylon.

One jet of gas will consume as much air as four adults.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

India Gave Calico Printing.

Indian is generally regarded as the birthplace of calico printing.

They'd Try to Believe.

Wife—"One should never repeat anything one doesn't believe."

Hubby—"What would you women do for gossip in that case?"

So Sudden.

Together they had broken the wishbone, and she held the longer piece.

"Now, what shall I wish for?" she mused. "Really, I can't think."

"Oh, wish for anything," he suggested brilliantly.

But still her brow wore a puckered frown.

"Oh, well, if it's as hard as that I'll wish for you," he said obligingly.

"Oh, John," she cried happily, "you really wish for me, dear? Then you can have me! This is so sudden!"

Metal railway sleepers have to be used in many parts of India. Wooden sleepers would be eaten by insects.

One person out of every fourteen of Canada's population now owns a motor-car.

The ORANGE PEKOE is extra good. Try it!

England's Glass Island.

The place for seeing tomato farms to the best advantage is the Channel Islands, especially Guernsey and Jersey. The writer had the privilege of going round two or three of the biggest of the growers' gardens there recently, and was amazed by what he saw.

You can easily understand this when you learn that on such a farm at Gorey there were no less than 70,000 tomato plants waiting to be transferred from the greenhouses, where they are first sown and grown, to the beds prepared for them in the open air. Just try to think of the immense amount of work such a task as setting out all these tomato plants must mean.

It is "a bit of a staggerer," too, to be told that the official returns of the railways show that 3,250,000 baskets of ripe tomatoes were exported to the British Isles from Guernsey alone last year.

A large portion of these supplies does not go to Covent Garden, London, but is sent direct to Manchester, Bristol, Leeds, Glasgow, and Preston, which are all distributing centres for their respective districts.

The tomato season in the Channel Islands goes through three separate phases. All the earliest crop is grown in a hot-house, and is "forced" just like rhubarb. It is planted just after Christmas, and the fruit can be picked from the end of March to the end of June. The second season, that of the cold-house, whilst the third or out-of-doors tomato crop is gathered from the end of August to December.

Tomato growing and export are perhaps the chief industries of the Channel Islands. The bulk of the people depend upon them in some way or other for their living. Much of the growing, too, is done by small farmers, or by working-men in their leisure hours.

Guernsey has sometimes been called "England's Glass Island," owing to the immense quantity of glass used there in the cultivation of the tomato. Look where you will from any high ground in Guernsey, a veritable "sea of glass" meets your eye, glistening like the smooth water of a lake lit up by the glaring sun. It has been estimated that there are at least nine hundred miles of glass in the island.

The quays are always brimming over with baskets, crates, and boxes bearing the names of dealers in fruit noted in various parts of the United Kingdom. It is on record that as many as 70,000 boxes of fruit of various kinds have been sent off by steamer in a single day from St. Peter Port.

Nero's Golden House.

The archaeological world is very much interested in the recent discovery in Rome of one end of Emperor Nero's "Golden House." After the burning of Rome Nero built the most expensive palace the world has ever known and it was known as "Domus Aurea." One end of the building was unearthed only a few years ago.

This building cost such an unheard-of sum that the historians of the period were unable to decide how much it did cost but the average guess approached what to-day would be equal to several billion dollars. In fact the British historians declare that it cost two billion pounds.

This enormous building stretched from the Palatine across the low ground to the Esquiline, thus linking and crowning two of the seven hills. On this building Nero allowed his fancy to run wild and reports say that it had one hundred thousand rooms, a tale easily believed when one considers the other big things done by the Romans. Scores of the rooms were paved with sheet gold studded with gems and hung with masterpieces of art. To defray the cost not only was Rome taxed to the utmost, but Greece and Asia were despoiled of their wealth. It is said that in time the entire walls of this wonderful building will be unearthed, but it is known that after the palace was in ruins the gold was carted away.

The temperature of the sea decreases as the depth increases. In the Pacific Ocean, for instance, when the temperature at the surface was 64 deg. F., at a depth of 2,662 feet it was 40.5 deg., a difference of 13.5 deg.

PIMPLES OVER FACE AND NECK

Itched and Burned Badly. Healed by Cuticura.

"My face started to itch and burn and then broke out with pimples that were hard, large and red. After a few days they festered and scaled over and were very sore. They itched and burned so badly that I used to scratch which caused them to spread all over my face and neck. My face was badly disfigured.

I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. After using it I purchased more and in about two weeks I was healed." (Signed) Miss Bertha Wilson, R. R. 2, Foresters Falls, Ont., Oct. 3, 1924.

Daily use of Cuticura Soap, Ointment and Talcum helps to prevent skin troubles.

Sample Book Free by Mail. Address: Cuticura, Dept. 100, P. O. Box 26, New York, N. Y. Cuticura Shaving Stick 25c.

WORKING GIRL'S EXPERIENCE

Read How She Found Help in Lydia E. Pinkham's Vegetable Compound

Arnprior, Ontario.—"I must write and tell you my experience with your medicine. I was working at the factory for three years and became so run-down that I used to take weak spells and would be at home at least one day each week. I was treated by the doctors for anemia, but it didn't seem to do me any good. I was told to take a rest, but was unable to, and kept on getting worse. I was troubled mostly with my periods. I would sometimes pass three months, and when it came it would last around two weeks, and I would have such painful times in my right side that I could hardly walk. I am only 19 years of age and weigh 119 pounds now, and before taking the Vegetable Compound I was only 104 pounds. I was sickly for two years and some of my friends told me about Lydia E. Pinkham's Vegetable Compound, and when I had taken a bottle of it I felt a change. My mother has been taking it for a different ailment and has found it very satisfactory. I was willing to tell friends about the medicine and to answer letters asking about it."—Miss HAZEL BERRY, Box 700, Arnprior, Ontario.

A day out each week shows in the pay envelope. If you are troubled with some weakness, indicated by a run-down condition, tired feelings, pains and irregularity, let Lydia E. Pinkham's Vegetable Compound help you.
