Solution of last week's puzz'e.

FARMS FLOODED BY RISE IN FRASER RIVER

Warm Weather Melts Mountain Snows Farmers Take to Boats.

A despatch from Vancouver says:-Rapidly rising during the day, the waters of the Fraser River late on Wednesday afternoon had risen to 20 feet 11/2 inches, a rise of 41/4 inches since 5 o'clock in the morning, according to the gauge at Mission, and with continued warm weather it is predicted that great damage is likely to occur on the low-lying parts of the Fraser at any hour: The danger mark at Mission is 20 feet. This depth always has been regarded as ominous and anything higher regarded as critical.

Thousands of acres are already inundated and many farmers have been driven from their homes. Others are driving live stock to safe high lands. With extremely warm weather prevailing throughout the interior of the province torrents of water are roaring down every mountain into the Fraser River gully. The heat is me'ting the snow and ice rapidly and no abatement of the flooding is in sight. The bulk of the torrent it is said, will take 36 to 48 hours to reach the Fra-

of His Birth.

the necessary authority awaiting her, wealth of Canada would be to wipe out the wheat rust, declared Dr. J. C. McLennan of Toronto, President of guine. According to class he chooses A despatch from New York says: - Saunders, originator of Marquis the subject to supply the blood for Sterling exchange approached within wheat, which, the President declared, New York to Chicago transfusion, and then he proceeds with one-half cent of dollar parity-\$4.86% had produced more wealth for this
