Experiences With Certain Varieties of Celery, Cabbage, Corn, Head Lettuce, Onions and Towatoes.

Variety tests were conducted at the Experimental Station for Southwest-POSTING OF VOTERS' LIST ern Ontario on the following: Cabbage, celery, head lettuce, onions and

Celery. + Eighteen strains and varieties of celery were listed and four-teen breeding lots transferred from the Ontario Agricultural College. The have complied with Section 10 of the conclusions reached were that in Voters' List Act, and that I have general the old strains of Paris Golden Self Blanching seem to be better adapted to muck soil conditions than the new strains except where cetery is grown for summer market and immediate sale. The new, more vigorous trains seemed to mature quickly, and when well blanched must be sold or they become pithy and therefore inferior.

The strains that proved superior were: Paris Golden Self-Blanching-Eberle; Paris Golden-Self-Blanching, Midgeley; Paris Golden Self-Blanching. Jerome B. Rice: Paris Golden Self-Blanching (new type), Vilmorin; East Blanching, Eberie. The last two strains mentioned seemed superior strains of the newer type. The first mentioned was good for summer cropping, the last as an easy blanching main crop celery.

Cabbage.—The new variety of cab-

bage, namely Golden Acre, was tested against such standard varieties as Copenhagen, Early Express and Early Jersey Wakefield. It was found that the variety is a round head cabbage and cuts at approximately the same season as Jersey Wakefield. The es. This series is entitled "Breezes plants mature very uniformly. However. a considerable variation in the strains from different seed firms was shown and the variety seems to have of hunting and outdoor yarns of the a tendency to split quickly after profirst water. A nature story of a ducing a marketable head. A variety more unusual nature for the maga- named Eberle's Wonderful did very

Corn.—Varieties of corn were test-H. R. Evans is a most graphic ac- ed as to season of ripening. Of the count of a young bear's first lone important varieties produced White Cory was nine days earlier than Golden Bantam, and Golden Bantam produced marketable ears seventeen days before either Stowell's Evergreen or Bantam Evergreen.

Head Lettuce.—In the head lettuce tests three varieties of the cabbage head type seemed well adapted for the district-namely, Iceberg, Nonpareil and New Yorker or Wonderful. lished monthly by W. J. Taylor Lim- The last mentioned proved to be a later strain of this type of lettuce. Miss Blanche McMahon of Tyrell, In the other head types the Way-

Business College, Waterford, has ac- muck soil. Of the varieties tested cepted a secretarial position with the Southport Yellow Globe and Yellow Hollinger Consolidated Gold Mines Globe Danvers seem best adapted Ltd., Timmins, at \$90 a month, mak- when early maturity and total yield ing four R. B. C. graduates to go is considered, to the locality. A strain to Northern Ontario at salaries of Spanish, did well for onions of this from \$90 to \$125 a month. Miss type. Under test at the Department Grace Coggins is now employed as of Horticulture at the Ontario Agricultural College, a variety of set onions, Ebenezer, proved most successful in the production of good, early, mature onions.

Tomatoes.—Some forty-five strains FARM STOCK & IMPLEMENTS or varieties of tomatoes were tested out for adaptability for the district. Of the standard varieties good The undersigned having sold his strains of Earliana seem best adapted variety Wayahead produced early fruit of good color and smoothness. For main crop for canning purposes John Baer and Bonney Best showed up well although two varieties, namers. old, ly Reeves' Seedling and New Red 1300 lbs.; grey man, 1200 lbs. and Head, gave excellent promise in this brown gelding, 9 yrs 1200 lbs. out in these tests. Varieties showed much variation when procured from milking; Holding cow, yrs., due on different sources. Most particularly Jan. 3; Holstein cow yrs., milking; in Bonny Best_some strains showed much superior to others. Breeding material was transferred

from the College to the Experimental u cam cow, yes., due Dec. 18th; Station and tests of the strains were made. Second generation crosses of heifer, 1 ya past; Durham steer, cucumbers were grown both of pickling and slicing types and promising form early strains will be found.

The most extensive work was done, however, in tomatoes of the John mouth Rocks; about 140 roosters and Baer-Earliana cross, "Canadian." Some seven hundred plants of this GRA:N-About 1000 bushels of variety were grown and individual records of each plant kept. Some thirty-five plant selections were made IMPLEMENTS, ETC. Massey from the plants of best type. A careful consideration of earliness, yield. color and smoothness was made. These progeny lots will be tested in 1925. As an early variety the "Canadian" did exceedingly well. The earliest plants produced fruit as early as Earliana and the quality and yield were much superior. It is expected that in the new test lots more unifor mearly strains will be found.

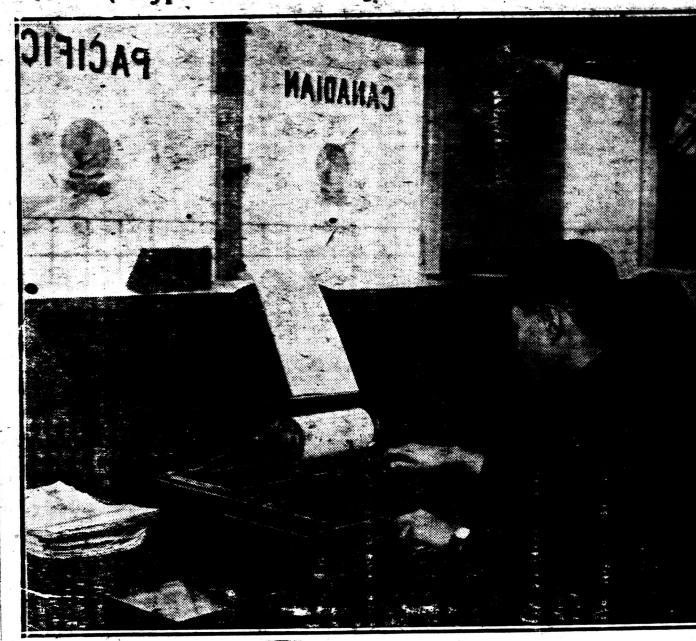

An experiment was conducted to shovels, chains and other articles too determine the relative value of manure and commercial fertilizer in cucumber and melon growing and whether or not, as good results could be obtained from the use of manure TERMS:—All sums of \$10 and un- along the row or in the hill, as when

credit on furnishing approved security; 5% discount for cash on crecrops, but that as good results ma. be obtained wher manure is placed along the row or in the hill as where it is broadcasted with a very great saving of manure.

> Free access to water or watering cows three times a day will increal the profits from winter dairying

Many people have an idea that sheep are hard to raise. They require no more care than other classes of stock. If farmers would give sheep the care and attention that they give She.. 25 other stock, few farms would be operating without them.
