THE HOME Beautiful

The Atmosphere Created by Tasteful Hangings and Beautiful Rugs Is the Result of Attention to Color-Harmony.

Your home does not need to be expensively furnished to be beautiful and home-like. The careful choosing of the draperies and rugs for your rooms — will make familiar scenes — seem new, they will add a touch of cheerfulness to the kitchen or a spirit of hospitality in the living-room.

At The Henry R. Crabb Stores you will find a wide range of Draperies and rugs at prices that make it possible to re-decorate your windows and new rugs for the floors at a very small cost. We will gladly help you with your drapery and rug problems.

- Curtain Scrims, Nets, Madras, etc., from 9c up to \$1.25

JARVIS COW TESTING ASS'N. FEEDING NEW CHICKS

(Continued from Page 1)
year, namely Jarvis and Caledonia. We believe that cow testing is the only means of permanent herd improvement and, considering the small cost to the dairyman as compared with the profits that will accrue from systematic cow testing, we are anxious to have a large number join the Jarvis Cow Testing Association. This is your opportunity. Take advantage of it, and order your testing equipment as promptly as possible. We hope to have the equipment distributed to the members of the Association in time for starting our Cow Testing work during the month of May. This will mean that the equipment must be delivered to the farmers before the 10th of May. Directions for sampling the milk, and other details, will be printed on a card which is attached to the lid of the milk can.

The Cow Testing Association is open for membership to any farmer who wishes to join regardless of what creamery they patronize. If interested, order your Cow Testing equipment by writing to C. C. Main, Agricultural Representative, Cayuga.

months; heifer Jersey-Holstein, 5 PIGS—Sow, 10 pigs, farrowed March 13 (1st litter); sow, 10 pigs, farrowed March 15 (3rd litter).

WM. E. HANN PROP.
Warren Jackson — Auctioneer

Many people do very well in rearing chicks by using the hopper method. The hopper method as compared to the six moist meals per day method, entails much less labor and with some people gives as good results. We have not been able to raise a high percentage of chicks on the hopper method but they do grow fairly well.

Method for Hopper Method.
Ground yellow corn (sweet and clean), 50 pounds.
Middlings, 45 pounds.
Brass, 5 pounds.
Fine oyster shell, 5 pounds.
Fine dry salt, 1 pound.
Boat soap, 1 lb. pounds.
Thoroughly mix—if not well mixed the salt may do more harm than good. To each 100 pounds of the mixture should be added one pint of Cod Liver Oil. It is well not to mix the oil in the feed too far in advance of feeding, one week is the limit. If the chicks have plenty of sunlight and tender green feed the Cod Liver Oil may be omitted.

We advise the use of oat alfalfa hay of good quality, as a litter in the brooder, it should be renewed in about a week or ten days.

Feed the man in boxes or troughs kept constantly before the chicks. Have plenty of boxes so that each chick gets a chance.

Feed each 100 chicks about three (Continued on Last Page)

This separator pays for itself from the cream it saves

If you are the thrifty farmer we think you are, you're going to write to-day and find out how you can save each week pounds of extra butter fat from your herd. You're not going to delay, for you want that saving to start immediately.

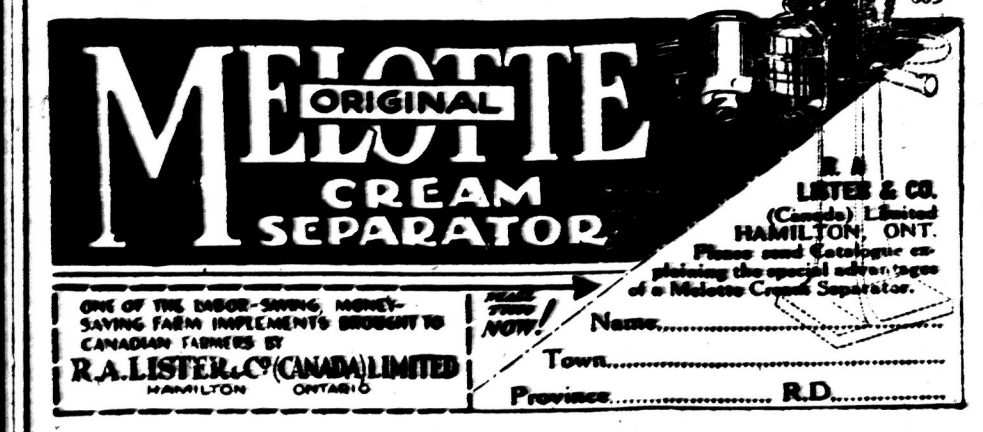

Probably right now, your old separator is waiting enough cream to pay for a Melotte in less than a year. Probably you can run your skim milk through a Melotte Separator and get quarts of rich cream out of it. Cream you are feeding the calves and pigs, which you might be selling in butter at 40c a pound.

That's the reason we want you to clip this coupon. It's going to save you money, not a little but a lot. Figure it out—the life of a Melotte Separator is at least fifteen years—and extra butter every week is going to count up into considerable money. So isn't it worth the investment of a two cent stamp to learn more about it? Certainly is!

The Melotte is the finest separator money can buy. It's been on the market for over forty-five years. Thousands of Canadian farmers will tell you it's the easiest to operate, it never gets out of order, and lasts a lifetime. One turn of the crank spins it for twenty-five minutes.

Take this very minute to mail attached coupon. You'll receive a booklet that tells why this separator skims extra cream every milking.

Write now. Don't delay. Find a pen this very second and fill out the coupon—at no obligation, of course.
