ANNUAL WALKER REUNION

Upwards of 150 persons gathered at Hickory Beach Park, Nanticoke, on Wednesday, August 11th, on the occasion of the 18th annual Walker picnic and reunion. After a sumptuous dinner, the bachelors challenged the married men to a game of soft ball. The teams proved to be very evenly matched and the game was closely COMPETITIONS—OATS contested. Three additional innings were required to break the tie, but in the end Cliff Walker led his team of the recent Standing Field Crop single men to victory by one run. An interesting program of sports and

> contests was then run off. A unique feature of this year's gathering occurred when the Chairman, Mr. J. Frank Walker, of Hamilton, was called to the front, and, after an appropriate address by Mr. John Walker, of Nanticoke, was presented EX-TEACHERS AND HIGH with a handsome gold-headed cane, suitably engraved, as a token of appreciation of his untiring efforts. NEW CHEVROLET HAS MORE POWER AND LESS VIBRATION

Heralded as "the Smoothest Chevrolet in Chevrolet History," the new Chevrolet has considerably more power and less vibration than previous models. The Chevrolet Motor Company of Canada announce many new refinements in the Chevrolet power plant and striking colors in the famous Duco Finish. It also announces an addition to the Chevrolet line of two attractive models—a Sport Touring and a Sport Roadster.

To render the Chevrolet motor still smoother the manufacturers have introduced a new design cam shaft in addition to the new light weight pistons of the skeleton type and the enclosed valve lifter and rocker arm assembly. The result is a flow of power which is smooth and effortless and equal to that of many multiple-cylinder cars.

In city traffic the Chevrolet gets away quickly and easily. In the country it rides comfortably over rough roads, speeds along the highways and sweeps up steep hills.

Those motorists who have associated annoying vibrations with the operation of four-cylinder cars will be agreeably surprised by the smooth performance of the new Chevrolet. In addition to the quieter engine, the Chevrolet has three-point motor suspension which greatly reduces the transmission of vibration through the frame to the body. Even at continued speeds of 40 to 50 miles an hour there is remarkable freedom from vi-

Body by Fisher and Duco finish are two features of Chevrolet which have contributed to its reputation for quality at low cost. Additional evidence of this quality is now found in the many refinements in all models. The closed cars have the one-piece windshield which acts as a cowl ventila-(Continued on Page 4)
