### CORRESPONDENTS

**RENTON**  
Misses Eleanor and Reva Minter motored to Hamilton one day last week.  
Mr. Arthur Secord attended a party near Chippewa one evening of last week.  
Mr. and Mrs. Wam Mills, near the half-way house, spent Sunday last with Mr. and Mrs. E. R. Tattersall.  
Mr. Paul Smith, our road boss on No. 6, Woodhouse, has been having the roads gravelled and widened out in some places.  
Mr. Sam McPherson returned home after visiting with friends in the following places: Brantford, Burford and Tillsonburg.  
Your correspondent wishes the Jarvis Record staff and all Record readers a Merry Xmas and a prosperous New Year.  
Ed.—Thanks, the same to you.

**ROCKFORD**  
Mr. and Mrs. George Anderson, of Waterford, spent Sunday afternoon with Mr. and Mrs. Martin Anderson.  
Mrs. Lampton, of Hamilton, is visiting her brother, Mr. Wm. Richards.  
Mr. and Mrs. Orvil Laffer, of Sovereign, Sask., are visiting at the home of the latter's parents, Mr. and Mrs. George Edwards. They will spend the winter in this vicinity.  
We regret the illness of Mrs. Frank Hamby at the home of her parents, Mr. and Mrs. W. Henning, Jarvis.  
Mr. and Mrs. Dalton Somers, Mr. and Mrs. Jas. Priest and Bud Priest attended the Township S. S. convention held at Wilsonville last Friday.

Do not fail to attend out Xmas Tree entertainment on Friday evening, Dec. 24th, beginning at 8 o'clock sharp. A varied program, concluding with a two-act play entitled "The Butlers," will be presented. You will enjoy the repeated dilemmas of the two butlers until all is made right on the closing scene.

**SANDUSK**  
Wishing all "Record" readers a real old fashioned Merry Christmas.  
The school concert on Tuesday evening was well attended and everyone had a good time.  
A number from here have been doing their Christmas shopping at Simcoe and Hamilton.

A red fox was shot by one of the members of the rabbit drive on Saturday, in this community.  
When his horses bolted in Jarvis last week, Mr. F. Sternman had the misfortune to be thrown from his wagon and have his right wrist broken. It was only last spring that Mr. Sternman had his right arm broken.

Cameron Nicol is visiting in Hamilton.  
Mr. Wm. Tyrell moved his kitchen from the old house last week.

Skating has been rather scarce on the creek so far on account of the poor condition of the ice, but we are hoping for better weather and better ice now, and then, of course, we will all skate.

Go to Holmes for Oriental and Tapestry Table Runners and Cushion Tops. A beautiful gift for mother and sister.

### RISE IN SUBSCRIPTION RATE FOR WEEKLIES JUSTIFIED

The actual cost of producing The New York Times is said to be 14 cents per copy. It sells for two cents per copy. The actual cost of producing The Saturday Evening Post is said to be around 50 cents per copy, and it sells for a nickel. But The Times advertising rate averages \$200 per column, and The Post rate is still higher. This accounts for the low subscription rates. Publishers would probably be astonished if they would figure out accurately the cost per copy of producing their papers. Country publishers must get a subscription rate that will somewhere cover the cost of production because their advertising rates, and the volume of advertising, are not large enough to absorb so large a proportion of loss.

Mr. Glass, piano tuner, is in Jarvis and district, making his usual rounds. Anyone wishing to get in touch with him call or phone The Record office.

### PACKING FARM BUTTER

The Best Way to Store Butter For Home Use

Keep the Cream Case Clean—How to Pasteurize the Cream—The Best Storing Packages—Use Care in Curing Alfalfa—Mating Pigeons.  
(Contributed by Ontario Department of Agriculture, Toronto.)

We have all heard the expression "The best is none too good." This applies especially to butter for storing. So says Miss Belle Miller of the Ontario Agricultural College. It is necessary to put away the very best, as no butter improves in storage.  
**Keep the Cream Case Clean.**  
The can in which the cream is collected should be clean and free from rust.

The cream should be good flavored and should be churned sweet, or with very little souring. A cream with high acidity will not make a long-keeping butter.

As pasteurized, cream butter will keep very much better than raw cream butter, it would pay to go to the extra trouble of pasteurizing the cream when the butter is going to be held for some time.

**How to Pasteurize.**  
To pasteurize, place the can of cream in a larger vessel containing hot water. Stir the cream gently until the temperature comes up to 170° F. Hold it at that temperature for at least ten minutes, then cool it quickly to a low temperature. Hold it cold for a few hours before churning it.

Churn at a temperature low enough to bring the butter in nice firm granules. Avoid overchurning. Wash the butter twice and salt in the usual way. Work the butter a little to mix in the salt, then let it stand in a suitable place for a few hours before finishing the working.

Have the butter of such firmness that it will stand sufficient working so that the salt will be evenly distributed, and that it will be close in body and not show water pockets.

**The Best Storing Packages.**  
As butter keeps best in large packages, crocks, tubs and boxes are used. The crocks should be in good condition, free from breaks in the glazing, and should be well scalded before using. Tubs and boxes should be coated with paraffine wax and lined with heavy parchment paper.

Put the butter in in small pieces, pack solidly, using a butter packer or a wooden potato masher. Pack each piece by working from the center outward. Pound well around the edges and in the corners so as to avoid having holes.

When the box is filled, level off the top and fold the ends of the paper over. If a tub or crock is used, place a circle of parchment paper on top. Make a paste by moistening some salt with a little cold water, and spread an even layer over the top of the package, then fasten down the lid.

**Further Packing and Storing Hints.**  
If using crocks it will be necessary to cover the lid with two or three ply of clean wrapping paper and tie it securely.

Butter to keep must be protected from air, light and heat, so after the packages have been made secure they must be placed in a clean, cool, dark place. The temperature should be low and even. Butter made in September is not subjected to heat like the June butter. Those who make butter in June for holding and have not a good place for keeping it would find it to their advantage to place it in a cold storage if there is one in the vicinity. The saving in quality would more than pay the storage fees.—Department of Extension, O. A. College, Guelph.

### Use Care in Curing Alfalfa

Alfalfa leaves, require careful handling if they are to be retained with the stalks in the harvesting of the hay.

Alfalfa, to be harvested properly, wants to be put up while it is still a trifle green, as it will retain the leaves in this state, pack closer in the mow and be a better and brighter color when fed.  
It is a common practice to cut the hay in the morning as soon as the dew is off, and then rake into bunches late in the afternoon after it has thoroughly wilted. Often alfalfa that is cut in the morning dries too fast and becomes brittle when cut this way, so that many growers favor the cutting of the hay late one afternoon and putting it up the next afternoon. This allows some of the moisture to go out gradually and gives better quality hay.

Although many times the first cutting is often discolored by moisture it is still valuable as feed, as experiments show that stock eat it as readily as the better grades.

In placing slightly green hay in mow see that it is spread carefully and that no large air spaces are left. Do not open mow when the hay is undergoing a heating process, and there will be little danger of spontaneous combustion or fire.

### Mating Pigeons

While breeding pens need not be mated until about three weeks before hatching is to begin, yet I mate my breeding pens in January. The hens in my breeding pens have been kept separate from the males since last fall, so I could mate them only ten days before beginning hatching, if necessary, but it is just as convenient for me to mate them early. Where more than ten hens are put in one pen, two male birds will be used on alternate days. There is an advantage in using two male birds in a pen, as quite often a hen refuses to mate with one male, while this very rarely happens in a pen where two males are used.
