

## CAMPAIGN LAUNCHED TO DEPORT ALIENS WHO ARE ILLEGALLY IN UNITED STATES

Canadians Arrested by Detroit Office of Immigration Bureau for Non-payment of Head Tax and Passport Fee.

A despatch from Detroit says:—An intensive campaign to round up and deport aliens who have entered this country without observing the required formalities, with reference to Canadians, has been launched by the Detroit office of the United States Immigration Bureau.

Twenty-five women, most of them of Canadian birth, have been arrested this week, and are being held at police headquarters on charges of violating the immigration law.

Eighty deportation warrants for both men and women have been obtained in the last month, and by June 1 the whereabouts of about 500 Canadian citizens who are illegally in Detroit will be more or less definitely known, according to Alexander M. Doig, Chief Immigration Inspector for Detroit.

Doig said the arrests were being made on information given his office by other Canadians living in Detroit. He detailed a squad of immigration inspectors to question the women held at police headquarters.

"We are making this immediate examination so that those who are legally in the country may be released as soon as possible," Doig said. "Where we find the law has been violated, it is our custom to release the violator on bond of \$500 and immediately begin deportation proceedings."

"It is surprising that Canadians, who can enter this country as non-quota aliens upon payment of the \$3 head tax and the \$10 fee for a passport visa and by submitting to an examination when they enter, should seek to enter the United States illegally. This drive, we hope, will result in teaching prospective immigrants the advisability of entering legally. If they do not enter legally they can never become citizens and they are always subject to deportation. However, they may apply for admission to the United States a year after they have been deported."

### URGE TEN-CENT TARIFF ON U.S. MAGAZINES

Publishers Allege Canadian Manufacturers Are Suffering From Unfair Competition.

A despatch from Ottawa says:—Pointing out that Canadian manufacturers were suffering from competition of manufacturers in the United States who were able to reach the Canadian consumers with their advertisements admitted free into this country in periodicals and week-end newspapers, and who, not having any business establishment in this country, did not have to pay taxes in Canada, a delegation from the Magazine Publishing Association of Canada interviewed Premier W. L. Mackenzie King, members of the Cabinet and Leaders of the Conservative and Progressive parties.

As a solution of this problem the delegation suggested the imposing of a tariff of 10 cents a pound on all periodicals and week-end magazines entering Canada.

This tariff, they pointed out, would equal the existing tariff of 15 cents a pound on all advertisements entering the country under any other guise than publications. The present tariff is also subject to a 2½ cent ad valorem service tax. The proposed tariff would, the delegation claimed, equal the percentage of advertising matter carried in incoming publications.

Figures produced by the delegation indicated that an average of 40,000,000 copies of United States magazines entered Canada yearly and approximately 15,000,000 copies of United States week-end newspapers. If taxed as suggested the revenue to the Government would approximate \$5,000,000 yearly on the present circulation of imported publications.

The Canadian publishing trade was also suffering from outside competition, the delegation pointed out, by being subjected to heavy taxation on both material and general business. It was suggested that the proposed tariff would assist in checking the influx of obnoxious foreign publications.

### PLAN PRESERVATION OF NIAGARA FALLS

Canadian Delegation Meets Americans in Conference at Washington

A despatch from Washington says:—Preservation of Niagara Falls, including methods to prevent enlargement of its notch, was taken up at a conference on Thursday between Canadian and United States Federal officials at the State Dept. here. Hon. Charles Stewart, Dominion Minister of the Interior, headed the Canadian group.

Secretary Herbert Hoover of the United States Dept. of Commerce, who declared in a recent address at Chicago that if steps were not taken to prevent breaking of the escarpment at the Falls, Niagara would become a great rapids instead of a gigantic waterfall, led the representatives of this country. J. T. Johnston, Director and Chief Engineer of the Canadian Interior Dept., and Dr. O. D. Skelton, Under Secretary of State for External Affairs, were also on the Canadian delegation.

### Col. John Coolidge Passes Away at Plymouth

A despatch from Plymouth, Vt., says:—Col. John C. Coolidge, father of the President, died on Thursday. Within two weeks of his 81st birthday, Col. John had been sinking gradually since he suffered a severe heart attack a week ago.

A remarkable physique, coupled with an iron will, carried the aged patient through to a new rally for life, but he lost strength day by day. Another severe heart attack early on Thursday heralded the approaching end.

The President, speeding northward on a special train to the bedside of his dying father, lost in a hopeless race with death.

### 3,500 NEW SETTLERS ARRIVE AT WINNIPEG

One of the Special Trains, An All-Men Train, First of its Kind Since War.

A despatch from Winnipeg says:—A solid phalanx of nearly 3,500 immigrant settlers have reached Winnipeg during the past 36 hours for distribution throughout the Western provinces.

A steady stream of newcomers poured into the city by special trains on Thursday, one of which, an all-men train, was the first of its kind since the war. By evening a total of nearly 2,000 "new Canadians" had reached the city, a new day's record in Canada's colonization history.

The first contingent was exclusively composed of immigrants from Central Europe. Later arrivals included Britishers, French, Scandinavians, Ukrainians and Poles. Every member of the men's special were brought from the farms of Hungary. They will proceed to jobs previously obtained for them.

Westbound trains carry their quota nearer their ultimate destinations. On Thursday afternoon 285 settlers were booked for Edmonton.

### Prince of Wales Plans Own Home

A despatch from London says:—The Prince of Wales soon will have a new residence in London, Marlborough House, and he is personally directing the work of its preparation for his occupancy. As soon as the work has begun he went over the plans himself and made several radical changes.

The Prince told the contractors that he would visit the place every few days, and ordered that he be informed of any changes made in the present plans. He has asked his mother, Queen Mary, to select the decorations for his new residence, and this Her Majesty has agreed to do.

### LOCKOUT IS AVERTED IN ENGINEERING TRADE

Machinists in Britain, Who Defied Union, Agree to Return to Work.

A despatch from London says:—The engineering world of Great Britain was greatly relieved on Thursday by the termination of the threat of a nation-wide lockout in the engineering trades, which had been carried into effect as planned by the employers, might have involved 1,000,000 men in 47 unions.

The lockout was averted when 900 machinists employed by the Hoe Co., makers of printing presses, whose unofficial strike had caused the lockout notices to be posted, agreed to resume work Monday.

### Inventive Man Active in the Last 25 Years

In the last twenty-five years, man has outstripped all other periods in the number and kind of his inventions and their practical application, says Popular Mechanics.

A quarter of a century ago, no one had heard of a radio, submarines, war tanks, machine guns, airplanes, and wireless telephones as articles of almost daily service. The world then was doubting Marconi and the little group of men who believed in radio, while experimenters with airplanes were tolerated as amusing "cranks."

Today, the roar of the mail planes daily is heard over the route of the old Pony Express, armies of the world fight in the air, and it is becoming the great highway for peace-time travel and shipping.

Important applications and changes have been made in old inventions. The reaper, for instance, was known nearly a century ago, but only in the last twenty-five years has it been combined with the threshing machine, pictures, relaying photographs by radio, the use of radium and the X-ray, are achievements of the present century.

### EIGHT SURVIVORS OF SHARPSHOOTER TROOP

Rescue Column Pick Up Remnant of French and Senegalese.

A despatch from Paris says:—After a day and night of terror, hair-breadth escapes from the Druses, and fighting, the eight survivors of a company of French and Senegalese sharpshooters have been picked up by a rescue column.

The company was trapped on the heights of Nedcha, the day before yesterday, and after hours of fighting attempted to escape during the night. Dragging their wounded, they struck out across country. But having only just landed in Syria they lost their way and wandered into a strong force of Druses. All were killed except eight, who survived in the broken ground until the rescuers came up.

### British Airman Finishes Flight of 16,000 Miles

A despatch from Croydon, Eng., says:—Alan J. Coghnam, British aviator, arrived at the air field here on Friday, completing his sensational 16,000-mile round trip flight to Capetown, South Africa.

The aviator was escorted into Croydon Flying Field by a fleet of planes which went out to meet him, in one of which Mrs. Coghnam, a passenger. Coghnam completed his long journey by flying from Lyons by way of Paris.

He arrived here on the fifteenth day after leaving Capetown, beating the steamer Windsor Castle, which left Capetown the same day with, which he was racing. The former is due at Southampton Monday.

### King George Goes to Windsor Instead of Mediterranean

A despatch from London says:—King George's health is so good that he will not spend Easter in the Mediterranean as he did last year. He will go to Windsor with Queen Mary for Easter, and probably stay there during April.

Taking Orders.  
Mrs. Henneck "Just put this parcel under your arm, James."  
Mr. Henneck "Yes, my dear, right or left arm?"

### Movable Glass Eye Made to Do Everything But See

A despatch from Berlin says:—Movable glass eyes, which are hard to distinguish from normal eyes because they are subject to the control of optic muscles, have been successfully fitted by Dr. Carl Mueller, of Jena, noted artificial eye specialist.

Dr. Mueller found that in 90 out of 100 cases of the loss of an eye the muscle and nerves controlling the movement of the eye were unimpaired. He said he fastens connective muscle tissue of animals to a glass eye and grafts these tissues onto the remnants of the human eye muscles. The extremely delicate operation requires about an hour, and he has been successful in from 80 to 90 per cent. of his cases. Success depends to a large extent, he asserted, upon the condition of the eye socket after the loss of the eye.

### When the Neighbors Helped.

In an old-fashioned town where they still adhere to the Wednesday night prayer and praise meeting, an official of the Children's Aid Society was in quite a dilemma. That afternoon the Magistrate had committed a young delinquent to the Industrial School and the Children's Aid man had agreed to keep him in his house overnight and start on the early morning train. He wanted to attend the prayer meeting and, to make sure of the boy, decided to take him along.

When they arrived, the members enquired who the strange youth was and they all became greatly interested in his case.

Finally the pastor said, "We must make this boy the special object of our prayers." It naturally followed that they all became deeply concerned about the lad's welfare. Several ladies wanted him to dinner, to supper, for a visit, etc., and they decided to wait on the Magistrate in a body and request that sentence be deferred.

This was agreed to and the result was that the boy never got to the Reform School. He made so many friends and learned to think so highly of himself in consequence, that he applied himself earnestly to work and study and is now a steady, reliable young man.

### Prince of Wales Plans Holiday in South of France

A despatch from London says:—The Prince of Wales, The Westminster Gazette announces, has decided to take a short holiday on the Continent early in April. The newspaper says that, according to the Prince's secretary, his plans are not yet fixed, but he has no engagements from Easter until April 20. The Prince's holiday, about a fortnight, is likely to be spent somewhere in the South of France.

### Dowager Queen of Denmark Suffers from Pneumonia
