### TOO LITTLE BLOOD

Everyday Ailments of Life.

Too little blood-that is what makes men and women look pale and sallow and feel languid. That is what makes them drag along, always fired, never real hungry, unable to digest their food, breathless after even slight exertion, and often feeling that life is scarcely worth living. The doctors tell them they are anaemic- the plain English being too little blood.

More weak, anaemic people have been made strong, energetic and cheerful by taking Dr. Williams' Pink Pills than by any other means. The case of Mrs. A. P. Foster, Bowden, Alta., is excellent proof of this statement. Mrs. Foster says: - "Some years ago I was very badly run-down. My doctor attended me for several months and then told me I had better go South to spend the winter as my blood was, so poor that he feared I would not stand the cold of our winter. I took his advice and went to my mother's, and as soon as she saw me she said, "Dr. Williams' Pink Pills are what you need." She got the pills for me and I began taking them. I had intended staying three months, but at the end of the second menth I came. home a well woman. When the doctor saw me he said. While you are deciding whether to rick it or not, you might like to hear about a young French soldier in the spring of 1917 who played well the two parts of gentleman and a success.

It was a bad time on the French front. A colonel of infantry appeared one night down in the trenches, and, confronting a little group of a dozen soldiers in one of the quieter parts of the line, he called for a volunteer for a task of desperate character. "He will not come back; absolutely not," said the officer. "But I call for a vol-

Three French soldiers dragged themselves to their feet and saluted. "I asked for one man," said the colonel, very gravely.

No one of the three budged. "Padre," said the officer to a Red Cross man who was present, an American,-"I will not decide this. You
