GORDON LAPP ADDRESSES LARGE AUDIENCE THURSDAY

Gordon Lapp, Ontario's representative to the World Conference of Youth, was welcomed by an appreciative audience of two hundred people at the Haldimand County Young People's Rally in the United Church, Hagersville, on Thursday, October 21st.

His subject was World Brotherhood as it had been interpreted at that great World Y. M. C. A. camp, which was held in Helsingfors, Finland, last August, when 1500 hundred people, representing every race and color and from 48 different nations, met at a round table conference in the common search for Truth.

The delegates were divided into groups of about 30 and so far as possible not more than two from any one country in each group. In the evenings addresses from such world figures as John R. Mott, Dr. Poole and others were given, but it was during the day when the Englishman discussed with the Chinese, the German with the Canadian, and the Turk with the Greek, etc., such subjects as World Brotherhood, the League of Nations, Home Relations, and the Jesus Way, that the real object of the camp was accomplished. It was in this way that each came to understand problems from the other fellow's point of view.

For instance, the white people came to see that the Great National Powers had taken unjust advantage of the yellow people in trade agreements and in the civil and criminal courts, etc.

Mr. Lapp described very vividly the closing scene of that week in camp. On the large football field just outside the conference church, a great fire, known as the Fire of International Friendship, had been kindled. It was with 12,000 spectators on the banks of this natural stadium that each country took their place around this enormous fire singing their national anthem, significant of the fact that each country had a contribution to make towards the Brotherhood of Man. On one side stood the church, on the other a beautiful school, reminding them that each of these institutions had already made a great contribution and ever will share all the blessing and message of "Peace on earth, good will toward men."

It was in this wonderful spirit of friendship and fellowship around this closing campfire that there came to each one the thought, that the great work for them to do as they returned to their respective countries was to endeavor to tear down all barriers, such as war, brute force in settling international disputes, hatred, racial differences, and substitute the principles and ideals of Jesus.

The heat required to make portland cement is greater by many hundreds of degrees than that of the molten lava in the craters of Hawaii's volcanoes.
