ROGERS PATENTLESS
RADIO RECEIVING SETS

in your home we will tune in

No Batteries. The Rogers operates direct from any light socket on any alternating current. No chemicals; no charger; no attachments. You "Just Plug In—Then Tune In".

No Aerial. In most homes the Rogers will function without any aerial *whatever*, either outside or built-in loop—and with less disturbance than when an aerial is used.

And from the time you first pull the light cord that turns on the current—from that time on, you have *uniform, everlasting power*. No run-down batteries to replace and re-wire; no mediocre reception from weak batteries; no noises from fading batteries; no expense; no bother.

Free Demonstration
Added to the above are a dozen other points of advantage that combine to make the Rogers the one set that can give you all you hoped for in a Radio. If you are prepared to purchase a Rogers, providing it meets your expectations in every respect, we will install one in your home free of charge. If you are entirely satisfied—payment can be made in cash or spread over three to twelve months for a slight charge.
