In no trouble is delay or neglect more dangerous than in anaemia-thin, watery blood. It is very common in young girls and in persons who are verworked or confined within deore ad before the trouble is recognized. But taken in time the tonic treatment through the use of Dr. Williams' Pink Pills, so enriches the blood that good health and strength is speedily regained. The correction of anaemic conditions by Dr. Williams' Pink Pills

as certain as anything can be. Miss Peresa Heafey, Dunraven, Que., is one of the many anaemic sufferers who has found new health through the use moisture. of this medicine. She says:—"I cansot express too warmly my thanks for what Dr. Williams' Pink Pills have done for me. I was suffering from a badly run-down condition. was yery nervous, had little desire for food, and would feel tired out at the least exertion. In this condition I and before using them very long found my health gradually improving, and under their continued use was ompletely restored. For this reason earnestly advise all weak girls to take these pills, feeling sure that they will do for others what they did for

Send your name and address to The Dr. Williams' Medicine Co., Brockwille, Ont., and they will mail you free a useful little book on "Building Up the Blood." The pills can be obtained through any druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Justifies Italy's Destiny in Albania

"Insincere nonsense" is the label vapor from its leaves given by John Carter, writing in the methods have no more to do with it roundings? than have those of his predecessors One thing that may cause an other-money enough to travel is shrewd at the Italian Foreign Office, and that wise healthy tree to die is regrading enough. if there is danger of another war n the land. If the ground near an old must be made by that eminently paci- inches it changes the amount of air club." "Who outspoke you?" as the inhabitants of the Kingdom of the the amount and character of the mic-Serbs. Croats, and Slovenes.

Italy as is orea to Japan, Belgium to the difficulty may be avoided. An-Great Britain, or Panama to the other cause of trees dying is the cut-United States. Albania dominates ting off o ftheir roots when curbs are the Italian naval and commercial laid, or the laying of pavement, which communications between the east and has an impervious surface, over their est coasts of Italy. The Albanian roots, which cuts off both the air and of Valona can be made into a water supply.—(Carpenter, in "Arts naval fortress capable of sealing the and Decoration. Strait of Otranto, there only sixty miles wide to all save submarines."

Mr. Carter points out that owing to the inexorable facts of geography writes: "This has been conceded by every great power in Europe and every dispassionate student of politics in the world. The sole question which confronts the world and Italy is the method to be employed in assuring her strategic safety in Albania. A foothold has been peaceably won and is in course of being consolidated in I could cut the lawn that way."the face of the bitter hostility of the Christian Evangelist. A tablespoonful be because the disgruntled Slavs in or so of the syrup stirred into a glass sist on it ,not because Italy desires of cold milk makes a delicious and

The Feeding and Protection

that they are one thing at least which Not Corrected Serious Results can safely be left to nature, require limost as much attention and care to obtain a maximum growth as flowers. Trees that are planted under optimum conditions, and properly fed and watered, more than repay the care and attention given them, and are much more able to withstand insect. It makes its approach in so stealthy which have been neglected and whose manner that it is often well develop vitality in consequence is considerably lessened.

Trees can only take their nourish ment in the form of liquid or gases. The placing of a fertilizer on the soil does not mean that the tree absorbs nourishment from it in the same manner that we should obtain nourishment from, say, a beefsteak The ingredients in the fertilizer become available only when dissolved in

In order to obtain the best results from the feeding of trees, it is well to remember that the fine root hairs which absorb the nourishment from the soil are not near the trunk, but are at the ends of the root system. This system invariably extends in the ground slightly further than the branches extend in the air, therefore the fertilizer must be placed in an accessible position. An imaginary circle should be drawn on the ground under the outermost edges of the branches and a number of holes bored with a crowbar to a depth of eighteen inches, about two feet apart. A handful of the fertilizer should be put down each hole, and the hole covered with turf. Water should then be allowed to run on the soil for eight or ten hours at a stretch. During hot dry summers trees should be watered for this period every two weeks, irrespective of whether or not they have been fertilized.

Trees can become satiated with food. When this occurs a tree tends to protect itself by a simple sweating or giving off to the air of an aqueous

In the actual planting of trees the July 2nd issue of The Independent to points which must receive considerathe current talk regarding Italy's im- tion are their natural habitat, their perialism in Albania. "The plain fact soil preferences: loam, sandy, rocky, of the matter is," says Mr. Carter, clay, gravel, etc., the proper degree preferred, "all kinds has dere merits." "that in securing a paramount influ- of soil acidity, alkalinity or neutrality, De white ones is de easiest to find in ence over the country across the their exposure (some trees prefer de dark; but de black ones is de Strait of Otranto, Italy is but obeying windswept hills, others low-lying shell easiest to hide after you gets 'em." the ion laws or her national necessitered spots, etc.), and the question: ties, that Mussolini's personality and will the color harmonize with the sur-

robe life which has been functioning Anyone who examines a map will there for the benefit of the plant send the dishes to the laundry and see that Albania is as necessary to roots. If liberal aeration is provided the house to the cleaner?

"Awnings for the porch are even guard to prevent these troubles, or if it would appear. Among the newer ones the opened sided awning, hung

I have always argued that there is only one sense in which the idea of progress has any meaning-in the sense of plumbing and its equivalents. Tested by its plumbing and by analogous tests India is in a sad state. But when I closed Catherine Mayo's "Mother India" I began to reflect on certain criticisms of our own cherished Western civilization which I have heard, not from disgruntled Indian agitators, but from sensitive and intelligent men and women who were able to view the situation in perspective. The drunkenness of Glasgow on a Saturday night, the slums of Manchester, the waste of public revenue on unproductive expenditure, the system of primogeniture, the existence in the British Isles of a class of permanently unemployedthese are phenomena which might well prompt a writer from Mars or even from the continent of Europe, to write a book about "Mother England" which would be as true and as untrue the Indians, like other nations, have a way.-(Ernest Boyd in The Independent).
