Here and There

S. Janowski and E. Stanhauer, the former Polish immigration delegate and the latter a delegate from the Polish Minister of Agriculture, are in Canada for a six-week study of farming conditions in western sections of the Dominion. They will also look into the distribution of work among the Polish colonies in Canada.

Four fishermen from the United States went fishing on the Caine River, New Brunswick, for 13 days recently, and caught 340 fish. State Senator Bradford, of Indiana, caught a 48-inch salmon weighing 27 pounds. Others in the party were: Fred N. Peet, Dr. E. R. Zimmerman and D. H. Faxon. Only barbless hooks were used so that no fish were either killed or injured.

The second largest outdoor swimming pool in Canada has been opened at Lake Louise on the Terrace between the dining room of the Chateau and the Lake. The new pool is 100 feet long and 40 feet wide. It is surrounded by tall concrete columns between which there are gigantic sheets of plate glass, providing a wind break against cool breezes.

Approximately 120,000 live fish, fresh from American hatcheries, passed through Dominion Express Yards, Windsor Station, Montreal, recently, on their way to Beauharnois, Quebec. They will be used to stock private lakes in northern Quebec owned by wealthy citizens of the U.S.A., who prefer the virgin hills and forests of Canada to the densely populated summer resorts of their own country.

Norman E. Wilkinson, London, England, inventor of camouflage paintings which was used extensively during the late war, arrived in Canada on the Canadian Pacific liner "Montcalm" with his wife recently, for a tour of the Dominion. Sir Clifford Sifton, prominent Torontoian, and Sir Steptoe Prutton, M.I.M.E., famous mineral geologist, also arrived on the same vessel.

Col. C. H. D. Ryder, C.B., C.I.E., D.S.O., chairman of the Air Survey Company of London, England, interviewed Premier Mackenzie King and the prime ministers of the various provinces with regard to finding out the prospects of surveying practically the whole of the Dominion by air. He also wishes to know about the possibility of combined federal and provincial action for these surveys.

On his return from a recent tour of inspection of the Company's Western Lines, Grant Hall, Vice-President of the Canadian Pacific Railway, stated that exports to the Orient in the form of grain, flour, dressed meats and motor cars were steadily increasing in volume and that trade with Australia had been considerably stimulated by the trade arrangements with that Dominion. Mr. Hall added that conditions were good in the West. The mining industry in British Columbia showed up well, while lumber shipments were heavier than last year.

All roads led to Windsor Station, Montreal, for three days prior to the opening of the tenth annual international Kiwanis convention, which opened on June 6. Not only was the C.P.R. station the gateway through which an army of Kiwanians passed into Montreal, but, every one of the delegates, their wives and friends, about 7,000 in all, congregated there as the station had been constituted registration headquarters of the convention. A force of 32 stenographers was specially engaged to handle the work.

Here and There

The total attendance at the Toronto Exhibition this year was 1,870,000, or an increase of 277,000 over 1925.

The Saint John Board of Harbor Commissioners is now busy working on plans for more adequate port facilities and estimating costs of new wharves, grain elevators and everything necessary to handle a larger flow of business.

The establishment of a "Faculty of Fisheries" at Dalhousie University at Halifax is under consideration. If this course is added to the curriculum, it will be the first time in the history of this continent that lectures on fisheries will have been delivered as a college course.

As a latest development of the Canada-West Indies treaty, ice cream is now being shipped from Halifax to British Guiana in liquid form and re-frozen at its destination. On the other hand, ice cream shipped to Bermuda is shipped in blocks and kept solid throughout the journey.

Application has been made to the Vancouver Board of Harbor Commissioners for the right to drill along the shore of Stanley Park and across First Narrows with a view to building a tunnel under the entrance to the harbor. The backers of the project estimate its cost at \$4,000,000.

A saving of forty-eight hours was effected in the transport of trans-Atlantic mail to the city when bundles were taken from the Canadian Pacific "Empress of Australia" at Rimouski and conveyed by plane to Montreal. Experiments are considered to have been successful, and it is understood a future development will extend the flying service to Toronto.

Though the crop season is late, reports received by the transportation department of the Canadian Pacific Railway are most satisfactory, insofar as yield per acre is concerned. From many points in Saskatchewan word comes that wheat threshed out from 25 to 35 bushels per acre, while in Alberta the yield runs from 25 to 45 bushels per acre.

F. W. Swindells, a wealthy Connecticut manufacturer, is developing a model farm at Princeport, or the Midland division of the Dominion Atlantic Railway, twelve miles from here. This farm contains 400 acres under cultivation and 50 acres of woodland, ideally situated on the summit of a hill overlooking the upper part of Cobeguid Bay and valleys of cascading beauty. His Guernsey herd consists of 50 purebred milk cows. His barns are on the Danish dairy plan and are said to be the best in the province.

It is announced that the 2,000,000-bushel elevator at Midland, Ontario, erected by James Playfair and his associates has been completed, and that the Canadian Pacific Railway is to proceed with the construction of seven miles of line directly connecting the elevator at Midland and joining up its main line through Port McNicoll to Montreal. The immediate result, it is believed, will be that the largest shipping point on the eastern lakes will have direct connection with Saint John, and have the effect of greatly increasing the traffic through that port.
