"All tell you why I'm going to buy a Westinghouse"

"Looking back over the past 25 years, I found less than 20% of all automobile manufacturers have stood the test of time and are in business today.

The radio industry is undergoing an identical process of elimination and I'm going to buy my radio from a manufacturer with many years' experience, unlimited resources and assured permanence in the business.

Westinghouse built the electrical apparatus that provides the profits for our business by keeping our machinery working year in and year out. They are pioneers in the business and have a wonderful reputation to maintain. They take no chances. Our company doesn't either—and neither will I—so you'll hear the latest Westinghouse model the next time you come up to the house."

Making the Canadian Dollar Go Farther than Ever Before

IN the purchase of the common commodities of life, the Canadian dollar has decreased in value during the past decade.

But, in the purchase of an automobile, the dollar is now worth one hundred to two hundred per cent more than it was seven to ten years ago—is worth more, in fact, than ever before in history.

While constantly raising the quality standard of its products, General Motors of Canada has increased the purchasing power of the Canadian car-buyer's dollar.

- ... by the economies of volume purchasing and production,
- ... by the close co-ordination of resources and facilities,
- ... by improved labor- and time-saving methods of manufacture,
- ... by sharing with Canada the savings effected by increased production.

In quality and in value, the Canadian dollar now goes farther than ever before in the purchase of a General Motors car.
