and out. In some places this steel is one-eighth of an inch thick; in others, such as near engines and such vital spots she has three-sixteenths of an inch protection.

"Her designer, George E. Gamble, says: "The machine gun is not yet built that will puncture the steel in this boat. I know, because I've tried it. I expect to build half a dozen boats just like this one before I get through — build them for the same man, and each one a little better than the last:

"In appearance this boat looks not unlike the subchasers used during the war. She has a pilot house of steel with windows made of bullet-proof glass. She has a sharp bow for cleaving her way through water, a broad and roomy stern and a flat bottom: When loaded she will not be high enough out of the water to make much of a target.

"There are manholes cut in her steel hatches for the crew, and these manholes can be clamped from above or below decks. Also the steel hatches can be raised so as to afford front and rear protection to the pilot house and its occupants. Her 42-mile speed is considerable protection, too. None of the rum-chasers on the lakes are so fast; few of them can make more than 32 miles an hour. It is said."

AND WHEREAS the continued shipment of liquor from the Dominion of Canada to the United States of America contrary to the laws of the United States of America may cause unfriendly relations between these two nations.

BE IT THEREFORE RESOLVED that we, the Prohibition Union of the County of Norfolk, The Women's Christian Temperance Union of the County of Norfolk and The Ministerial Association of Norfolk County, in joint meeting at the Town of Simcoe, this 20th day of April, 1928, hereby protest against shipments of liquor being permitted to be sent from the port of Port Dover in the County of Norfolk and the Province of Ontario that are apparently intended for entry into the United States of America contrary to the laws of the United States of America and that we call upon the Government of Canada to prevent such shipments.

AND BE IT FURTHER RESOLVED that a copy of this resolution be forwarded to the Prime Minister of Canada, the leaders of the various parties in the Dominion House of Commons, the Minister of National Revenue, the Dominion Representative for the County of Norfolk, and the Press.

Signed on behalf of the joint conference,

Mrs. J. Alex. Wallace,  
 Secretary.

Simcoe, Ontario,  
 April 20th, 1928.

### Here and There

(50)  
 Victoria. — The area of forest land in British Columbia dedicated to future forest production is 5,860,000 acres, according to a Government report.

Calgary. — Plans are actively under way by the Calgary Terminal Grain Company to build a seven hundred thousand bushel elevator at Vancouver. It is announced by A. R. Betts, manager of the company. Mr. Betts said that an eminently suitable site had been secured on the north shore, approximately opposite Spillers elevator.

Five special trains carrying around 1500 pilgrims passed through Montreal recently on their way to Quebec City and the shrine of Ste Anne de Beaupre also visiting the shrine of St Joseph in Montreal on their return trip. They were from the church of St Aidan, Jersey City and under the care of Father Thomas M. Curry, parish priest, were on their annual pilgrimage to these shrines.

Shipments of freight destined to points in the north-west of Canada via Port McNicoll, Ont., on the Canadian Pacific lake and rail route will now be accepted, the earliest date being April 9. There will be five steamers in the company's lake service between Port McNicoll and the head of the Lakes during the coming season. Through passenger service will be resumed this season from Owen Sound May 7 and from Port McNicoll, May 19.

Installation of Mack Tractors and Laper Trailers for rapid movement of freight from Canadian Pacific depots to and from outlying terminals has now been completed in Montreal and will shortly be in use in Toronto. — The tractor is immediately attachable to one or more of these trailers which each can hold up to 15,000 lbs of freight and can be as swiftly disconnected. They are expected to immensely expedite the movement of C. P. freight.

Immigrants are flowing into Canada at record rates since lately and Canadian Pacific steamers from Great Britain and Europe are bringing them over at the rate of shiploads of close on a thousand per ship. The majority are farm laborers of British and North European stock and are mostly going in the land in the Prairie Provinces with a fair proportion going to Ontario and the Maritime Provinces.

Winnipeg. — Despite the heavy movement of immigrants to the West during the past two weeks, more positions are open on western farms than the railways and employment agencies can fill, immigration and employment officers state. Thousands of vacancies, the officers said, had been reported. Likelihood of an earlier commencement of seeding operations is generally conceded in the West, they added, and unless immigration continues at its present high peak the opening of operations on the land may find western farmers short-handed.

As the result of a conference between members of the Sheep Breeders' Association, financial representatives and members of the Winnipeg and Brandon Boards of Trade, a movement is under way for the placing of 100,000 sheep annually on Manitoba farms. These will be sold in groups of fifty to each farmer, somewhat similar to the plan now in operation in North Dakota. J. D. McGregor was appointed temporary chairman of a committee to make further arrangements for the carrying out of this
