

# Are You Ready

## When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug. Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

## Wrigley Marathon Swim

The Year's Biggest International Sports Event

### CANADIAN NATIONAL EXHIBITION

TORONTO-ONTARIO

The greatest and most thrilling sporting spectacle in the world will be the 3rd Wrigley Marathon Swim. From the one and a half miles of Canadiap National Exhibition shoreline, thousands will view this gigantic spectacle of internationally famed Catalina and English Channel swimmers striving for the World Championship laurels and the \$50,000 purse.

To witness a Wrigley Marathon is to witness a world spectacle that may never be repeated in this country. Be sure to see the Big Swim this year—two events—Wednesday, AUG. 29th for women, and Wednesday, SEPT. 5th, for both men and women.

Send for literature describing the entire four-day Golden Jubilee Year, Canadian National Exhibition, Toronto, Ontario.

THOMAS BRADSHAW, President. R. W. WATERS, General Manager.

## Ontario Agricultural College

GUELPH

### SEND YOUR BOY TO THE O.A.C.

To the Farm Boy it offers a training that will better fit him for the Occupation of Farming and for Citizenship.

FOUR YEAR COURSE  
Leading to the Degree of Bachelor of Science in Agriculture.

TWO YEAR COURSE  
Leading to the Associate Diploma.

SHORT COURSES  
Short Courses in Live Stock and Field Crops, Poultry Raising, Horticulture, Dairying, Bee-keeping, Farm Drainage, Farm Power, Baking.

STUDENTS IN THE FOUR YEAR COURSE  
May specialize in the Third and Fourth Years in Animal Husbandry, Field Husbandry, Horticulture, Dairy, Bee-keeping, or any one of the Sciences of Bacteriology, Botany, Chemistry or Entomology.

COST OF COURSE  
The total cost for Board and Room and Tuition Fees for First Year Students does not exceed \$200.

Ask for College Calendar Descriptive of Various Courses.  
G. I. CHRISTIE, B.S.A., D.Sc., President.  
A. M. PORTER, B.S.A., Registrar.

## DIFFERENCES BETWEEN ARCTIC AND ANTARCTIC

BY PROFESSOR G. TAYLOR.

Few persons realize that in many important respects the Arctic and the Antarctic regions are quite dissimilar. Within twenty degrees, 1,400 miles, of the North Pole the area consists largely of a deep ocean whose floor is some 10,000 feet below the surface of the sea. Much of the remainder on the Asiatic side is a shallow sea about 200 feet deep, while on the Canadian side are situated Greenland and an archipelago of low islands.

Two results follow from this distribution. Firstly, the pack ice, however much it may break up in summer, cannot move en masse into warmer latitudes, for it is landlocked. Secondly, this pack ice is only a couple of yards thick even in winter, and beneath it is the deep, relatively warm water at a temperature near 30 degrees Fahrenheit. Partly for this reason the North Pole is 24 degrees warmer than the South Pole in summer.

### SOUTH POLAR CONTINENT

Around the South Pole is a continent larger than Europe and more elevated than any other large area on the globe. Near the Pole it rises to about 11,000 feet and it seems likely that half its area is over 6,000 feet above sea level. If average temperatures near Ross Island (78 degrees south) be taken at 0 degrees Fahrenheit, then we may estimate the average temperature of the South Pole at about -35 degrees Fahrenheit, or 67 degrees below freezing. Except along the coast there is no animal or plant life in the whole of this huge continent. There are about 400 species of flowering plants in Arctic regions, whereas only two have been found in Antarctica, and these only where Graham Land reaches north to 64 degrees south. Hence all food must be provided for in land journeys in Antarctica.

Another grave difference lies in the winds. On the whole the Arctic regions with their uniform character are calm, and apart from certain obvious disabilities, such as the deposition of sleet, ice or snow on the airplane, aviators are not much troubled

## THE UNTOUCHED MEAT

People Who Go Hungry With Food on the Table.

"I simply cannot eat." Actual tragedy is suggested by these simple words, so often heard, because loss of appetite, in the beginning of trouble that sooner or later reveals itself as indigestion, nervous dyspepsia, with violent headaches and other serious symptoms. Loss of appetite, whether a man or woman, is a symptom you dare not ignore. If you do, much suffering is sure to follow.

The secret of a good appetite—the secret of keeping well—is to keep up the quality of the blood. By enriching and purifying the blood Dr. Williams' Pink Pills supply strength to the enfeebled organs of digestion, and enable them to digest thoroughly the food eaten without causing pain or distress. Proof of this is given by Mr. William H. Kelly, Kingston, Ont., who says:—"I cannot recommend Dr. Williams' Pink Pills too highly. I had been bothered with indigestion in a chronic form for almost ten years. Everything I would eat would turn sour. I felt as though there was a big ball in my stomach all the time. I felt tired and weak and would often turn dizzy. I doctored and tried many medicines, spending many, many dollars, but to no avail. One day I heard a lady praising Dr. Williams' Pink Pills and I decided to try them. I am more than glad I did, for soon I found relief, and after taking the pills for a couple of months the trouble had disappeared, and now I can eat all kinds of food, and have again my old time health and strength."

Send for These Health Books. Two useful books, "Building Up the Blood," and "What to Eat and How to Eat," will be sent free by The Dr. Williams' Medicine Co., Brockville, Ont. If you mention this paper. Dr. Williams' Pink Pills are sold by all dealers in medicine or will be sent by mail, post paid, on receipt of price, 50 cents per box.

## Not Satisfied

Berlin Leader Sees Occupation of Rhine as Bar to True Peace

Berlin.—Rudolf Breitscheid, parliamentary leader of the Socialists, who have the most important party in the Reichstag, writes in "Vorwaerts" that the question of educating people to the real situation regarding the Rhine-land occupation has become an acute problem of statesmanship and that "if the way to true peace is not to be obstructed this problem must find a speedy solution."

The military security of France will not be threatened if she withdraws her troops from the Rhine, Breitscheid contends. He points to France's guarantees in the fifty kilometre-wide demilitarized zone east of the Rhine, the Locarno Treaty, the League of Nations Covenant and the Kellogg anti-war pact—to say nothing of the fact that Germany has disarmed and that the people demonstrated at the last election that desire peace by voting for men pledged to support the Locarno Treaty.

As for security as regards repayments, Breitscheid says that "Germany does not pay because foreign troops are in her territory, but because she is obliged to by treaty, and also because she would have the whole world against her if she desired to withdraw from these obligations." The Socialist leader concedes that France has a legal right to remain in the Rhineland, but says "statesmen should not be bound by old treaties, but should reconsider them to ascertain if they fit changed conditions."

Breitscheid makes light of recent demonstrations in Vienna in favor of union between Austria and Germany, asserting that "every one knows that we are very far from a legal amalgamation between Austria and Germany and that it is not an affair touching these two people alone, but a problem for all of Europe."

"I haven't any sympathy for the man who beats his wife," said a passenger in the smoker of the E.P. "Well," said another, a timid, undersized fellow, "a man who can beat his wife doesn't need any sympathy."

## Cholera Infantum

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolutely safe medicine, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They cannot possibly do harm; they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Do We Want Aliens?

Dean Inge in the London Evening Standard (Ind. Cons.): "It is much better to keep the population of a country fairly homogeneous, even at the price of slower development. Immigrants of an alien race, alien traditions, and an alien religion, may increase the wealth of a nation for the time being, but they are a weakness, not a strength, to a country, and sooner or later they are likely to be a nuisance if not a danger. It is one thing to admit a limited number of kindred foreigners, as we admitted Flemings into England in the Middle Ages and Huguenots after the revocation of the Edict of Nantes. It is quite another to admit crowds of aliens whom experience shows that we cannot assimilate, who never acquire our ways of looking at things, nor any decent loyalty to the country whose hospitality they enjoy."

## The Crisis in Egypt

Manchester Guardian (Lib.): (Nahas Pasha, Prime Minister of Egypt, has been removed from office and King Fuad has declared three years suspension of parliamentary government.) Nahas may have a complete answer to his accusers, but the accusations have given King Fuad a chance to rid himself of a statesman whom he did not like and have momentarily so disconcerted the Zaghlulist party that it is not disposed to make things impossible for Nahas's successor even if he does not wave the banner of self-determination so vigorously as Nahas did.

The Little One: "No, I am no good at arithmetic." The Big One: "Ah, I've heard that even at home you don't count."

## New Record Made by German Glider

Peter Hasselbach Remains in Air 4 Hours 5 Minutes at Corn Hill, Cape Cod

Truro, Mass.—After 12 days of patient waiting for Cape Cod winds to behave after their usual manner, Peter Hasselbach, holder of the record in Germany for performance with a soaring glider, and here to conduct the first tests made in the United States with the strange, light, motorless aircraft, had his chance on Sunday when a strong west wind enabled him to keep his glider Darmstadt in the air for 4 hours and 5 minutes.

Weather conditions for the undertaking, which is still a sport though it has strong natural scientific implications, were ideal. The sun turned the smooth sea to polished blue enamel, and the wind blew evenly against the great cliff of Corn Hill. Crowds of people, increased over the daily attendance by the week-end holiday, took up vantage early over the moors that reach back inland from the promontory.

Hasselbach knew early in the morning apparently that the day was going to be propitious, and so investigated he was he at the prospect that he went without his breakfast in order to do last-minute tinkering with the glider and take advantage as soon as possible of the brisk west to northwest wind.

Earlier in the week Hasselbach, who is the foremost exponent in Germany of a sport in which 150,000 are versed and every airplane pilot must take training, remained in the air for 58 minutes, thus breaking the old record of nine minutes held by Orville Wright. In order to break the world's record, which he made himself, Peter Hasselbach must remain up more than 4 hours and 13 minutes.

At 9.45 the rubber ropes whereby the glider is catapulted into the air were pulled taut, the "tail tripper" lever was released and Hasselbach was off into space.

Onlookers crowded toward the edge of the cliff though there was no need, for Hasselbach soared all about over their heads, dipping and banking, describing neat and amazing circles; a camera man, ubiquitous companion to practically any undertaking in the civilized world today, ground happily away at his machine and Capt. Paul Roehre, companion of Hasselbach called out occasionally, "bist du hungriq?" remembering that at breakfast there had been no Peter Hasselbach.

## Dropping Parachute Lifted by Cyclone

Sergeant Moore, better known as "Dinty," of the United States Army Air Service, who is stationed at March Field, California, in the Parachute Department, once made a flight with Cadet Bradford in a De Havilland plane and at the height of 2,000 feet he stepped overboard.

The parachute glided down slowly for 500 feet and then went through a series of violent jumps and twists. It then shot upward swiftly and it was not until a newspaper flew up beside him that the Sergeant was aware that he was in the midst of a cyclone. He pulled down on the shroud lines and sideslipped down into calm air and landed safely.

He found that he had drifted about a mile and a half northeast of the air-drome and that twenty minutes had elapsed between the time he left the plane and the time he reached the ground. After this descent Sergeant Moore claimed the unofficial world's record for slow descent by parachute.

The much-respected minister had come to dinner. After a brief interval of abstinence from conversation, a very young son shattered the silence with a voice like a cold chisel: "Mr. Blank," he inquired, "did you become a minister because you were no good at anything else?"

Reports of the remote Chinese province that had no roads until the Governor bought an automobile recall the story of the man who bought a new hat and then needed shoes to go with the hat and a suit to complete the outfit but who in the end got a new and better job.

Let Minard's Liniment Relieve Pain.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

## Indigestion

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## Immigration

New York Times: It is easy to say that Great Britain has hundreds of thousands of idle workers at home and millions of square miles of unoccupied or thinly occupied land in her colonies, and that all that is needed is to put the men on the land. The job is much more difficult. Old habits must be uprooted at home and numerous obstacles must be overcome in the colonies, including the prejudices of the colonists themselves.

Canada's climate has stood in the way. The costs of the long voyage to Australia and New Zealand are a check on private emigration. The conditions of pioneering life are ways to be reckoned with. Nevertheless, these obstacles may be overcome by a sustained and organized effort backed by Government resources.

When one considers that something like 125,000 Russian Jews (in Russia) have been placed on the land in the space of half a dozen years through private agencies and at far from stupendous oblation. It would seem that a Government-supported emigration such as Mr. Baldwin several years ago broached would show appreciable results.

"Fare." The passenger paid no attention to the conductor's demand. "Fare, please." Still the passenger was oblivious. "By the ejaculatory term 'fare' said the conductor, 'I imply no reference to the state of the weather, nor even to the quality of the service vouchsafed by this philanthropic company. I merely allude in a manner perhaps lacking in delicacy, but not in conciseness, to the monetary obligation incurred by your presence in this vehicle, and suggest that you liquidate.' And then the passenger woke up and produced his nickel.

"Fare." The passenger paid no attention to the conductor's demand. "Fare, please." Still the passenger was oblivious. "By the ejaculatory term 'fare' said the conductor, 'I imply no reference to the state of the weather, nor even to the quality of the service vouchsafed by this philanthropic company. I merely allude in a manner perhaps lacking in delicacy, but not in conciseness, to the monetary obligation incurred by your presence in this vehicle, and suggest that you liquidate.' And then the passenger woke up and produced his nickel.
