AVOID THE PAINS OF RHEUMATISM

This Trouble Comes Through Weak, Watery Blood.

Many people suffer rheumatic pains that could be avoided by building up the blood. Rheumatism comes with thin, watery blood, and can only be driven out of the system by enriching and purifying the blood. To make rich, red blood, no medicine equals Dr. Williams' Pink Pills. These pills actually make new blood, driving out all poisonous secretions, and creating a condition of robust health. Thousands of rheumatic sufferers can testify to the value of Dr. Williams' Pink Pills. Among them is Mr. Joe A. Tully, Bobcaygeon, Ont., who says:—"As a worker in the woods for years I was exposed to all kinds of rough wintry weather. The result was that I was finally laid up with rheumatism. I could hardly stir, and was confined to bed. Medicine seemed to have little or no effect and the best encouragement the doctor gave me was that with the coming of warm weather I would be better. But instead of getting better, I grew worse. My joints were badly swollen, and my legs so stiff they would hardly support my body. At this stage I read that Dr. Williams' Pink Pills were recommended for rheumatism and decided to try them. The results were beyond my expectations. After a few weeks the swelling had disappeared, and the stiffness gradually wore away, and much sooner than I expected all traces of rheumatism had disappeared. The next winter when I went into the wood I took a supply of Dr. Williams' Pink Pills with me, and they kept me in the best of condition. My experience should give encouragement to other rheumatic sufferers."

You can get these pills through any dealer in medicine, or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Glass Houses May be New Style

Health Experts Test Odd Dwelling All Windows

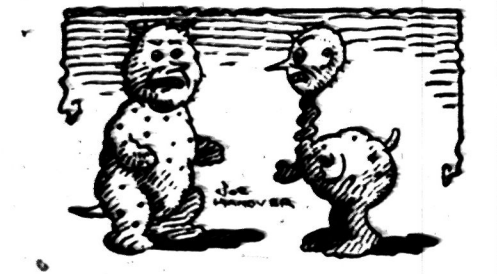

Shall we live, some day, in glass houses? Are present-day dwellings with massive walls and gloomy interiors all wrong?

In order to find out, the U.S. Public Health Service has just erected on the outskirts of Washington a dwelling all of glass, whose ceiling moves up and down in sections and whose windows appear and disappear as if by magic.

The purpose of this experimental cabinet, says the July Popular Science Monthly, is to help discover just how big, what shape, and where the windows in your home should be. It marks the most thorough scientific investigation of the cheapest illuminant in the world—daylight.

There is no guesswork about the U.S. Public Health Service tests. Within the glass house, a delicate electric recording device known as a Case photo-electric cell registers more accurately than can the human eye the amount of light in any room; while on the roof, another electric recorder ceaselessly indicates, for comparison, the brilliancy of the sunshine outside.

As the experts, under the direction of Dr. L. R. Thompson of the Division of Industrial Hygiene and Sanitation, make walls into windows and windows into walls, the machine jets down on a rolling sheet of paper the effects of the changes. From its charts, the experts expect to learn how to build windows in houses and whether dwellings need be only partly of glass, or should be transparent structures, all "show windows," held together by pillars and beams. Tests are being made with ordinary panes; "Health glass," which admits the sun's ultra-violet rays, is next to be tried. The correct ceiling height for best lighting, and what colors for walls and ceiling best relieve eye-strain, are two other problems being studied.

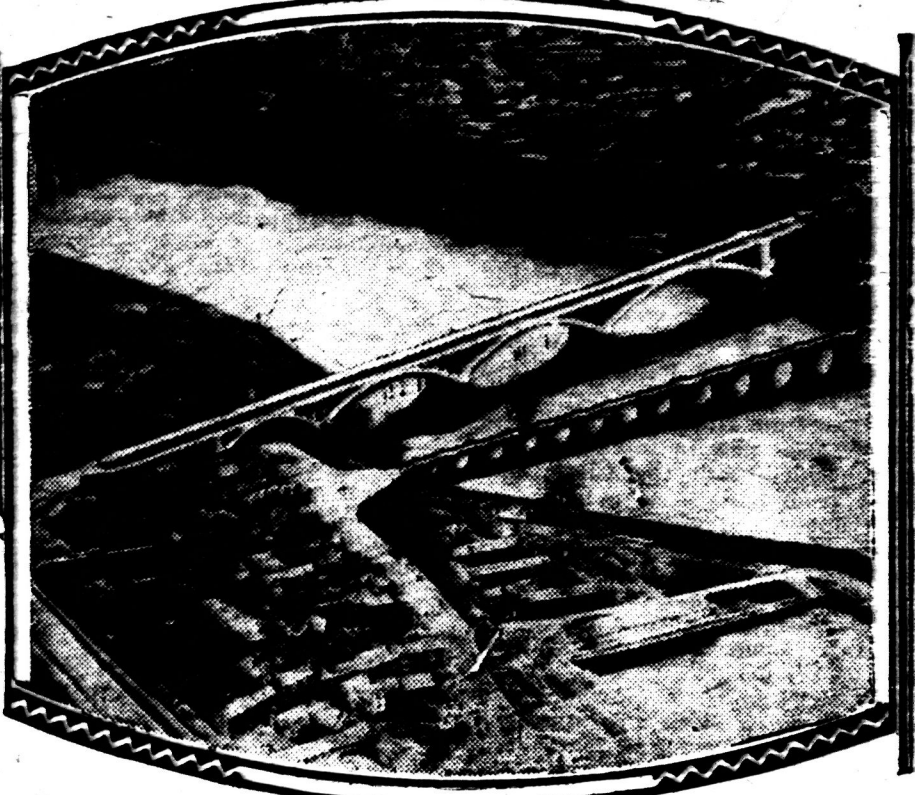

GOOD THING
 Germ: They're washing paper money, using paper office towels, and getting so blamed sanitary, where can we go to live?

Anyway, Mussolini believes in the liberty of the suppress.—Dallas News.

"Why are a girl's lips like a book?"
 "I know. Red only between meals."

What is more satisfying after the bridge game than a cup or two of Red Rose Tea? Millions of Canadians prefer it to any other because of finer flavor, remarkable strength and dustless purity. Put up in aluminum—the only material which completely protects good tea.

Graceful in Every Line

NEW LINK CONNECTING ENGLAND AND SCOTLAND
 The Royal Tweed bridge over the river at the ancient town of Berwick was officially opened by the Prince of Wales. It cost £160,000 sterling.

Baldwin's Bugle Call

Prime Minister Heralds Next Year's Election With Speech on Democracy 70,000 Guests of Peer

London.—Prime Minister Stanley Baldwin professes an abiding faith in democracy, at least as understood and practiced in Great Britain. For centuries past representative institutions have been in this country the whole essence of the parliamentary system of government. The great war subjected the system to an immense strain. In some Continental countries profound changes were wrought, and in others the pressure was such as to destroy existing institutions.

A challenge was issued two years ago to the very foundations of the British State, but the nation whose forefathers rocked the cradle of parliamentary institutions kept its head, and we came through that ordeal established in our belief in the fundamental and eternal sanity of the Englishman.

What, asks Mr. Baldwin, is it that puzzles the foreigner to explain that rock-like stability of the British people, the absence of revolution and the rare records of violence, despite grievances widespread and genuine? It is not only a matter of race; it is not only a matter of climate, of ancient tradition and custom, habits of fair play and tolerance fostered by education and love of sport. It is more than that, says Mr. Baldwin. It is because the people of this country can always call their Governors to account.

"In the House of Commons, if we abuse the confidence placed in us by our electors, they can quickly obtain redress," he went on. "It may be difficult to define or analyze public opinion, but there is no mistaking its existence, its activity and ultimately its sovereignty; and it is this knowledge which enabled the people and Parliament together to ride the storm in which so many ships of State have foundered."

Great Audience at Welbeck Abbey
 Mr. Baldwin was addressing a gathering of 70,000 Unionists at Welbeck Abbey, the famous seat of the Duke of Portland in mid-England, the grounds of which every second year are thrown open to the public for a monster meeting. From five counties—Notts, Derbyshire, Leicestershire, Lincolnshire and Yorkshire—trains and charabancs had brought huge contingents of men, women and children.

But not by any means all of them had come to listen to Stanley Baldwin, and for those who cared little for politics there were sports and dances, little merry-go-rounds and all the fun of the old-fashioned English fair in surroundings which for rustic beauty could hardly be surpassed in any of the midland counties.

At a period when, as the Prime Minister observed, the last barriers of political privilege are falling down, it is at least worth noting that one of the great noblemen of England opens wide the gates of his domain and bids democracy welcome.

Mr. Baldwin made it his proud boast that although the voyage of democracy was no easy one, it was forever and inevitably sailing through seas uncharted; that no nation in history had ever attempted the three-fold task which the people of these small islands had taken upon themselves, and that no nation in history had combined in the same degree political liberty, economic enterprise and imperial responsibility.

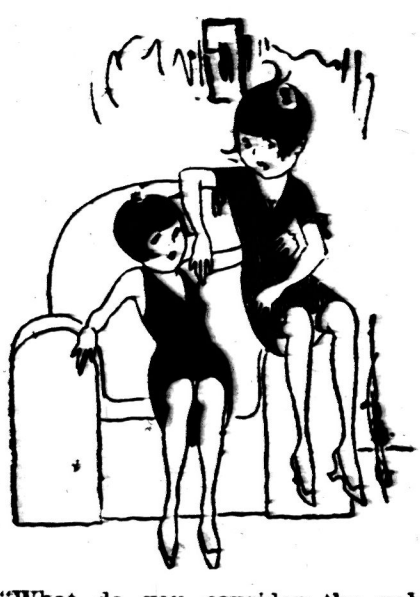

Streamlining the locomotive and the rear observation car of an railroad express train would, according to aerodynamic engineers, reduce air resistance and fuel consumption about 45 per cent.

Whenever an anti-war pact is framed which will suit all nations, we should like to be informed.—Charles-ton Mail.

Over the Mountains

"What lies over the knoll, mother, Back of the cowshed door?"
 "The next-door neighbor's farm, dear, And Whiting's grocery store."
 "And what lies over the hill, mother, Back of the neighbor's barn?"
 "Over the hill is the village store Where grandmother gets her yarn."
 "And what lies back of the mountains Over the village square?"
 "Over the mountains? That, dear, That is the word out there."
 —Donald Fay Robinson, in "Out of the East."

"What do you consider the value of a kiss?"
 "It's worth about its face value."

In ordering police officials not to interfere with small boys looking through knot-holes at ball games, the Mayor of Portland, Ore., gives evidence that he is still a boy at heart.

The difficulty with "favorite sons" is that many a man who can "win in a walk" while carrying his own state cannot run very well when he is to carry forty-seven others.

Pride is at the bottom of all great mistakes.—John Ruskin.

Cute in a Baby—Awful at Three—and it's Dangerous

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Pinning the sleeve over the hand; attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

ISSUE No. 21-25

Old Dobbin Still Popular

Ottawa, Canada.—Notwithstanding the fact that the production of motor cars in many countries of the world increases very substantially every year, the horse continues to be in demand in Canada and horse breeding is still an industry of considerable proportions in the Dominion. A recent compilation shows there were 3,421,837 horses in Canada in 1927 valued at \$250,476,000.

Good demand and good prices have been responsible for maintaining the industry. Breeders in Eastern Canada have experienced recently a demand for sires, while the farmers of the Prairie Provinces are breeding more mares. Big draft horses are in demand at all seasons, particularly for bush and farm work. Saddlers, hunters and polo ponies are sought after, and the best always have ready sale. Quality is the keynote of the demand, which is steadily growing in towns and cities, and also in the United States, where Canadian horses have established a splendid reputation.

NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands of Mothers Say of Baby's Own Tablets.

A medicine for the baby or growing child—one that the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the country. These mothers have found by actual experience that there is no other medicine for little ones to equal them. Once a mother has used them for her children she will use nothing else. Concerning them Mrs. Charles Hutt, Tanook Island, N.S., writes:—"I have ten children, the baby being just six months old. I have used Baby's Own Tablets for them for the past 20 years and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

W. P. Chrysler Began Life as a Farm Boy

First Job in Kansas Railroad Shops—Rose Quickly to High Position in Industry

Widespread interest in the achievements and personality of Walter P. Chrysler was occasioned last week by the merger of the Chrysler Corporation and Dodge Brothers, Inc., in which Mr. Chrysler took a leading part.

The automobile field is not the only one in which Mr. Chrysler has held a commanding position. Railroads fascinated him while he was still a youth in the Western Kansas frontier town of Wamego, where he was born. He entered the Union Pacific shops at Ellis, Kan., while still in his teens, and emerged four years later as a full-fledged journeyman mechanic. In his early thirties he had advanced to a prominent executive position with the Chicago Great Western Railroad, being the youngest man in the United States occupying a similar railroad position.

The vast growth of the country's industrial operations impressed him more, and in 1908 he left his railroad post to become superintendent in the American Locomotive Works at Pittsburgh, Pa. Within two years he had become general manager. The automobile industry began to grow rapidly in these years and men of ability were needed to direct plant operations. Charles W. Nash, then head of the Buick Division of the newly organized General Motors Corporation, asked Mr. Chrysler in 1911 to take charge of the Buick factory at Flint, Mich. In a few years he became President of Buick, and later was made vice-president in charge of production for General Motors. In this capacity he continued until the end of 1919, when he resigned.

After three months he was induced to join Willys-Overland. The late James C. Brady invited him to assist in the reorganization of the Maxwell Motor Company. Mr. Brady and Mr. Chrysler later not only became closely associated in business but were also the warmest of friends.

The summer of 1921 saw the old Maxwell Company reorganized as the Maxwell Motor Corporation. A new small car, with the speed, power and refinements that were commonly associated with high-priced cars up to that time, was named after Mr. Chrysler and placed on the market early in 1924. Nineteen years of transportation experience were put into this product by Mr. Chrysler, and the acclaim with which the new car was greeted was ample repayment for his labors.

Thereafter the organization expanded with amazing speed. The Maxwell name was dropped and the company was again reorganized and called the Chrysler Motor Corporation.

7,000 Own or Hire Mounts Berlin Returning to Horse;

Berlin.—Despite the increasing popularity of motor cars throughout Germany, Berliners again have taken to horseback riding in such numbers that this spring the Tiergarten may well be compared to London's Rotten Row, to the Reservoir bridge path of New York's Central Park or to the Bois de Boulogne of Paris.

According to statistics of the Neue Berliner Zeitung, 500 persons have their own saddle horses and more than 6,500 ride hired mounts. Though the large majority of army officers and members of the aristocracy are not in a position to spend their leisure hours in the saddle, the riding public on the whole, since the days of the inflation, when the "get-rich-quick" had their fling, has been developing into a new smart set.

Immigration

Ottawa, Canada.—Immigration to Canada for the month of April, 1928, totalled 26,983, according to a statement issued by the Canadian Department of Immigration and Colonization. This is a decrease of 24 per cent. compared with April 1927, when the total immigration was 35,441. There was a decrease of 21.3 in immigration from the British Isles, an increase of 409 in immigration from United States, and a decrease of 6,744 in immigration from other countries.

Immigration for April included the following: English, 4,665; Irish, 1,944; Scotch, 2,527; Welsh, 544; Belgian, 334; Danish, 778; Dutch, 538; Finnish, 370; French, 122; German, 1,940; Norwegian, 450; Swedish, 691; Swiss, 91; United States, 2,927; other countries, 9,062; total, 26,983.

During April 3,313 Canadians who had gone to the United States to live returned to Canada declaring their intention of remaining in the Dominion.

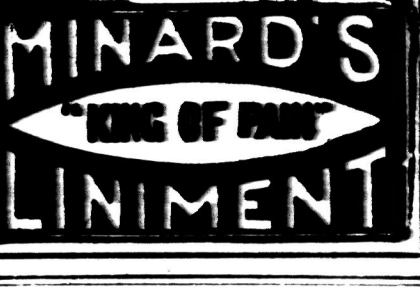

Hostess and Guest (simultaneously):—"Good-bye; I haven't had a word with you the whole evening."
 "Good-bye; most delightful evening I've ever spent."

INVENTORS

Fortunes are made from simple inventions wanted by manufacturers to supply the ever increasing demands. Inventions Wanted, our booklet "Patent Protection" magazine "The Thinker" sent on request. HAROLD C. SHIFFMAN & CO., International Patent Solicitors 64 Metcalfe Street, Ottawa, Canada

Use Cuticura Soap And Ointment To Heal Sore Hands

Remove the hard skin from your corns, apply Minard's freely and get comforting relief.

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once, the symptoms disappear in five minutes.

It is a maxim with me that no man was ever written out of reputation.—Richard Bentley.

A Lovely Skin of Soft, Smooth Texture

Soft, glowing color and velvet smoothness are the skin's reflections of "blood health" within.

TRU-BLOOD, the pleasant-to-take blood tonic, by acting directly on the blood and driving out impurities, corrects the underlying causes of skin affections and gives natural color and beauty to the complexion.

When taking TRU-BLOOD use Buckley's OINTMENT as an external treatment. This magic Ointment does wonders in correcting skin blemishes, in softening and beautifying the skin.

Read what these users say. One writes: "TRU-Blood is working marvels with me." Another says: "I recommended TRU-Blood to my husband and they find it better than any preparation they have ever used." Still another writes: "I cannot praise it enough. As long as I live I will never be without TRU-Blood."

You will sing its praises, too. Go to any good drugstore for these proven "Beauty's" products—and secure "The Skin That Charms!"

TRU-BLOOD Clears the Skin

MEDICINE FOR YOUNG GIRLS

Mothers endorse Lydia E. Pinkham's Vegetable Compound
 Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great turn. She's working out now in a store and walks three miles every morning and back in the evening."—MRS. MARY VANSE, 44 Lingan Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17 year-old girl."—MRS. ALFRED OUELLETTE, Pinewood, Ontario.

Too Much ACID

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.
 Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drug store.
