CLEAN UP!

There is no "sure sign" of spring, but spring should be a "sure sign" of the arrival of that time for the community to clean up. There is no superstition or prophesying about about this clean-up sign.

When warm weather has come to stay (until cold weather returns in the autumn) ever owner of property and tenant should instinctively feel it his duty to remove the evidences of winter's ravages and to aid and augment nature in her work of re-beautification.

Every spring clean-up program should include disposal of winter's accumulation of litter and decayed vegetation, repairing and repainting of buildings, and landscape gardening. Landscape gardening is no longer associated with large estates alone.

Cleanliness about the person or the home costs nothing. A community clean-up need involve no expense, except of a moderate amount of labor on the part of the householders. If there ever were excuses for uncleanness they were removed long ago.

What is the compensation of a community-wide clean-up campaign? It improves the general health of the community by removing deposits that are breeding places of disease germs and disease carrying insects. A clean town is a better place in which to live than one that is unsanitary and unsightly. And the best community advertising is the appearance of being "cleaned-up, painted-up and planted-up."

THE SPRING QUEST

Once more is drawing near that time of year when many an individual has reason to regret that he or she has not completed a course in memory training.

Twice a year every household undergoes a seasonal readjustment. In the autumn summer things are packed away and winter things come out; in the spring winter things are packed away and summer things are again put into use.

Now, all careful people are particular to put things away just where they can reach them. When they put them away they know just where everything is, but six or eight months later the question is, "Where?"

Soon will begin the great vernal hunt for the screws that hold the screen doors on their hinges, the screws and tackle for the awnings, the oil can for oiling the lawnmower, the garden tools and left-over seeds from last year's planting. Everything is somewhere, but that some place has a tantalizing habit of being the last place one would think of looking.

Householders are at fault in that they do not realize the gigantic task involved in putting things away and taking them out. One doubts that there is an efficient enough memory course to solve the universal problem, and there are just as grave doubts that there is an office index system with enough cross indexes to end this exasperating game of hide and seek.

Civilization may have its advantages, but at this time of the year there are reasons for enjoying the Hottentot.

HONESTY OF THE YOUNG

Scientific investigators are learning many facts about children which it is suspected parents have long known. After the experts have learned all there is to learn from their three years' study of "honesty" among the school children, they will probably know no more than every parent of a normal child already knows.

Tests have been devised to discover tendencies to lie, cheat or steal. At the same time ordinary intelligence tests were given in order to show the relation between good sense and good character, if any. The results indicate the most intelligent child is likely to be most honest.

A number of questions designed to probe the religious and filial feelings were answered as might have been expected, and the children were convicted of "over-statement." Apparently they all thought it desirable that they should seem pious and dutiful, and they said that they thought it their duty to read the Bible every day, to pick up broken glass in the street, to speak kindly to their parents and instructors, and to try to get the license number of a motor vehicle if they suspected the driver of speeding.

Most children have an uncanny knack of reading the mind of a questioner. They are as shrewdly observant as monkeys, and a really intelligent inquirer often has to resort to trickery to get to the bottom of their busy little minds.

BETTER SEED CAMPAIGN

Clean, sound, plump, well graded seed will produce from 10 to 100 percent more crop than weed infested, ungraded seed.

Increased crop yields lower the cost of production. Lowering cost of production is the best way to increase farm products.

Good seed means clean, fresh, plump, well graded, sound seed of the best bred varieties. Seed grown on the home farm (if it comes up to this standard) is the best to use, but there are many sources of good seed for those who do not produce it. For example: Reliable seed houses; careful seed growers.

Registered seed is good seed because only the most thoroughly tested varieties can be registered, only high-quality seed of those varieties can be registered.

"Whoever sows a manure shall he also reap." Know what you sow.

HEALTH SERVICE
of the
CANADIAN MEDICAL ASSN.

SOUND TEETH
Whether or not a building is safe and sound depends upon the materials used and the skill of the workmen. Our body-cells are skilled in the building-up process, but they must be given good materials for this in the food we eat. If there are to be sound teeth, there must be provided the materials from which to build such teeth.

Mineral elements, such as calcium, form a large part of the teeth which, in many ways, are like bone. The surface, or crown of the tooth, is much harder than bone. This outer surface or enamel is the hardest substance in the body.

These mineral substances can only be secured from the food eaten. In other words, proper food must be eaten if we are to have sound teeth.

The kind of teeth a child has depends upon the food his mother ate before his birth, and upon what food he received during his earliest years. The beginning of the tooth is laid down very early in life, at the tenth week of foetal life, to be exact. This is one of the reasons why expectant mothers should know what to eat.

What are these foods that the expectant mother and growing children must have for the proper building of teeth? Foods possessing these elements are milk and milk products, whole grains, leafy vegetables, such as celery, lettuce and spinach.

It will be remarked, whenever the question of diet is considered in relation to health, that milk and milk products are of the first importance and, following closely, are the green leafy vegetables and fruits.

When, as a nation, we begin to eat intelligently, many of our ills will disappear, and we will become sturdier, healthier people.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered. Questions as to diagnosis and treatment will not be answered.

In The Melting Pot

Miss Spring is expected to act a little bit forward.

That the first day of spring is the 20th day of this month.

The world gets better. You seldom see detachable cuffs now.

Being good because there is nothing else to do doesn't count.

Philosophy is just the art of listing sore spots as experience.

When a gossip meets a rumor the recording angel writes shorthand.

Patience—the lady we blame for our failures; but forget when we succeed.

All reports are not in yet, but the fruit crop has undoubtedly been killed.

Russians are backward in the production of motion pictures, reports a commentator returned from Moscow. Accounted for by the scarcity of custard pies.

The only necessary apology for having nothing to say is to say it entertainingly.

Leaders are born. Mussolini couldn't have cultivated a thumb as efficient as his.

And yet consistency may be just a confession that you've developed your

Record Roundups

Some of these fellows who are always talking about "clean-up-big" says George Webb, "ought to have jobs as street cleaners."

NEW FORDS SMASHED ALL RECORDS
Averages 58.26 Miles Per Hour to Phoenix, Arizona
Speeding along desert roads at more than a mile a minute, a new Ford Tudor Sedan, absolutely stock and completely equipped, broke three Los Angeles-Phoenix records. On the trip to Phoenix by way of Yuma, the drivers took the car over 143 miles or dirt and gravel roads that were rough and rutted, but maintained an average speed of 58.26 miles per hour, demonstrating the ability of the Ford Motor to sustain high speed hour after hour under gruelling conditions. The time was 8 hours, 14 minutes and 50 seconds, lowering the record by 19 minutes and 10 seconds. The return trip to Los Angeles by way of Blythe, took the car over 254 miles of dirt and gravel roads even rougher than those encountered on the trip to Phoenix. The former record was lowered 1 hour 39 minutes and 50 seconds, the running time being 8 hours, 50 minutes and 10 seconds.

Re-roof this Year with RIB-ROLL
The Permanent Roofing for Barns, Houses, Sheds
Low in initial cost. Comes in big sheets—easy and quick to try—permanent... look proof... handsome in appearance. Prevents fire... increases value of property. Made of famous "Council Standard" galvanized sheets. Give size of roof for free estimate. Write to:

SPRING!

Brings forth the new Coats, Dresses, Suits, Millinery, and many other very dainty articles for "My Lady's Wardrobe." We have a large display of the new spring garments. We invite you to come in and look them over.

A fine display of Coats, made from Beautiful all-wool English Poirot Twill, Tricotine, Charmeen, and heavy Kasha, trimmed with Satin strapping, smart moleskin collars, beautifully lined with Crepe de Chine. Sizes 14 to 48
\$16.50 TO \$37.50

Smart Tailored Coats in mannish styles in Tweeds, Kasha, Poirot Twill, some with velvet collars. Sizes 14 to 20... **\$12.50 to \$24.50**

Not forgetting the Kiddies in Tweeds and Kashas... **\$7.50 to \$9.95**

Spring's arrivals in the new Frocks: Kashas, Jerseys, Flat Crepes, Silk Georgette, Wool Georgette. Priced from... **\$8.50 to \$27.50**

We haven't forgotten the Babies and the Little Ladies in our Spring showing. The lovely Silk Dresses for Little Ladies from 2 to 12 years, are very dainty, with their frills of ribbon and lace. The prices are very moderate.

A very large showing of cute little dresses, plain or pantie style, made of very neat little patterns of Print, also Fugi Silk. The moderate prices make it possible to dress the little tots neat and dainty at very little cost.

HATS FOR EARLY SPRING WEAR
Although Spring has not yet arrived, the ladies are thinking of Spring apparel. Hats, Coats and Gowns.

Many of the new models in Hats show practically no brims. For early wear Felt and Pedaline is favored, Satin and Visca Braids combined. For dressy occasions the larger brims.

With the appearance of lony hair, there is a tendency for more trimming.

The new shades are Chalet, Red, Rose, Blue Spruce, Flemish Blue, not forgetting Black, which is so smart.

Spend a pleasant half hour in our show room, trying on these hats.

Prices range for Ladies from... **\$3.95 to \$6.45**
For Kiddies and Misses from... **\$1.95 to \$3.95**

The Won-By-One Class of the Baptist S. S. will hold a sale of Home Baking in our Basement on Saturday, commencing at 10:30.

SIMCOE
HENRY R. CRABB, MANAGER.

The Launch of "The Duchess of Bedford".

No. 1—Leaving the ship after a thorough inspection. No. 2—Premier Baldwin and his wife about to press the release button.
No. 3—The Duchess shortly after taking the water.

In the presence of a monster crowd which thronged the great Glasgow shipyards of John Brown and Co. the "Duchess of Bedford" 21,500 gross tons was launched recently by Mrs. Stanley Baldwin, wife of the Prime Minister. The vessel is one of the four "Duchess" class of steamers under construction for the Canadian Pacific Railway Transatlantic route.

At the launching of the new ship speeches were made by the Prime Minister, Lord Abercromby, Chairman of John Brown and Company, Sir George McLaren Brown, European General Manager of the C. P. R., Captain J. Gillies Manager of the C. P. S. S. and Sir Thomas Bell, Managing Director of the Clydebank Yard.

Premier Baldwin recalled his recent visit to Canada and spoke of this country's wonderful possibilities for a marvellous future. "I am quite confident," he said, "that whatever vision and imagination can do for the Empire at large will be done by the Canadian Pacific Railway."

After cutting the cord from which a bottle of champagne was suspended, Mrs. Baldwin, before touching the button, which was to be the means of the vessel being released, said: "I name you 'Duchess of Bedford'. May God protect and prosper you. May he preserve and bless all those that go forth with you into the known and unknown."

And then, to the accompaniment of tremendous cheering from the large gathering of spectators, the massive structure began to move from the stocks, and gathering impetus as she went, took the water gracefully.
