One of the most treacherens dis cases affecting the people of Canada during the winter months is influenza It almost invariably ends with a compifeation of troubles. Its victims suffor with alternate fevers and chills, headaches and backaches. It leaves them an easy prey to bronchitis and pneumonia. Indeed, the deadly after effects of influenza may leave the victim a chronic invalid. You can avoid influenza entirely by keeping the blood rich and red by the use of Dr. Williams' Pink Pills. If you have not done this and the disease attacks you, you can banish its deadly after effects through the use of this great

blood-building nerve-restoring tonic. Here is proof of the power of Dr. Williams' Pink Pills over this trouble. Mr. F. H. McMullen, Belleville, Ont., says: - "Some years ago, following a severe attack of influenza, I was left in such a weak condition that my friends thought I would not get better. I developed nervous indigestion, and my blood got thin and watery. In this weakened condition I began the use of Dr. Williams' Pink Pills, and these did what other medicine had failed to dobrought me back to health and strength. I can honestly say I think them the best blood builder and nerve tonic known, and I shall always praise them."

to Disease in Many Forms.

Less Noise Please

the Ears Will Help a Lot

Could it be bandits of the skies, staging the first air hold-up, who were peppering the mail plane with buckshot as it roared through the night? No, Douglas Clephane tells us in NEA to a large extent on the element of Magazine and Science Service, it was surprise. At present the noise, which an frate former who was trying to can be heard by sound-detecting dediscourage aviators from flying over vices for miles, gives a warning to the his land. The deafening noise of the opposing forces, allowing them to planes, he protested, bothered his range anti-aircraft guns, send up ophens and made them stop laying. This posing planes, and prepare other proman, continues the writer, who takes tective devices that are being develap the problem of making the air- oped. plane noiseless, or at least less netsy, was the first to express dissatisfaction in such sensational form, "but millions of people are becoming intolerant of the noise created by airplanes. Both the airplane-riding public and the millions who must hear this noise from the ground are demanding that planes be silenced." sing problem is outlined thus by Mr. Clephane:

In theory it is as easy to make a noiseless aviation motor as it is to make a quiet motor-car. Every pound added for mufflers and other silencing devices now on the market reduces the amount of paying mail, freight, and passengers that can be carried. For this reason and because of the added fire hazard and loss of power that most of the devices cause, manufacturers have been slow to adopt them.

Recently there has been a development that offers first possibilities of a practical solution of the noise problem. A device which will cut down the exhaust noises without adding appreciably to the weight or fire hazard, or causing a loss of power, has been developed on an entirely new princi- try takes steps to defend itself from the soup.

The exhaust gases are gathered togther in two pipes and passed into the inside of the blades of a hollow steel propeller that has just been invented. watches ,so you can tell just how By leaving an opening on the trailing long it takes to get a light from one edges of the blades from which the of them. gases escape, the centrifugal effect causes a partial vacuum to be built up inside the propeller.

Not only will the motor be silecned by this device, but it will do away under the Eighteenth Amendment, we with the long hot exhaust pipe which suppose they mean that in a dry counis the main cause of fire in planes, turning slight accidents in landing and day. in the air into horrible tragedies.

Even with the motors as quiet as in automobiles—a development which ter public-house): "Do you know, my can reasonably be expected within the man, that that door will surely take near future—no means has yet been you to hell." "That don't matter, mis-church after we're married and you

this country and abroad can see no solution of the problem. These sounds have two sources: first, the vibration of the propeller itself, and second, the Making the Airplane Easier on cutting the air at six to eleven miles disturbance created by the blade tips per minute.

The first country to develop a noiseless propeller or other system of propelling the plane, will have a tremendous military advantage over the world.

ER OF THE TOWER

he spoke of the trimmph of Nam as bringing "an increase of pride to the breasts of the parochialminded." Herein, I think, lies the erux of the whole question. Is na-tional pride a fine thing and in no way related to parochialism—at the bettom of the Scottish Nationalist mevement, or has that movement its roots in a baser soil? Will the dissension caused by the propagation of the Nationalist aims be justified ultimately by an era of increased peace and prosperity? These are the questions perplexing the minds of thinking men and women of Scottish blood all over the world today.

PROBLEM FOR

Stomach troubles cause most of the distress of babyhood and childhood, and are the greatest problem that a young mother has to solve. The treatment for these digestive disturbances that make baby cry continually and disturb his sleep must be quick and

The absolutely safe treatment for disturbances of the stomach and bowels is found in Baby's Own Tablets. Thousands of mothers have kid their problem solved through them. They are guaranteed to be free free all injurious drugs and cannot possibly do harm to even the youngest babe—they always do good.

Baby's Own Tablets regulate the stomach and bowels; banish-constipation and simple fevers and promote that health-giving sleep which is so necessary to the welfare of the baby or growing child. The Tablets are sold by all medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Modern Values

Edith Sitwell in the Spectator (London): Money has no relation to life at present; it has no relation to anything real; it has no true relation to the things which it buys. It has got outside human control altogether; it is a Frankenstein monster dominating the unhappy world which created it. Where Charity once spread a cloak which was permitted to cover venial faults, this Frankenstein monster now offers the one garment which is allowed not only to cover, but to glorify, any kind of mortal sin. Nothing matters if you can spend more money than your neighbor; and if you can spend it in such a way that noone who really needs it benefits by it, then so much the better.
