HEALTH SERVICE

Continued from Page 4

more precautions since children cannot take care of themselves. Because it is most frequently in the home that tuberculosis is spread, the necessity for care in the home is apparent. To protect the children, adults must preserve their own health, and must practice living in such a manner that they do not endanger their children.

No one would willingly expose his child to disease, but where there is spitting, uncovered coughing and sneezing, and the use of common drinking-cups in the home, the child in that home is not being given a fair chance to escape disease. In such a home, if there is a case of tuberculosis, the child will most certainly contract the disease.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by correspondence.

COUNCIL ENDEAVOR TO GET MARSHES FILLED IN

Maple Leaf, Port Dover
"To fill, or not to fill" that is the big question that has been bothering the minds of the council for the past few days, the old marsh at the C. N.R. depot being the main feature of their anxiety and worry. With some thing like forty-seven thousand cubic yards of soil to be removed to make the "cut" through Edmondson's hill and the contractor seeking a nearby spot to dump this surplus soil, every body in town had visions of the laying out of a park or parking space and bidding farewell—a long farewell—to the old marsh that has been an eyesore to the town for many decades. But the well-laid plans of mice and men . . . and after trying to come to some fair agreement with the contractors the village council have failed in their efforts. Some citizens are saying pretty harsh things about the town but after delving into the question from all angles we doubt very much if any of the critics would act otherwise than our present representatives have done. There is still some hope that some terms acceptable to both parties may be arranged, and the marsh disappear. And, too, things might have been different had the tax rate not already been set. It is estimated that it will cost in the neighborhood of \$250 to \$300 for the alone and if the town owned the property outright instead of holding it under a lease from the C.N.R. they would be willing to tackle the job and in a short time would make a clean-up. As the councillors themselves have said time and time again, no one in town wants to see the marshes filled in more than they do, but they have not got unlimited resources to work with and have to make a one dollar bill stretch out to do the work of two.

TWO BOYS LOST—FIRE-MEN SEARCH TOWN

Port Dover, June 14th.—Villagers yesterday morning at 3.15 were puzzled to account for the three strokes of the firebell. It was later learned that the ringing was to recall the members of the fire department who had been searching for two young lads who had not returned home at the usual time but had spent part of the night in an auto and later moved to the store belonging to the parents of one of the lads.

The firemen, who were called out at 1.30, divided into small parties and combed the village thoroughly one party even going up the river thinking that possibly evidences of a tragedy in the shape of an upturned boat might be found there. The auto in which the lads first found refuge was but a short distance from the firehall and it is probable that the conversation carried on before the parties set out may have awakened the lads sufficiently to make them decide to seek more comfortable quarters. The boys are none the worse for their escapade.

WORK AT PIER PROGRESSING

A third crib for the new east pier at Dover has been placed in position and a fourth headed-foot length is rapidly nearing completion. Precast cement blocks are accumulating at the harbor and from now on work will begin to show a rapid progress from the effects of the preliminary and but little observed work which has been done to make this progress possible.

Here and There

(329)

New style bucket seats for first class coaches on Canadian Pacific day fast trains have been introduced on regular trains of the company and are proving very popular. The seats are upholstered in a cool moquette material and are provided on their backs with coat rail, umbrella stand and check holder for the convenience of passengers.

The stork recently visited Canadian Pacific train No. 51 between Lanigan and Saskatoon and left a daughter to Mrs. Marysly Alexander on her way with her husband to settle on a farm near Edmonton. Miss Binning, government conductor of the immigration department at Quebec, was on the train. She secured a first aid kit from the conductor and took charge of the case. Mother and daughter are doing well.

Sixth annual trail ride in the Canadian Rockies will start from Banff August 1, and end a few days later at Castle Mountain Bungalow Camp. Seven glacier-fed lakes are on the route which will form half of the long-desired High Line trail from Banff to Lake Louise. The second half will also skirt several glacial lakes. About August 8 the long distance trail ride from Lake Louise to the Columbia Icefield will make a start. This icefield covers the largest and most spectacular body of ice left on the North American continent surrounded by peaks as high as 12,000 feet. The second trail ride will take nearly three weeks.

The only golf trophy offered on the continent of America by His Royal Highness, the Prince of Wales Cup, presented to the Banff Spring Golf Club for annual competition by bona fide amateurs on the course there, will be among the outstanding prizes of gold when members of the "Canadian Golfer" tour special train which is crossing Canada from Toronto to Victoria and back this summer, arrive at Banff early in September.

"Scotland and Glasgow are proud of Canada for the part she is playing in trans-Atlantic shipping," said T. L. Duff, well-known shipowner and broker, when interviewed at Banff recently. "The building of a ship directly employs about 5,000 craftsmen on the Clyde," he added, "and the supplying of the materials and fittings required in construction indirectly benefit industries throughout Scotland." Mr. Duff said that Scots felt that the Canadian Pacific whose recent ship orders had done so much for Scottish industry, was as much Scotch as Canadian, the founders having been of Scottish descent and so many of the ships of Scottish construction.

During the past five months all milk production records at Strathmore farm have been broken. Strathmore Sylvia in the mature class by producing 29,371 pounds of milk moved the mature class record up 4,821 pounds. In the four-year-old class Strathmore Texaline Sylvia exceeded the former farm record by 3,145 pounds with a production of 23,830 pounds. Strathmore Lassie Sylvia in the three-year-old class finished on February 22nd 1927 with 23,568 pounds of milk or 3,568 pounds more than the former record. To Francey in the two-year-old class, however, belongs the premier honor. She broke the farm record of 5,315 pounds. Although only a two-year-old when placed on test she produced 22,022 pounds of milk which was sold to the Polar Milk Company for \$524.05. Her age now one year old is priced at \$400.

—On Sunday of last week Mr. Ed. Nunn was visiting near Tillsonburg and brought home a few sticks of Oxford County rhubarb, one of which he left with ye editor. It measured three feet five inches in length and was five inches in circumference. Mr. Nunn declared that that was but a fair sample, and one stick was sufficient for the ordinary rhubarb pie.

Being Brave Doesn't Count

The man who will fight his weight in wildcats is as helpless as a babe in arms to ward off the menace of lightning.

Rely on yourself, if you will, to protect your loved ones and your property from danger with which you can cope. But don't leave them subject to the dangers of lightning any longer.

Let us rod your home and buildings with the DODD System of Lightning Protection.

Then you never can be "burned out" by lightning. Your property will not be injured. Your family always will be safe.

This protection is worth a thousand times what it costs if lightning strikes your home just once.
