ert's return from Australia with annoyance, had shot him and disappeared.

But there were mysterious circumstances. The shot was fired a few moments before Antony Gillingham, gentlement adventurer and friend of Bill Bevernment adventurer and friend of Bill Bevernment, one of Mark's guests, had entered the fall where he found Matt Cayley, Mark's constant companion, pounding on the fall where he found Matt Cayley, of Mark's constant companion, pounding on the door and demanding admittance. The two men enter a room through a window and find the body. Antony and Bill continue investigations and become convinced that Cayley knows something about the crime. They discover a secret passage leading from The Red House to the bowling green and then Antony questions the maid, Elsief, who overheard Mark speaking to Robert in the office. GO ON WITH THE STORY

CHAPTER X .- (Cont'd.)

"It was you who heard Mr. Mark yesterday, wasn't it?" Antony asked the maid.

"Yes, sir."

"'It's my turn now. You wait," murmured Antony to himself. "Yes, sir. Nasty-like. Meaning to say his chance had come." "I wonder."

'Well, that's what I heard, sir. Truly." Antony looked at her thoughtfully

and nodded. "Yes. I wonder. I wonder why."

"Why what, sir?" "Oh, lots of things, Elsie. . . "

He had found his pipe and went downstairs again.

Antony was glad to have spoken to do?"
to her, because he had recognized at "They once the immense importance of her evidence. To the inspector no doubt it had seemed nly of importance in that it had shown Mark to have dragging it for?"

adopted something of a threatening "Mark" attitude toward his brother To Antony it had much more significance. It

was the only trustworthy evidence that Mark had been in the office at all look for that passage?"

was shent for a little, and then, breaking open the box, and letting look for that passage?"

Cayley know that we've done it." For who saw Mark go into the

office? Only Cayley. And if Cayley had been hiding the truth about the keys, why should he not be hiding the truth about Mark's entry into the office? Obviously all Cayley's evidence went for nothing. Some of it no doubt was true; but he was giving it both truth and falsehood, with a purpose. What the purpose was Antony did not know as yet; to shield Mark, to shield himself, even to betray Mark -it might be any of these.

Elsie's evidence, however, seemed to settle the point. Mark had gone into the office to see his brother: Elsie had heard them both talking; and then Antony and Cayley had found the body of Robert . . . and the inspector was going to drag the pond.

But certainly Elsie's evidence did not prove anything more than the

ut, isn't it?" Yes. You see, my idea is this." He explained his reasons for think-ing that the secret of the passage was neerned in some way with the secret of Robert's death, and went on:

"My theory is that Mark discovered the passage about a year ago the time when he began to get keen on croquet. Well, then, when Miss Norris was going to dress-up, Cayley gave it away. Probably he told her that she could never get down to the bowling green without being discovered and then perhaps showed that he knew there was one way in which she could do it, and she wormed the secret out of him somehow."

"But this was two or three days

"Exactly. I am not suggesting that and adventure for Mark, three days person who could give him away was

"So it was safer to have her out of the way?" "Yes."

"But, look here, Tony, why do you want to bother about this end of it?

"He's got such a frightful lot,

We can always get in at the bowlinggreen end." "Oh, rot," said Bill uneasily. He "I know, but if we do that we shall

## The Need for Economy

"Over here?" said Antony, going former days, in every Canadian pro-Quebec Evenement (Cons.): vince, the conviction was so strong more than a week, he told us. He's of the present generation, while regot such a frightful lot, hasn't have cognizing the extravagances of the many that's very interesting, said past, do not realize sufficiently the importance of economy. A naive optimism leads them to believe . . . that we do not need ,individually or collectively, to make provision for the future. This is particularly apparent

In giving a blueprint of the future use of airplanes, Mr. Rabson assumes the development of a helicorter which will enable a plane to rise straight by hover at a given spot, make a slow vertical descent—and possibly perform as a parachute when the power is cut off.

"This will be the master key," says Mr. Babson. "Other key inventions may be as follows: The planes or blades can be folded up as a grasshopper felds its wings. A pontoor construction will permit landing and locomotion on water or on snew. The landing wheels may be power driven, so that the machine can be operated on the road like an automobile. For example, after Lying to a city, it will be possible to land outside its limits and then use the plane as an automobile. Fundamentally this is the fliv-

most hopeless room of any in which to we can foresee an industry of giant are at home in the three elements. sie. Moreover, it will have profound earth, air and water." effects upon human life, equal to or even greater than the vast changes Minard's Liniment prevents, Flu. which can be traced to the automobile industry.

"Some houses will have roof garages, reached by automatic electric elevators. Once discovered, the room may be utilized for other purposes to suit certain specified teatiles. Bein addition to that of garage. Long cause of this, it is the hest plan to rows of apartment houses have a roof select the material and pattern in relaarea that can well be smoothed and tion to each other before purchase,

is still room at the top. "These changes, however, seem sewer—she does not the triffing in comparison with other tre-

tion is on the horizon. The conquest sum. of the skies will result in rebuilding the face of the earth. For example, will be replaced by power-draught can't he use the telephone systems. The campaign for smoke prevention will gather new force. In the northern regions snow removal is not man's ancestor, and that ought from highways will be extended to be comforting to the are. While it is true that the plane in flight is indifferent to impassable roads, nevertheless the plane on land will want to taxi about and will insist on adequate facilities. Plane drivers will join car drivers in demanding good roads the year round.

"The plane of the future must be
