"I had no colour"

MRS. FRED. PENNY, R.R. No. 4, Norwich, Ont., suffered from anaemia for over three years. Though taking medicine all that time, nothing helped her till she began Dr. Williams' Pink Pills.

"I had no appetite", she writes. "I could not sleep. My blood almost turned to water. I was weak and my heart would palpitate violently. I am thankful to say that in Dr. Williams' Pink Pills I found the relief I sought. My color returned, my appetite improved, my weight increased fifteen pounds, and it was not long till I could perform my work with ease."

If you are weak and easily tired, subject to headaches, are pale, without appetite, and your work seems a burden, do not delay. Start treatment at once by buying a box of Dr. Williams' Pink Pills at your medicine dealer's or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont. 8-27

Dr. Williams' PINK PILLS

"A HOUSEHOLD NAME IN 54 COUNTRIES"

Anglo-American Sea-Power

Frank H. Simonds in the National Review (London): Englishmen do not realize the extent to which now, ten years after the World War, American opinion has crystallized in the belief that we were made belligerents by reason of British use of sea-power. Until the Germans imposed the submarine blockade the decisive majority of the American people were resolved upon neutrality.. For this majority the German action seems a direct consequence of the illegal employment of British sea-power in respect of neutrals, and particularly in respect of the United States. Indubitably we adopted the same methods when we mecame belligerents, but this detail is not even generally known.

Slick!

No wonder Smart's Mowers are so popular! They cut so easily and with such little "push".

SMART'S MOWERS

JAMES SMART PLANT, BROCKVILLE ONT.

"Two Hobgoblins"

Mr. Alanson B. Houghton, the retiring U.S. Ambassador, in a striking address at a dinner in London given in his honour, said:—

"If anyone is anxious about the Anglo-American relations because there are unsolved problems between the two peoples I have no words to comfort him. There will never be a time when such problems do not exist.

"I confess frankly I see only one reason for distrust. And that is the existence of two mental hobgoblins. One of these hobgoblins appears from time to time in America to assure us that Britain is a predatory Power, cynically careless of right and wrong, indifferent to the interests of others, greedy, cunning and waiting only for a favorable opportunity to strike us down.

"The other appears from time to time in Britain to assure you that as America becomes more conscious of her gigantic strength she will inevitably become imperialistic and, ruthlessly and brutally seeking to exploit others, will use that strength merely to play the bully and become a danger and a menace to the peoples of the world. If these two hobgoblins speak the truth the future is dark indeed.

"But these two hobgoblins do not speak the truth. There are no such peoples as those described. The description is false. The real peoples are wholly different. They are made up of millions of kindly, decent, hard-working, God-fearing men and women, who possess innate common sense, who are busy about their own affairs, who do not fear one another, who want to live in peace, and who mean, God willing, to do so.

"Is it not about time that we recognized that fact fully and consciously, and turned definitely away from such fantastic views of our true relations to each other? A durable and unbreakable peace exists even now between the British and American peoples if they will but recognize the fact."

The British Press

Herbert Tracy in the Labor Magazine (London): The independent newspaper has practically disappeared. The process of concentration has led to the formation of three dominant groups (the Berry, Rothermere and Inveresk combines) . . . Under such conditions it is ridiculous to talk about the freedom of the press. That freedom has been undermined by commercial influences, which in their turn have made untenable the position of independent newspapers. As things now stand, the only apparent alternative is the extension of wireless broadcasting, on the largest possible scale and with the utmost latitude of expression. The broadcasting monopoly may conceivably be, in some conspiracy of silence on the part of the press, the only means of guiding and informing public opinion in a period of national crisis.

University Education

Glasgow Herald (Cons.): Culture, to use a word for which we would fain get a substitute, is the mainspring of endeavour. It is the informing principle of life at a University; and those who enter the gates of any of these great institutions with the direct and sole intention of taking a degree towards the end that they may benefit financially, may leave at the close of their undergraduate years without ever knowing what the University might have meant for them, and for those possessed of intentions similar to their own. That such do come to the Universities we cannot deny. All the greater need, accordingly, that the Universities should not falter in their disinterested pursuit of learning in the secure knowledge that all studies, properly conceived, conduce towards that essential embodiment of the mind and character which regards what is learnt and taught as something greater than merely useful.

Approve Cobham River

The Geographic Board of Canada has approved the naming of the north branch of Severn River in Manitoba and Ontario, Cobham after Sir Allan Cobham, the famous British aviator.

A poor man may be a crank, but a rich man is eccentric.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggists.

GOOD IN EVERY WAY

Baby's Own Tablets Banish Babyhood and Childhood Ailments.

A medicine that all mothers praise—one good in every way—one that will quickly banish the minor ills of babyhood and childhood is the medicine to keep in the medicine chest; to always have on hand in case of emergency. Such a medicine is Baby's Own Tablets—they are helpful at all times. They are a mild but thorough laxative which by regulating the bowels and stomach banish colds and simple fevers; correct constipation and indigestion; relieve colic and diarrhoea and make the cutting of teeth easy.

Thousands of mothers use no other medicine for their little ones. Among them is Mrs. J. H. Bromley, Westmeath, Ont., who writes:—"I have four children and whenever any of them are ill I always use Baby's Own Tablets and have found them good in every way. I would not be without the Tablets and would also like your little booklet Care of the Baby in Health and Sickness.'"

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Upper Canada College Old Boys

Plans are Under Way for Big Celebration for the Centenary in September

The "Old Boys" of Upper Canada College — numbering some 4,000 — have for some time been making arrangements for a fitting celebration of the Centenary of the College in September, 1929. "Old Boys" from all parts of Canada have announced their intention of being present, and a large representation from the United States and England is also expected. The Prince of Wales, the Visitor of the College, has already sent his good wishes, and the Governor-General has expressed his willingness to be present.

The Committee appointed by the Old Boys' Association has arranged for the following functions during the three days of the celebration:

Friday, September 13, 1929

Morning—Unveiling of Tablet on the site of the old school building.
Afternoon—Presentation of prizes won during the last school year.
Evening—Centenary Ball at the Royal York Hotel.

Saturday, September 14, 1929

Morning and Afternoon — Cricket Match, U.C.C. Past and Present vs. Toronto Cricket Club Past and President.
Afternoon—Garden Party.
Evening—Centenary Dinner at the Royal York Hotel.

Sunday, September 15, 1929

3.00 P.M.—Special Service for Old Boys at St. James' Cathedral.

Australian Trade

Vancouver Province (Ind. Cons.): There is no doubt Canadian consumers would buy Australian goods if these goods were brought to their attention. This involves salesmanship—aggressive salesmanship. It involves advertising, not spasmodically but systematically. It involves an attempt to meet American competition on its own ground by providing goods of a type to which Canadians are accustomed and in a form which will be attractive to them. All this is a task for the Australian producer and distributor—not for the Canadian consumer. Australia must remember, in bidding for the Canadian market, that this market is not a vacuum. It is filled already, and if Australian products are to come in, they must push something else out. And they must make their way largely an economic basis. They will get some advantage because they are Empire made. But it is on their quality, on their cheapness and to quite an appreciable extent on their attractiveness that they must really depend.

Souls and Stomachs

Wickham Steed in the Review of Reviews (London): We need to be careful how we set about the business of making a better world. Something besides money and wealth has to be taken into account. The people who believe that everybody will be happy with his wages or comfortable incomes, forget that there is a spiritual side to human beings, and that the spirit may be nearly if not quite as important as the body. The other people who insist that the spirit alone matters, and that the chief thing is for them to "save their souls" by taking refuse from worldly evils in an other-worldly creed, forget that some degree of bodily comfort is indispensable to human welfare.

Minard's Liniment relieves pain.

An prehistoric skeleton has been found, its legs wrapped around its neck. This would seem to indicate that the dickey seat is older than we had supposed.—Greenville Piedmont.

"Was Maude in a bright red frock at the dance?" "Some of her, darling; some of her."

Steel Tires For High Speed

Rubber Tires Have Reached Their Limit of Endurance

Steel automobile tires may be the next major development in supersped racing, believes Capt. J. S. Irving, British automobile expert, who designed Major H. O. D. Segrave's Golden Arrow.

Captain Irving is of the opinion that the present-day rubber and fabric racing tire has about reached its limit, as far as withstanding terrific force is concerned. If the speed record goes much higher, he says, steel tires may have to be put into use. . .

The tires on Major Seagrave's car, built at a cost of about $2,500 each, were designed to withstand a speed of 240 to 260 miles an hour for one minute. Major Seagrave set the new world record at 231 miles an hour.

Hazard in Tires

"One of the great hazards of high-speed racing," Captain Irving says, "is in the tires. I have been considering using steel tire for some time, but I'm not ready yet to let a man risk his life with them."

The British motor expert believes there is no calculable limit to the speed at which a man can travel in an automobile as long as he is protected from the wind by an inclosure and moves in a straight line.

If the limit ever is reached, he believes it will be in the neighborhood of 350 miles an hour for two-wheel-drive cars and 400 miles an hour for cars with four-wheel drive.

A QUICK WAY TO END BABY'S UPSET SPELLS

"Like other young mothers, I worried every time Baby cried," says a Syracuse, N.Y., woman. "Several times when she was upset or constipated, I tried castor oil but she couldn't retain it. Our doctor told me to try Fletcher's Castoria because it is harmless and babies like it. That ended my worries and I've used it since for all my children." Castoria never fails to delight mothers by the quick way it ends those upsets of babies and children, such as colic, constipation, colds, etc. That's the reason for its tremendous sale and popularity. Like all good things, it's imitated, but genuine Castoria—the purely-vegetable" product — always bears the Fletcher signature.

MINARD'S "KING OF PAIN" LINIMENT

The invisible difference

Many motor oils look alike, but there is a vast difference in the way they perform. Unfortunately this difference is difficult to detect.

The invisible difference which makes one motor oil better than another must be inherent in the crude from which it is made.

There you have the reason why Marvelube gives better engine lubrication than oils refined from ordinary crudes. Imperial Oil searched the world over for a better crude—and in South America they found it. From it they make Marvelube—a pure, carbon-free, full-bodied oil that resists the extreme heats and pressures of modern engine operation.

Aircraft operators prefer Marvelube because better lubrication means greater safety and longer intervals between overhauls. Motorists prefer Marvelube because it is the ideal oil for modern motors. It ensures greater power, greater flexibility and greater economy.

There is a grade of Marvelube refined to meet exactly the specifications of your car. Consult the Marvelube Chart at Imperial Oil service stations and dealers.
