Speed Wagon Economy

Now More Important Than Ever to Truck Buyers

CPEED Wagons offer a combination of Dexpense-reducing features found in no other trucks today!

Notable among these is the famous Reo Gold Crown Engine now in its second record-breaking year. The fine construction of this six cylinder engine itself is typical of that in every part of Speed Wagons from radiator to rear axle. For example:

Its engine block is chrome nickel alloy iron -with seven times the wear resistance of the usual block. Lo-Ex pistons are used each outlasting "two to three" ordinary pistons.

Seven-bearing crankshaft . . . fourwheel, two shoe, internal hydraulic brakes . . . built-in magazine chassis oilers and other features.

There never was a time when Speed Wagon means more to buyers of economical, longlived, high-speed commercial vehicles.

Wheelbases up to 210" . . . all sizes up to 15,000 pounds net pay-load capacity with trailers . . . high pressure or balloon tires,
