Blossom time is here again and we are quickly forgetting about the cold winter we just passed through. These warm days are bringing on the grass trees and gardens very fast. It is much further advanced now than this time last year.

This week the Editor received three photos from Mr. Frank Turner, of Montreal. They were taken on May 24th, 1897.

We placed them in the Record office window and they surely have attracted great attention. Mr. Hewson seeing the photos said, he had some that belonged to the same set. They were given to him by Mr. Turner before he left Jarvis. So he very gratefully loaned them to us and we placed them in the other window.

We wish to thank Mr. Turner for his thoughtfulness in sending the photos to us. He says he would like to hear something from his old friend T. Butcher also H. B. Roberts whom he says is a real Poet. How about it Mr. Roberts and Mr. Butcher.

THE LINK OF LOVE

Mother's thoughts are linked with Love,
Thinking of those most Dear,
Some have passed into the world beyond,
Others scattered far and near.

Silver threads adorn her head,
Her three score years are past,
And she awaits with a calmness that is supreme,
For the call of the Trumpet Blast.

The call of her Master's voice,
Who has ever been her guiding star,
Since her soul was born in from the East,
And now travelling towards the West afar.

Great God of Love and Saviour too,
I thank Thee for my wonderful Mother,
She has always been my greatest Pal and Friend,
And it is true, there can be no other.

These verses were written and dedicated, by the Editor, to his Mother on her seventy-fifth Birthday, two years ago.

Notes and Comments

The war burden of Great Britain, paying for past wars and preparing for future ones, calls for the expenditure of \$5,000 a minute. The war burden of the United States exceeds this amount by \$200. Think what could be done toward solving the problem of the unemployed, with such a vast sum, which is being thrown away by the two most powerful governments of the world! If that does not make the public wonder what their future will be then we may as well walk blindly on and hope for the best.

It now transpires that the angels of Mons which were repeatedly seen during the World War were motion pictures thrown upon screens of foggy white cloud-banks. The machines were mounted in German aeroplanes, flying over the British lines. The object was to frighten the superstitious. It succeeded very well when tried on the Russian front, but did not work so well on the British.

The Secretary of Agriculture, in the United States, declares that as a result of the four million dollars expended in Florida in the past ten months, there has not been seen one adult fruit fly since last August, and not one case of infection since November. This looks like a complete victory over the fruit fly; and let us hope so.

What is wrong with America, most prosperous country of the world, which cannot build prisons, fast enough to hold the mobs of bootleggers and etc. being jammed into them, these days, while in Britain, which has had an unemployment problem ever since the World War. Prisons are being demolished everyday. Britain now has only half as many prisons as they had a century ago, and has closed twenty-seven since 1911.

Mr. Edison said that in five years more at the rate things are going, it will not be necessary for the human family to work any more. No doubt he is right. But the interesting thing about it is that they will still have to eat, and if they cannot get any work, who is going to have machinery do all your work, if you own the machinery, and can sell its products to somebody else, but what if somebody else owns the machinery and leaves you high and dry with no work and nothing to eat?

The more quickly milk is cooled the higher the quality will be when it is delivered to market.

The massive arm on the statue of General Brock, which has pointed across Lake Ontario from Queenston Heights for many years, and which was blown down last summer, will be restored at a cost of \$10,000.

Well made apple sauce is none less delicious because it is a common article of diet, and it will do irreparable harm to the fruit industry if members of the House of Commons are allowed to use "apple sauce" as a term through which to express their anger and disapproval. The fruit industry in Canada is hard pressed already. Our members should use "prunes" or exotic fruit as a symbol of something positively distasteful.
