

Governor-General Sets High Ideals

Tells T.C.S. Boys of Great Future that Awaits Them

EMPIRE BUILDERS

Port Hope.—Envisaging Canada in the future as "one of the greatest units of the Empire," His Excellency the Governor-General, recently made a strong appeal to pupils of Trinity College School to fit themselves for the part they would have to play in the future conduct of the nation's affairs. The address was delivered at the conclusion of celebrations which marked the opening of college's new buildings by the Governor-General.

Lord Willingdon addresses the boys. "It is you—the younger generation—where lies the responsibility of the safety of our country, which is destined to become one of the greatest units of the Empire. You will be responsible for the future of the greatest Empire the world has ever seen."

"I like to think of the British Empire as a great estate," the Governor-General said, "over-which our beloved Sovereign reigns and in which we are his agents. Wherever you go and whatever you may become, make it your purpose and duty to build up the Empire in every way possible."

Speech Conveyed By Wireless

Message Transmitted from England Features Opening of Convention

VOICE IS DISTINCT

The Royal Society of Canada officially opened its session at McGill University, when Sir Ernest Rutherford, president of the parent society, spoke to the meeting by wireless from Cambridge, England.

The speech was transmitted by telephone to London and then relayed to Bodmin, Devonshire, via Bridgewater. There it was converted into radio and was picked up at Yamachiche, Que., whence it was relayed by the Bell Telephone Company by wire directly to the hall. Sir Ernest Rutherford was the first man in human history to hear sound transmitted by radio, which he did in 1897 at Cambridge.

Shamrock V. Wins Third Test Race

America's Cup Challenger Crosses Line Two Minutes Ahead of Candida

Southend, Eng.—Shamrock V., Sir Thomas Lipton's challenger for the America's Cup, won its third successive trial race recently by beating Candida and Cambria over a straight course of 40 miles extending from Harwich to Southend. Shamrock V. won races on Saturday and Monday over a triangular course against the same opponents.

The Lipton racer was timed at five hours, one minute and six seconds, which did not include her time allowance of eight minutes. Candida was second, and Cambria, third.

Shamrock, beating against a north-west breeze, came up on a port tack and crossed the line two minutes ahead of Candida.

Scores Lose Lives In Quakes, Fires

Death Toll in Central Europe and Asia Mounting

London.—Floods, earthquakes, fires and mud flows took 63 lives in Central Europe and Asia during the past few days, as advices received in London indicated recently.

The heaviest casualties occurred on the island of Java, where 45 persons were killed by a mudflow from the volcanic mountain of Telemojo between Batavia and Surabaya.

Only five inhabitants of the village of Likasan escaped the flow, and the entire settlement was wiped out.

An earthquake at Shiraz, Persia, caused the deaths of ten persons and devastated a large area.

Channel Deepening Project Rushed

Contract to be Awarded When Totals Are Calculated

Ottawa.—Tenders for a contract which amounts to about \$7,000,000—perhaps the largest of the kind ever awarded at once—were opened at the Marine Department for dredging the 35-foot channel in the St. Lawrence River between Montreal and Quebec.

Four bids were submitted. They came from the National Dock & Dredging Company, the Canadian Dredging Company, the Great Lakes Dredging Company with A. W. Rogerson, and the General Dredging Company, Limited.

Owing to the necessity of figuring out the quantities the lowest bidder has not yet been announced.

Pensions Bill Passed By House

Rapidly Endorsed and Sent on for Senate Consideration

Ottawa.—Just to show the Canadian people that it can forget party politics when a commendable national issue presents itself, the House of Commons recently broke all records by despatching the Pensions Act amendments from resolution stage right through third reading. When the House finished with the measure it was ready for the Senate—a remarkable record of speed and despatch.

The bill upon which the members gave their astonishing exhibition of concord was that providing for more generous treatment of the returned soldiers in respect of their pension allowances. The measure revises the machinery for dealing with appeals of war veterans from the Pensions Board and gives war veterans the advantage when there is reasonable doubt as to whether his incapacity is due to war services.

Theft of Mail-Bag Brought Up in House

London, Eng.—The theft from a Montreal mail-bag in transit to Belfast on May 12 remains a mystery.

The Postmaster-General, answering Major R. Ross (Conservative) in the House of Commons, said that a registered packet was abstracted. All proper precautions were taken during transmission, but it has not been found possible to ascertain where the loss occurred. Investigation in the previous case when Montreal mail was tampered with via Queenstown had also produced no clue.

Major Ross suggested that there had been carelessness, but the Postmaster-General demurred, seeing that hundreds of thousands of packages were handled.

"Hello! Australia, This is Holland"

Amsterdam.—A new and invisible link uniting the far ends of the earth was completed on May 15 through the opening of telephone connections between the Netherlands and Australia, via England. A three-minute talk costs about \$33, and every additional minute \$11.

In the course of this month Denmark, Germany, Sweden, Norway, Poland, Danzig and Czechoslovakia are to be admitted to telephone traffic with Australia, via the Netherlands and England.

R-100 Delayed At Wash of Ottawa

Drigible Will Not Start Ocean Flight Until After Dominion Parliament Ends Session—Trial Trip Is Successful

Cardington, Eng.—The R-100 finished her trial flight a few days ago. "It was entirely successful," in the words of Squadron Leader R. S. Booth, the ship's commander.

Before she had returned, the Air Ministry in London made the announcement that the flight of the R-100 to Canada would be deferred a few days, until the Parliament of Canada has concluded its sessions, probably at the end of the month. The postponement was decided upon after consultation with Ottawa.

Commander Booth was highly pleased with the airship's behavior. He said the new Rolls-Royce Condor engines had been tested at all speeds, reaching a maximum of 80 knots an hour. The reception of weather maps by television apparatus had proved satisfactory, and augured well for the dirigible's ability to keep in touch with conditions during her westward flight.

Brown's Boxes Open Money Still Mystery

Reveals Lottery Tickets, Canadian Stamps — Stolen Money Still Mystery

Mexico City.—The opening of two safety deposit in the National City Bank rented by the late Tom Brown, former Mayor of Stratford, Ont., revealed nothing that would aid in explaining the disappearance of more than \$200,000, those in charge of the case announced. One box was empty, and the bank's records revealed that it had not been opened since being rented in January. The other box held various effects and papers, none of which were of any great interest.

Another Graf Trip Ends Successfully

Rio to be Next Stop

Pernambuco, Brazil.—The dirigible Graf Zeppelin, for the first time crossed the Equator recently and made her way to the Southern Hemisphere.

Her ropes fluttered to the ground, where they were seized by Brazilian soldiers forming the newly trained ground crew. Amid a furious din from thousands of spectators and a bedlam of horns and sirens, she was snugly tied up to her specially built mooring mast.

During the night the Graf was laden with water, fuel gas and a new load of provisions. At day break Dr. Hugo Eckener, despite the fatigue of the transatlantic flight from Seville, headed her still further southward to Rio Janeiro.

Canada Vs. U.S.

1. Canada built, and sent the first steamer across the Atlantic.
 2. Canada built and demonstrated the first compound steam engine.
 3. Canada built and demonstrated the first submarine telegraph.
 4. Canada built the first railway sleeping cars.
 5. Canada originated the idea of making paper from wood pulp.
 6. Canada originated the game of ice hockey, which now ranks second only to baseball as a professional sport in the U.S.
 7. Canada built the first electric stove.
 8. Canada originated the idea of electric heating.
 9. Canada made the discovery of calcium carbide.
 10. Canada originated the idea of the panoramic camera.
 11. Canada originated the idea of standard time.
 12. Canada originated Marquis and other kinds of wheat.
 13. Canada first isolated helium in commercial quantities.
 14. The idea of the telephone originated in Canada and the first long distance trials were made between Bradford and Paris.
 15. Canada gave to the world the idea of the all-electric radio.
 16. Insulin was discovered and developed in the University of Toronto.
- It is true that the United States, and not Canada, gets the credit of nearly all of these achievements, but this fact in itself proves that we are not as Yankeeified as some would have us believe.—MacLean's Magazine.

Save the Flowers And Enjoy Beauty

An appeal to motorists to protect wild flowers and shrubbery along the roadside, which add so much to motoring in this early spring, has been broadcast by T. C. Kirby, general manager of the Montreal Motorists' League. It has been observed that while thousands pluck wild flowers with some degree of consideration for the trees and branches, others are highway disposers and tear away bouquets and whole bushes with which to decorate their homes for a few days.

Atlantic Salmon Visited Niagara

Strange Facts Revealed at Opening of the Royal Society of Canada

Montreal.—The days when Atlantic salmon clogged Canada's inland waters from the Gulf to Niagara Falls and the Don and Humber Rivers at Toronto were so alive with the fish that one could easily spear 20 in an hour, were recalled along with other interesting and strange facts in the papers presented at the opening sessions of the Royal Society of Canada annual meeting.

Dr. W. Sherwood Fox referred to documents dating back to the latter part of the seventeenth century and covering the period up to 1840, during which Atlantic salmon were so abundant that in one stream in New York State the farmers were forced to clear the streams with pitchforks in order that the current might not be obstructed. Salmon furnished a rich source of food for eight months of the year. In 1840 the salmon began to disappear until they became practically non-existent in these waters.

"Empire Loaf" Demonstrated

London.—A movement of interest to the wheat growers of Canada lies in the series of demonstrations begun by a London departmental store of the "All-Empire loaf."

Housewives are urged to test and taste the bread, and announcements are being broadcast in the newspapers upon the value of bread made from eighty per cent. of Canadian wheat flour and twenty per cent. English wheat flour.

Many firms are placing the fact that the flour used in their bread is Empire Wheat, and numerous millers are issuing certificates that their flour contains only Empire Wheat.

Whether intentionally or otherwise, this Empire loaf demonstration will do much to counter the Free Traders' dear loaf cry, which proved so efficacious in previous fiscal contests.

Possibly we can take care of the ex-soldiers, but if the veterans of government commissions ever get pensions, we're sunk.
