CREAMERY MONOXIDE

Since Thorne has returned to his old job, Stoney and Johnson are enjoying a few hours leisure each day.

Since Muriel took charge of the Elliott-Fisher while Laird took his holidays, she may be a bit backward about going back to her old job when he returns.

Newt had a mishap on Gibsons Hill on his way to Hamilton one day last week.

Another automobile salesman took up considerable of Stoney's time again the other day. One of these times he is going to get extravagant and buy a new car.

The way Stewie is scribbling up the butter boxes these days it wouldn't surprise me to see him get a medal for cleanliness.

Jim contemplates a holiday at the end of this week. He wants to make sure his rocking chair is in good shape for the relief engineer.

Thorne says that getting your tonsils out may be O. K. but from now on he's going to keep his in.

Muriel intended taking a half holiday on Wednesday last, in order to make preparations for a very important event that evening.

Dell certainly improved the appearance of the paint when he white washed it, probably that is why he got so much on himself.

Jim put on so much weight during his holiday that he finds it almost inconvenient to sit in his easy chair.

In response to the pleadings of the office staff for a treat, Hank Cole brought them each an all-day sucker which he thought was appropriate to their actions.

Newt's casual appearances in Hagersville gives us the idea that someone must have returned from Detroit. George borrowed his car the other night to take in the show in Hagersville.

Automobile salesmen are still pestering Stoney, he says the first one that allows him for the extras on his machine will make a deal.

Stewie went to a painless dentist the other day to have a molar extracted and he says it was pain less aches.

—Recalling the case of the four American tourists who were fined \$100 and costs each in Simcoe police court in connection with the seizure of beer on the docks at Port Dover at the close of the ferry season, the recommendation of the court that the liquor confiscated be appraised and a drawback be given to the victim of folly, has been acted upon in accordance with the suggestion.

Memorial Window Unveiled in St. Paul's Church, Port Dover

"In the faith of Jesus Christ we unveil this window, erected to the Glory of God and in loving memory of William Francis Tibbetts and his wife Charlotte Emily, by their family. In the name of God the Father, God the Son and God the Holy Ghost."

"Within its hallowed light let true Faith, the Fear of God, and Love of children for their parents and parents for their children ever remain and abundantly flourish. We set apart this window—a grateful tribute of filial love to lives of godly piety and loving deeds, to praise by its silent beauty the most holy name of Him who said 'I am the Light of the World,' who now liveth and reigneth with the Father and the Holy Ghost, One God, world without end."

"Blessed by Thy name, O Lord, that it hath pleased thee to put into the heart of Thy servants to erect this window to Thy honor and glory. Bless O Lord, them, their families and their substance and accept their gift; and grant that all who shall rejoice in its light may let their light so shine that men may see their good works and glorify our Father who is in heaven."

The above formed the special dedication ceremony in St. Paul's Church, on Sunday morning, when the beautiful memorial window to the memory of the late William F. Tibbetts and his wife was dedicated. A large congregation attended and the entire service was most impressive. The second hymn, "For all thy saints who from their labors rest," was read in part by the Rector, Rev. D. J. Cornish, the remaining verses being sung by choir and congregation. As the reverend gentleman explained when announcing the hymn, it represented the three phases of the christian church: (i) the church militant; (ii) the church expectant; and (iii) the church triumphant, or as we say "the resurrection."

The lessons for the morning service were taken from Isaiah 6 and Luke 10:17, and the special psalms for this memorial dedication service were the 83rd and 96th psalms, both of which were most befitting and appropriate.

JOHN SQUIRE DECOR.

The death of John Squire Decoe took place on Saturday. The deceased was in his 75th year. Death occurred following a very brief illness and it came as a great shock to his many friends, who had seen Mr. Decoe about only a few days previous, and seemingly in his usual health. He was very well and favorably known throughout Norfolk county; was a member in long standing of St. Paul's Presbyterian Church, Simcoe, and also a member of Waterford lodge, A. F. and A. M. and Court Simcoe No. 166 I. O. O. F. One daughter and two sons, Miss Catherine; Russell and Frank all at home; and four sisters and one brother, Mrs. Frank Smith, Port Dover; Mrs. John Chalwick, Woodhouse; Mrs. Wesley Lewis, Charlotteville; Mrs. Isabella Wilkinson, Toronto, and Culver A. Decoe, Sacramento, Calif., survive. The funeral was held from his late residence Lot 3, Concession 12, Townsend twp., on Tuesday, with interment in the family plot at Oakwood cemetery.

Here and There

(618) Western Canadian cattle almost swept the boards in 16 classes at the Washington State Fair just concluded at Yakima, Wash., when the Holstein show herd owned by the Canadian Pacific Railway Supply Farm at Strathmore, Alberta, won fourteen first prizes and nine seconds, also taking senior, junior and grand championships in both male and female classes.

A 35 1/2-lb muskallonge, largest to be taken from the waters of the French River this year, was caught a few days ago by F. R. Spotted, a visitor from Houston, Texas, and was entered in the annual competition for the French River Bungee-low Camp Trophy. The monster was landed after a thrilling fight that lasted forty minutes during which it broke water a number of times. When netted it was found to measure 49 1/2 inches in length and 25 inches in girth. A little later the same fisherman caught an 18-pounder musky.

Modern developments in railroad traffic leading to heavier trains and increased speed is bringing about a concentrated study of the rail men, according to Grant Hall, senior vice-president of the Canadian Pacific Railway, interviewed recently. The railway, he stated, has used 100-lb. rails since 1921 and has more than 4,000 miles of this weight of steel, particularly in the heavy travel districts between the larger cities and the Rockies, but the heavier trains made possible by greatly increased engine power have combined to bring up the question of 130-lb. rails which is now being studied and on which a final decision will soon be reached.

The history of the folk song in Canada will be illustrated at the Quebec Festival of French-Canadian Folk-Songs and Handicrafts which will be held October 16-18 next at headquarters at the Chateau Frontenac. The Canadian Pacific Railway has again planned a comprehensive series of evening concerts of folk-songs, folk-music, dances, choral arrangements and children's play parties and dances.

All alarmist talk of world over-production of wheat is wholly unwarranted, according to Dr. W. W. Swanson, head of the department of economics at the University of Saskatchewan, interviewed on board the Empress of Australia on his way to the Imperial Economic Conference. He instanced in support of his view the fact that in the midst of the campaign to reduce wheat acreage in the United States, a drought had occurred which had reduced the total yield of cereals grown by more than the average wheat crop of the country.

For the second time in two years the Shonnessy Shield, emblematic of the First Aid championship of police forces in Western Canada, has come to rest in Vancouver. It was won by the Canadian Pacific Railway police team of that city under the leadership of Constable W. E. Darrnell.

Reports from Gloucester recently state that the sewerage works of the town had failed during the recent heavy rain. The sewage was discharged into the harbor and the water was so polluted that the fishery was almost entirely ruined. The town council has decided to spend \$10,000 on a new sewerage system.

WANT ADS.

Potatoes—Anyone wanting their winter supply of potatoes can obtain same from William Hopkins, Jarvis or Geo. Bowman, Hagersville. (30) For Sale—Cheap for quick sale. Valuable house and lot on Main Street. Jarvis, Apply to Clayton Reichheld, Caledonia. 25

HEALTH SERVICE Of The Canadian Medical Association

CLEAN HANDS

Our hands are in constant use and, in the course of a few hours, they come into contact with a considerable number of articles. It is because our hands are used so much and that they are consequently almost sure to be soiled that, unless properly cared for, they may be our greatest enemies.

In previous articles we have stated that the germs of disease leave the body in its secretions. The secretions from the nose and mouth are those which most frequently carry disease. We should always deal with such secretions as if we knew them to contain disease germs. The spread of disease depends upon whether the germ-laden secretion from one person gains entrance into the body of another person.

The spread of disease may be direct, as when the germs are transferred by the droplets which are thrown out into the air by uncovered coughs and sneezes. It may also be indirect, and it is in the indirect spread that the hands play an important part.

In considering the indirect spread, there are two important points to be kept in mind. Disease germs die comparatively quickly outside of the body. They require heat and moisture to preserve their lives; drying destroys them, and sunlight kills them.

What we have most to fear are the fresh, moist secretions. As our hands are warm and humid, germs can and do persist on them for some time.

In using the handkerchief, in covering a cough with the hand, we are almost sure to soil our hands with the nose and mouth secretions. If we then shake hands with someone, we transfer some of our secretions to the hand of that person. If our hands are soiled, we soil objects which we touch, such as a door-knob; someone else may touch these objects after we do, and so, indirectly, the nose and mouth secretions of one person are passed to the hands of another.

There is no reason, however, why this should alarm us. It has, nevertheless, a very practical lesson for us, and it is the purpose of this article to bring this lesson to the attention of our readers.

As long as disease germs remain on the hands they cannot do any harm. They must gain entrance into our bodies if they are to cause mischief. We can quite readily protect ourselves from the dangers with which our hands may threaten us.

First of all, we should keep our hands away from our faces, excepting when using a handkerchief, or when eating, or using a toothbrush. It is a dangerous habit, that of touching the face, and particularly the lips, with the hands.

Most important however is that the hands should be thoroughly washed before food is touched. Remember always to do this, and you will have put into practice a habit which will do much to protect you from disease.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Twenty Years Ago From The Record's Files for the Year 1911

WEDNESDAY, OCTOBER 11, 1911

Mrs. S. Brunwell, who has been spending a couple of months with her mother, Mrs. Histed, spent a couple of days with her brother George Histed, this week. She returned to her home in Toronto today.

Miss Letta Butler, after a pleasant visit at the parsonage and also in Toronto, left this morning for her home in London.

Mr. and Mrs. Wm. Start have returned from their honeymoon trip and have now settled down to the stern realities of life. That their future may be one of health and prosperity is the sincere wish of their friends.

Miss Margaret Porter was in Simcoe from Friday evening until Sunday with her sister.

W. E. Sowler and daughter Miss Evelyn have returned home from a visit with friends in Michigan.

Dr. Milton Jones and wife of Vancouver, B.C., spent the past week with Mrs. W. E. Armstrong.

C. E. Bourne's many friends will be sorry to hear that he is suffering from a severe attack of eczema.

Mr. and Mrs. A. R. Thompson of Simcoe and Miss M. Duncan of Port Dover are visiting Mr. and Mrs. G. Steele.

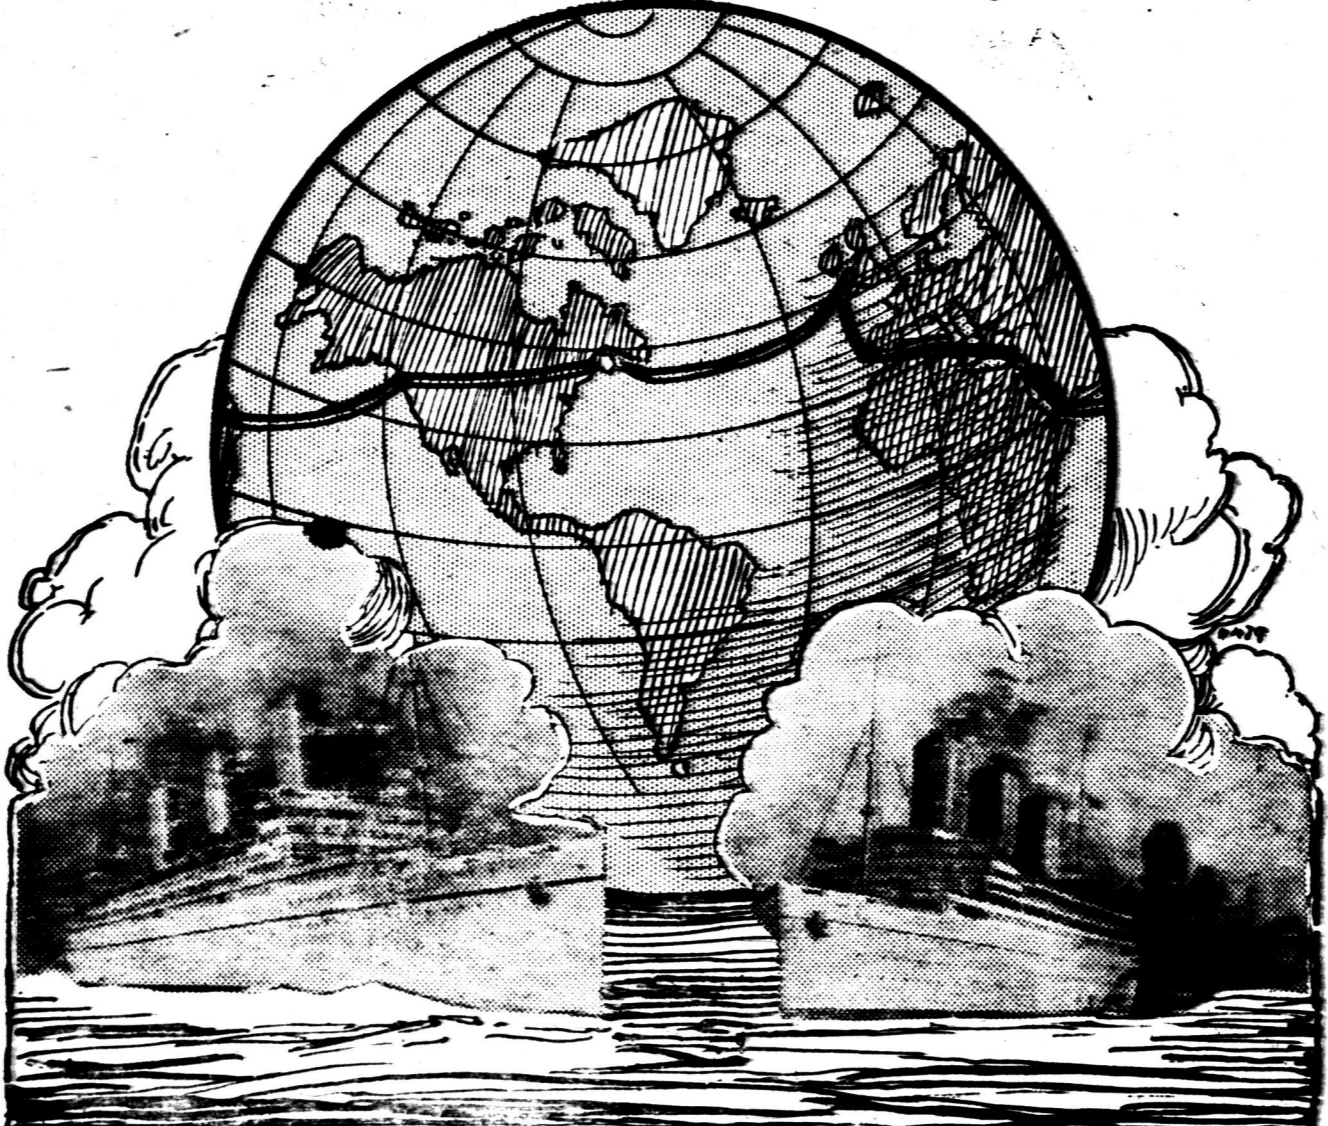

Mr. and Mrs. Geo. Histed spent Saturday evening and Sunday at Victoria.

Chas. Reichheld of Rainham is likely to be appointed as Licensee Commissioner in Haldimand, to succeed the late Geo. Hassard.

This is the season for auction sales. When you get your list made out

bring it to the Record where your bills will be printed on the shortest notice. Pay the printer and the preacher. You're sure to get your money back. The printer tells you the news about this world and the preacher tells you about the one to come. Mrs. Andrew Rodgers spent from Thursday night until Saturday morning in Hamilton at the home of Robert Rodgers. We are very sorry to report that Mrs. Robert Rodgers who has been ailing for the past few years is at present in a very critical state of health. The poorest policy and the worst economy is to keep the children out of school. Every day lost has its manifold effect. The knowledge that should be gained on that day is missed, the pupil is thrown behind, becomes discouraged, has a bad effect on the class, and it is a habit to be avoided. A call has been extended to Rev. Church, from the Presbyterian congregation of Roleau, Sask. (Kenora, Man.) has also given Mr. Buchanan an unanimous call. A meeting of the Presbytery at Hamilton has been called for next Tuesday to deal with these calls and at that meeting it will be decided whether Mr. Buchanan will be transferred to one of these western charges. Glenora is an important town in a sparsely settled district in Southern Manitoba on the Glengarry branch of the C. P. R. Rouleau is a seven year old town of 1000 inhabitants on the S. W. line of the C. P. R. and is said to be one of the best districts in the West. Both the people and the land are fertile and offering good opportunities of work. Mr. Alexander MacLaughlin, who has been engaged as butter maker for Wm. Pashley during the past summer, left last week for Delhi to take charge of the butter factory. No more than you can eat enough in one day to last you a week, can a business man advertise enough in one week to last a year. The farmers are busy fall plowing, gathering roots and apples in this locality.

The Great White Fleet

Canadian Pacific Empress Liners on both oceans will all be painted white when the Atlantic ships, Empress of Australia, France and Scotland have been metamorphosed to this color. The Pacific fleet always was white and the new giant vessel, Empress of Britain, now building, will be white also. With the opening of the St. Lawrence season of navigation next April, the Canadian Pacific will possess the greatest white fleet in the world. The ships are to retain the familiar buff-yellow funnels and ventilators and will have white upper works and a white hull relieved with a blue streak. Above is the artist's conception of the Empress of Britain when completed, shown on right with Chateau Frontenac, Quebec in background and the Empress of Japan, biggest ship on the Pacific. The ships were depicted by O. F. Pennington, marine artist of note and an officer in the Canadian Pacific service.
