GROFF GLADIOLUS.

(Continued from page One)

Germany and many other countries run into extensive figures. Groff by means of numerous displays in the Royal Botanic Gardens, Kew, England, the Imperial Botanic Gardens, Tokyo, Japan, and the Public Gardens of Johannesburg. He had over 300 correspondents in different parts of the world.

Cowee's Glad. Gardens at Berlin, N.Y. became a rendezvous for gladiolus lovers from all parts of the United States and Canada. Mr. Cowee published many beautifully illustrated catalogues featuring Groff's hybrids, which he grew and sold exclusively.

During these years Mr. Groff issued thousands of bulletins and delivered many addresses to plant breeders throughout America, dealing intelligently and exhaustively with the general truths and principles of plant breeding deduced from his own discoveries in hybridizing the gladiolus.

At a convention of the International Plant Breeders' Association in New York in 1902, attended by the most eminent breeders in the world, he threw a bombshell among his great audience when he exploded in convincing terms the theory held by most hybridists up to that time that the most valuable results were obtained by breeding back to the "wild" species. He pointed out that his own originating plants of greatest vigor and vitality had been produced by crossing "tame" species. Shortly afterwards the department of agriculture at Washington paid a notable tribute to him when it declared: "The Groff gladiolus will solve one of the most important points in the breeding of plant and animal life." The department sent one of its most distinguished specialists, Professor Harter, to make a microscope examination of his work.

By 1914 Mr. Groff had reached the peak of his career. He was independently rich and his name was firmly established for all time in the world of plant breeders. Suddenly he announced his impending retirement from what had been virtually his life's work. He had neglected his banking career to devote the best years of his life to hybridizing the gladiolus. But a quarter of a century in this exacting profession was sufficient even for a man of Mr. Groff's dynamic energy. "Frankly, I was tired," he now declares in retrospect. "I felt that I had made some little contribution to the science of plant breeding and perhaps had brought some honor to my home town and country. I was satisfied to stop."

RETURNS TO BANK.

Fixing Up Furniture.

Removal of old varnish, oil and dirt, and a tubular plane fine sharp saw or sand paper.

To remove old stains from furniture, wipe the spots with caustic acid; let it stand a few minutes and then rub well with a cloth wet in warm water.

To remove whitish marks resulting from placing hot dishes on the table, pour kerosene on the spot and rub it hard with a soft cloth. Then pour a little spirits of wine or cologne water on it and rub dry with another cloth.

When stain is desired on an article always apply it before the first coat of varnish. Never attempt to mix the stain with the varnish itself.

To get best results apply three coats of varnish to plain surfaces, wearing the first two coats down smoothly (this means very lightly) with the finest sandpaper, the third being allowed to set in its lustre.

To take out bruises beat the parts with warm water, double a piece of brown paper several times and lay it over the bruise, and on this apply a warm but not hot flatiron till moisture is evaporated. Sometimes it is necessary to repeat this process before the rent is raised to the surface.

LOOK AT THE LABEL ON PAPER.

Look at your label—the mailing list was brought up to date this week. If there is any mistake please let us know. The date on your label states the day you are paid up to, if it is not paid up to this October, why—

Now Shocking

When open fields lie shivering in the breeze,
Bold Winter's hand at Autumn's
door has knicked,
Denuded limbs stand bare on naked
trees—
What wonder is it then, the corn is
shocked?

He sold his entire stock of corns, turning over to Campbell Brown, the most valuable hybridist and granting them the right to carry on his foreign trade. In a few months war broke out in Europe, so that from a financial viewpoint Mr. Groff was not a loser. He returned to his bank, to which he devoted all his attention until a few years ago, when he retired from active business life. Having reached the 70th year of an extremely busy life he wanted to enjoy a well-earned rest.

But his inherent desire to fashion nature's secrets as contained in plant life proved irresistible. For many years he had been endeavoring to develop by hybridization a new and superior type of corn. He now concentrated on this effort and today he is about to realize another dream. His corn, known as Groff's Golden, has already made a record in private consumption both in United States and Canada. For flavor and tenderness it is unexcelled. In 1928 the Canadian Canners produced 17,200 pounds of shelled corn from 18 pounds of Groff seed. Kenneth McDonald & Sons, of Ottawa, are featuring it in their catalogues. Of this corn its author states: "I crossed Golden Bantam (female) with Black Mexican (male). It required years to eliminate the resulting black grains, also the pure red and white grains, all of which were discarded as useless. I have now the specimen for which I have striven."

Mr. Groff's present hobby is the iris, and in the last three years he has assembled one of the largest collections in Canada. He has imported roots from England, France, Germany, Japan, and the United States. They include the most valuable specimens on the market for breeding. For two roots of a French variety he paid \$40 apiece. But he is reticent about this new enterprise. "I am not talking yet about the iris. I have produced materials, however, that cannot be bought in the market of the world at any price. My chief ambition is to develop a distinctive, Canadian-grown iris."

No we find this man in his 70th year, a time when most men see redoubt, fighting with new ambitions, brushing with the leading scientific minds of the world and intent upon bringing added lustre to the name of Canada.

Canadian Pacific Contributes to Relief of Unemployment

E. W. Beatty, Back From Inspection Trip, Voices Confidence in Canadian West Despite Depression—Crop Outlook Good—Distinguished Party Makes Comprehensive Tour.

Confidence in the ability of the Canadian West to fare and overcome its problems, and a practical plan for assisting in the relief of unemployment were outstanding features of the annual inspection trip through the West just completed by E. W. Beatty, Chairman and President of the Canadian Pacific Railway Company, and a party of Directors and distinguished guests. Following upon the trip, Mr. Beatty announced the Company's contribution to the general plans for the relief of unemployment in Canada as follows:

After the Conference with the Federal Government an arrangement has been entered into whereby in consideration of the assumption by the Government of interest charges for a specified period on the capital expenditure involved, the company will immediately embark on certain works which had been approved for the future but which in ordinary course would not have been approached until 1931 or 1932. In framing the programme, we have had particularly in mind the desirability of providing some relief to the agricultural industry by furnishing work for farmers and their work animals, and by carrying transportation facilities to those districts where the length of haul to the railway imposes an undue burden on the producer's time and resources. Other works on the list are designed to absorb as much as possible of the surplus labour in the towns and cities.

The program follows: Track will be laid on the branch line now graded from Crossfield Westery to a distance of twenty-eight miles, and on the Lacombe and North Western Railway from Thorsby to a point of junction with the Calgary and Edmonton, 22 miles. Construction will proceed on the section of the Nipawin Prince Albert line from the end of the present grading to Henribourg, a distance of approximately twenty miles, from Medstead to a point on the Debden-Meadow Lake line, a distance of thirty-five miles, from Cumnorth to Rosetown, a distance of twenty miles, and Benlinn eastward for a distance of twenty-five miles, and on the Kettle Valley Railway a link will be built connecting the tracks at the North and the South end of Dog Lake. Rock

ballasting will be taken in hand on an extensive scale on the Lachute subdivision, on the Galt subdivision, and on the Altona district, all in Eastern Canada. Gravel ballasting will be done on the New Brunswick district. One hundred miles of track in Ontario will be re-laid with a heavier rail section, and one hundred and fifty miles of the heaviest rail section so far used in Canada will be laid in British Columbia. The manufacture of these rails will provide much employment in Canadian steel plants, in addition to the labour involved in the actual track work. It is intended to start at once on a program of grading more comfortable roads for long-hauling, more at Regina. Surveys are now being made which will probably justify entering on some grade revision work along the Thompson River in British Columbia and provision has been made for the necessary surveying.

Discussing present conditions and future prospects in general on his return to Montreal, Mr. Beatty said: "We have come back greatly reassured as to the outlook for a steady progression of general business with, in all likelihood, a well defined upturn in volume making itself evident next year."

"Despite conditions in the world's grain markets which leave much to be desired, Western Canada continues to look to the future with confidence, and apparently has quite made up its mind that it will take much more than the present recession in business to work any permanent harm to the West, or even to retard seriously or for any length of time the development which has been going forward over the past decade."

"The crops were, on the whole, very encouraging. The total yield will be considerably above that of last year and greater than was anticipated a month or two ago. While in some districts they were far from good, in the north and more particularly in the Peace River country they were excellent. The quality, too, is generally good, although in some districts recent rain and snow have delayed threshing and may, to some extent, have lowered the grade. The decline in wheat prices naturally had a serious effect upon the purchasing power of the people, and a return to such pronounced prosperity as we have experienced in the past depends to a large extent upon the future course of the wheat markets and that of the markets for such other commodities as this country produces in large quantities. The outlook in this respect is not at the present time clear, but I see no reason to believe that a return to more active business conditions should not be accompanied by at least a gradual upturn in values."

"In the meantime the West is not crumbling. Farmers and business men are facing conditions as they find them with a stout courage born of an unshakable confidence in the country in which they live. There are already evidences that present conditions are bringing about readjustments that in the long run will establish agricultural industry upon a sounder basis. A much wider spread of mixed farming is one of these. If the decline in wheat prices effects this in a general way throughout the West, it will not have been an unmet evil."

Mr. Beatty and his party visited the Peace River on the way west later passing through Banff and Lake Louise to the coast. On board the "Princess Norah" they encircled Vancouver Island and spent two days at Victoria. The return was over the Kettle Valley Railroad to Kimberley and Trail where the Sullivan mine and the Consolidated Smelters were visited. The fruit-growing industry of southern British Columbia was found to be in excellent shape. Large quantities of fruit were being shipped and the quality was reported good. From British Columbia the party returned north to the River on the new bridge and inspected the branch line work going forward there. The return was through Winnipeg direct to Montreal. Travelling with Mr. Beatty were Sir Herbert Holt, Sir Charles Gordon, W. A. Black and R. S. McLaughlin all of whom are Canadian Pacific directors. Others in the party were Sir Arthur Currie, Maj.-Gen. the Hon. S. C. McBurn, Hon. Senator Smeaton White, Mr. Eassey Lesman and Dr. W. W. Chipman.

HEALTH SERVICE Of The Canadian Medical Association

SINUS TROUBLE

It is not unusual to hear that some one has sinus trouble. Sinus trouble means that there is infection, and we know, infection in any part of the body is serious. The infection is the result of the activity of living germs, and if it is allowed to continue, it may result in a chronic poisoning of the body.

The nasal sinuses are the cavities in the bones of the face, which cavities are connected with the nose by narrow openings, and the lining membrane of the nose and the sinuses are continuous.

There is one sinus under the cheek bone, another above the eye, others in the bones behind the nose. Some of these sinuses are close to the brain cavity, and infection close to the vital centres is the sign of sinusitis in such parts.

Sinus trouble occurs when infection spreads from the nose along the lining membrane through the narrow opening into the sinus. Swelling results from the infection, and this swelling may be, and often is sufficient to block the opening, and so the infection is sealed in the sinus. On account of the practical danger of the spread of infection from the nose to a sinus, it is evident that grave trouble may be prevented by taking care of nasal infection—the

common cold.

... could lead to a great deal of trouble and misery. The cold is the greatest nuisance from which we suffer, and, besides, it is most insidious in its effect. A neglected cold is always to invite trouble. If you want to avoid trouble, avoid a cold, and if you are not successful in avoiding the cold, give it early attention.

In the late stages of a cold, the teeth begin to ache with a pressure on the back upper teeth suggests that the infection of the cheek bone is taking place. If one eye suggests infection of the sinus, one eye suggests infection of the sinus located there. The pain may be constant; it may occur during part of the day, growing worse and then easing off.

Infection of the sinuses may follow colds, influenza, pneumonia, measles, scarlet fever, or indeed, any infection of the upper respiratory tract. It is a condition which should be brought under treatment at once, and only is it that the acute stages require proper care, but it is of the utmost importance to secure such care in order to prevent, if possible, a chronic infection of the sinuses.

Questions concerning health, address The Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Twenty Years Ago

From The Record's Files for the Year 1911

WEDNESDAY, OCTOBER 18, 1911

Rev. Robertson of Port Dover occupied the pulpit in Knox church on Sunday, His discourses were very interesting and instructive.

Miss Blanche Buchanan, who has course at the hospital in Toronto, returned home on Monday.

Mrs. Rodgers and daughter and Mrs. E. Gibson of Hagersville was in town Sunday as the guest of Mrs. Bruce Hare.

The damage done by fire at the rear of the Commercial House has been repaired by Andrew Malgo and Ed. Hart.

Mr. and Mrs. Andrew Malgo and son of Rostock, after spending two weeks at the Commercial House returned home on Monday.

Mrs. Allen Ffess of Vancouver, B. C., and her mother, Mrs. Eaid, visited friends in Hagersville several days last week.

Chas. Parkinson returned Monday from Delhi and has resumed his duties at the Imperial Creamery. Mr. Frier returned to Dunnville on Saturday.

It is claimed there are as many microbes on a dollar bill as on a fly. But the dollar bill does not make such desperate and continuous efforts to light on you.

Frank Rodgers visited with friends in Hamilton on Thursday.

Wm. Macheu took the work on the New Credit Mission on Sunday.

James Hodges shipped two carloads of hogs to Hamilton on Tuesday.

Wm. Parkinson won first prize on "Lady Chadwick" at Caledonia Fair. He exhibited the burning of leaves on the streets.

Miss Margaret Crawford spent Sunday with her brother Charles at Doan's Hollow.

Mr. Norris Smithson is tearing down the box stalls and removing them to Bradford to his son, Homer.

Mrs. William Chambers and Miss L. Little spent Sunday with the Misses Dixon in Port Dover.

Mrs. (Dr.) Colman returned home after a week's visit with her daughter, Mrs. Jas. Waddell of Woodhouse. Mr. Eassey Lesman and Dr. W. W. Chipman.

town on Tuesday and the Record staff was treated to a quar of large chateaux.

Fred Colman of Port Dover visited with friends in Jarvis last week.

To err is human; to forgive (the person who found you out) impossible.

W. J. Byrick of Woodstock is visiting for a few days at the Commercial House.

Clifford Rodgers was in Hamilton on Saturday.

James Greydon spent Sunday in Port Dover.

SANDUSK

Messrs. Nathan and Albert Bartlett of Buffalo spent a few days in this burg last week.

Miss M. Burrows left for her home in Lyneside on Saturday, after spending three weeks here as teacher.

Mrs. Rodgers and daughter and Mrs. Gibson of Hagersville spent Sunday with Mr. and Mrs. James Hewitt and other friends.

Miss Bessie Thompson of York returned to this burg on Saturday.

Mr. and Mrs. John Awde of Springdale visited with friends here on Sunday.

Miss Maud Westerby spent the week-end at her home.

Quite a number from here attended the Caledonia Fair.

SPRINGVALE

The Dominion Gas Co.'s men are in our vicinity leasing land and selecting sites for drilling.

Miss Salton was in our burg last week trying to organize a musical class.

... and clear seed threshing is the order of the day. Clover seed is producing about four bushels per load.

... and children brought home from a pleasant visit in Rosford.

A G. B. Ford was in Canada last week.

The Winesap Printing Company has completed its work in Brant county and is now erecting shutments for a steel bridge near Lake Erie in this county.
