**Free Flowing
Fertilizers**

Here are four big reasons why we recommend C. I. L. Mixed Fertilizers to you:

First: Dry, free flowing, they end that costly nuisance, drill-clogging! . . . Save labour!

Second: When you need C. I. L. Mixed Fertilizers—that's when you get them! Drive up and get them—right out of stock!

Third: This prompt delivery service is less costly than the old-fashioned "order-and-wait" method. . . Saves you actual dollars-and-cents, as well as valuable time!

Fourth: Made in Canada.

**Farewell Party Held
For Mr. and Mrs. Royce**

On Monday evening, October 20th, the many friends, neighbors and comrades of the 114th Battalion gathered at the home of Mr. and Mrs. Horace Bradley to bid farewell to Mr. and Mrs. Royce who intend leaving shortly for England. The evening was spent in various games and community singing, but the chief event of the evening was the presentation of a handsome case of silver to Mr. and Mrs. Royce. Mrs. D. Parkinson read the address and Mr. Warren Fleming presented the gift, although completely taken by surprise. Mr. Royce thanked the assembly very appropriately on behalf of Mrs. Royce and himself. After joining hands and singing that old favorite, "Auld Lang Syne" lunch was served by the ladies and a hearty vote of thanks was given Mr. and Mrs. Bradley. After lunch the party wended their way homeward wishing Mr. and Mrs. Royce every success in their future home.

The address was as follows:
Dear Mr. and Mrs. Royce:— We, your friends, neighbors and comrades of the 114th Battalion, have met here this evening to wish you every success in your next venture, we wish you to accept this gift, that when you return to your home in England, it will remind you of this pleasant evening and your many friends in Canada.

Signed on behalf of all,
H. Bradley, Thomas Phibbs, Warren Fleming, J. Awde, A. W. Doughty

Threshing Fires.

On October the 10th last, Fire Marshall, E. P. Heaton, Toronto, called together about 75 men who were threshing machine operators, officers of Mutual Insurance companies representatives of old line insurance companies, and manufacturers of threshing machines, for the purpose of making some effort to arrive at the cause of so many threshing fires during the present year.

In opening the meeting Mr. Heaton told the audience of the appalling loss from this cause during the months of August and September. During that time there had been officially reported to him 54 individual fires, totaling a loss of \$368,537.00. The insurance companies contributed towards this loss the sum of \$209,138.00. The excess sustained by the individual farmers amounted to \$157,400.00. It was estimated by the Fire Marshall that 80 per cent of these fires originated between the blower fan and the blower mouth.

The report thus shows that something is seriously wrong, and that investigations must continue, from a scientific standpoint until the cause is known. Many theories were advanced by those in attendance but the primary cause, which appeared to meet with the approval of at least some of the gathering, was, static electricity, which could be eliminated by grounding the machine. If this should be the cause, it could easily be remedied and at a trifling cost, and we would respectfully recommend to the threshermen of this community, that a trial of this inexpensive remedy be given at least one year's trial. Other arguments were advanced at this meeting, such as the very careless handling of matches, which also should be brought to the attention of those assisting with the work. Ignition from the exhaust pipe of gasoline tractors was also advanced as the cause of many barn fires. While the outcome of this meeting will be eagerly awaited by many interested parties in Ontario, it has already meant this much, that many farm losses are due to pure carelessness on the part of the farmer. The Walpole Farmers Mutual Fire Insurance Company have in the by-laws of the company, and printed on every Policy issued, the following clause: "THAT NOT LESS THAN FOUR PAILS WITH WATER AND AN OPEN BARRELL WITH WATER SHALL BE KEPT CLOSE AT HAND WHILE THERE IS ANY FIRE IN THE FURNACE" This clause should be very carefully considered by every policy-holder before starting to thresh, and its provisions complied with, otherwise, in case of loss, he may find himself in serious difficulty and unable to collect his insurance.
