The stooks of harvested grain to prevent damage by sprouting and also to assist in preserving the natural color of the grain. In the case of wheat grown in Western Canada, particularly fine bright color and lustre may often be expected from grain which has stood in the stack for a time.

The method of threshing the exhibition grain is a matter of importance. A very good plan is to flail the sheaves by hand on acanvas, spread out ont the ground near the stooks or stack, on a bright sunny day. Only a very few strokes of the flail should be given each sheaf as the large, well developed kernals wil roll out first. The kernals remaining in the sheaf may be threshed out later in the ordinary way.

In the case of oats and barley, which sometimes retain lspendages which detract from the appearance as well as from the weight of the grain, various methods may be employed in dressing the sample so that these apendages may be removed. Where a scarifier or scutcher is not available, the grain may be placed in a barel, or some other receptacle and a spade or shovel used to chop off these awns and ends. Care must be taken however, not to remove the **kernals.**

While the hand picking of samples for exhibition should not be encouraged, generally speaking, yet under present conditions, where the exhibition sample is relatively small, the practice can scarcely be prevented.

As early as June 15th there were over 3,000 requests from U.S. citizens for particulars of the forthcoming Canadian National Exhibition, Toronto.

SOFTBALL II—HARDBALL 5

The Softball team put the finishing touches to their season of victories by defeating the Hardball team in the play off on Monday night

The sensational fielding and batting put into effect by the softball team made the hardball team dizzy. As a matter of fact, Church, their famous softball pitcher, rated with none other than Dazzy Vance, had to be taken out in the third innings It was there that the hardball boys went to pieces. However awhole lot of enjoyment has be derived from these games and it is hoped that another exhibition game can soon be arranged.
