From Study of Those

Says Action, Not Size, Berlin.-Dr. Victor Gottheiner, roen

genologist, who invented X-ray motion pictures, has made a special study of the organic constitution of athletes and recently filmed Finish runner Nurmi's heart in action, holds that ath-| letic prowess is not so much a matter ESTLESS? of how bodily organs are made but how they work and that the latter depends largely on what goes on in the brain. He threw on the screen a ree showing the heart and lungs of the our baby fusses, tosses German champion runner, Paul Hempl, in contrast to Nurmi's, and pointed out

come to the conclusion that mere knowledge of the organic structure

was almost meaningless. "When a heart has been cut out of the body," he said, "it is just a chunk of meat. You must know it in action before you know anything useful about it. Take Nurmi's heart: from a static X-ray picture of it no doctor could tell whether it was not enlarged by severe heart disease. A sick heart works unevenly.

and you will see in what perfect rhythm it functions. It shows, indeed, an anomaly in its action unobserved in ordinary hearts; in pumping it turns on its axis through about a quarter circle but that is only because it is so big it otherwise would not find room in his chest Nurmi developed his heart—which is perfectly sound his heart—which is perfectly sound—
to that extraordinary size much the
same way as another athlete develops
huge biceps. But unlike the latter
Nurmi's huge heart demands constant
exercise; if he stopped training very
likely he would fall ill."
