

WITH THE LONE SCOUTS

On October 11th, Thanksgiving Sunday, the Silver Fox Patrol at Pickering held a Church Parade at the local Anglican Church, attending the evening service.

The numbers were swelled very considerably by the members of the Sea Scout Troop from Oakville, under the command of Captain Ritz, and by the members of the 5th Ottawa Troop, who journeyed in by automobile to assist and encourage these Scouts.

The service was conducted by the Rev. Mr. Robinson, father of the Patrol Leader of the Silver Foxes, and the sermon was preached by Mr. Terrell, Scoutmaster of the 5th Ottawa Troop, whose remarks centered on the story of Shadrach, Meshach and Abednego, who were thrown into the fiery furnace.

After the service the Scouts were entertained at the Rectory, where they met other Scouts from Embury, Woodstock, Tillsonburg and London. He tells us that the 1st London Troop turned out in full force to visit their friends at Ingersoll, or they had a great time, which the fully enjoyed.

We are sorry to hear that Patrol Leader Douglas Macdonald of the Bear Patrol at Lakefield has been forced to relinquish the leadership of his Patrol, an illness which the Patrol and the Scout School have lost their old Leaders. However, before leaving...

French Monks in Exile
Build Palatial Monastery
Paris.—The monks that were expelled from France in 1901 have settled in Luxembourg and installed at the Abbey of Clairvaux a monastery described as the last word in architecture and equipment.

The rule of their order is that the monks must provide themselves with everything for which they might need, and the modern disciples have followed both the spirit and the letter of the law.

Among the contents of the monastery a modern library, three storerooms, containing 60,000 volumes; a printing shop, a bookbinding workshop, an electrically equipped dairy farm, kitchen, where cooking is done in hermetically sealed apparatus so that there is no smoke or smell; elevators, an electric bakery, artificially heated cellars, in which summer vegetables are grown in the winter; light railways, which distribute goods throughout the monastery; a mountain railway more than 300 yards long, which connects the monastery with the railway station, to bring in supplies and "export" surplus goods produced in the monastery; electrically operated pumps for watering the gardens and an electric power station, driven by oil-fired boilers to supply power throughout the monastery.

The Dominion First
Montreal Press (Ind.).—(During the year 1930 more than 70,000,000 bushels of Canadian grain were shipped via U.S. Atlantic ports, practically 27 per cent. of the total export, while only 47,337,949 bushels, or 26.4 per cent. went via Canadian ports from the Atlantic and the St. Lawrence.) These figures set out the importance of the grain trade to the Dominion and are working against their best interests.

Food Grown at a Loss
Quebec Soleil.—It is difficult to understand why provisions, a necessity for everybody, have fallen in price so enormously. With cotton, building materials, etc., it is different. You can put off buying a suit or alter the plans of a house, but you cannot go a single day without eating. The consumption of food is practically the same as it was in 1929. It is true that the law of supply and demand must always govern the market, there is no reason why the products of the soil should be selling below cost price. They naturally would fall in price other commodities, but, according to the natural course of things and the laws of economics, they should be, in proportion, much more dear than manufactured products.

British Exhibition Ship
Will Call at 30 Ports
Port-of-Spain, Trinidad.—The British exhibition ship, British Exhibition, scheduled to leave England next month, will call at 30 ports in the Caribbean and South American ports during its year's cruise. At each port the general public will have an opportunity to see exhibits of almost every article produced by Great Britain.

Lord Auckland, one of the directors of British National Exhibition Ship Ltd., announced that the tour was arranged because English merchants feel that now is the time for a new means of approaching the overseas markets.

ing. Doug. passed on the leadership of the Bear Patrol to Lone Scout John Brewer, in whose hands we know that the Patrol will continue to progress. The appointment of a Leader to the Lone Patrol has not yet been made, but is expected shortly, and we are looking forward to his new reorganization.

Lone Scout W. Brown of Sunderland R.R. 1 has written us a very cheerful letter, in which he says that he has been out in this country from England for eighteen months, and he has been working on a farm, which life he very much enjoys. His chief ambition at the moment is to be a King's Scout, and he is working hard to this end. We are sure him lots of good luck and good scouting too.

Don't forget about that Christmas Good Turn Scheme which we mentioned last week!

There are no organizations which cater to Lone Scouts, but the Lone Scout Department does to the Lone Scouts. We do not think, however, that there is any objection to others, working as a Lone Rover. Full information on this subject can be obtained from the Commissioner for Rover Scouts, Boy Scouts Association, 230 Bay Street, Toronto 2.

Lone Scouts and others are invited to send in questions on scouting subjects, which "Lone E" will endeavor to answer week by week in these columns.

Full information concerning the Lone Scout Movement may be obtained from the Lone Scout Department, Boy Scouts Association, at the address given above. All boys between 12 and 18 years of age who cannot join a regular Scout troop are eligible to become Lone Scouts.

Animals in Zoo
Appreciate Audience
Brussels.—Brown bears are susceptible as opera singers, and the smaller apes as sensitive to slights as motion-picture stars. In fact, beasts kept in zoos on the modern terrace, with a ditch two wide to throw across between them and the public, take on a proud and supercilious attitude, entirely overlooking the fact that they are expected to work for a living by providing entertainment, according to reports made for the Antwerp Zoo, which is carrying on an advertising drive to give its inmates at least the illusion of roaming at large.

Antwerp, it appears, are entertaining only when in fairly close contact with human beings, and left to themselves lions and tigers go about their private affairs, care whether the public ever hears a roar or even a growl. They seem unaware that the economic is one of the most pressing aspects of modern life. The Antwerp zoo makes money from visitors, per cent in the gardens and the sale of animals. This zoo has two elephants, two baby elephants, born there, and the other elephants work hard for a living, begging for food or carrying children in their backs. Nearly every cage has an occupant earning his keep in one way or another, and the establishment pays good dividends to its shareholders. The animals are secluded, perhaps they will forget all their prior tricks when there is no hope of tid-bits to encourage them.

Strawberry Vines
Yield Late Crop
La Fleche, Sask.—In La Fleche, situated in the midst of the wind-blown drought-stricken district of Southern Saskatchewan, early this month, Mrs. A. A. Beamish picked more than three quarts of strawberries from her patch of the ever-bearing vines that had been planted in 1929 on a plot of ground about twenty feet square. This is an unusual, if not record-breaking yield for this district in the month of October.

It was only during the past few weeks since rains have fallen in this district that the berries had made any headway this season, as they had been seriously affected by the hot winds and drought.

Engine Built in Rear
The Toronto Daily Star.—The Bell Telephone Company announces that Toronto telephone calls now number over 55 per cent. of the company's stock. It tacitly reveals the fact that they also hold 75 per cent. of the conversations.

France and Germany
Hamilton Spectator (Ind. Cons.).—France and the United States between them dominate the economic situation, and in some quarters there is a fear that the diplomatic conversations will fall short of expectations. The arrangements entered into between Germany and France, while they are hailed as a welcome advance on the road to international understanding and cooperation, may be viewed in an aspect which is not encouraging to other European nations. What has happened is that France agrees to provide the money and Germany the technical skill and equipment essential to a great industrial revival in those countries. They are turning to the Germans to do what they might have done for themselves.

Huge Development Noted
In Southampton, Eng.
Southampton, Eng.—This port, where many visitors get their first glimpse of England, is developing so rapidly that it will soon be in the forefront of British towns, a survey just completed here indicates. The survey was carried out by volunteer workers under auspices of the local Civil Society scheme of town planning.

The publication draws attention to the fact that to the west of the docks where Atlantic liners are berthed, 100 acres of mud flat is being reclaimed. At the same time a new quay 7000 feet long is being constructed, and a graving dock sufficiently large to accommodate a 70,000-ton ship is being built here.

The present ocean dock was opened in 1912 and can accommodate four of the largest liners at one time. The new dock will be 12,000 feet long, will contain about 260 tons of water, and will be the largest graving dock ever built.

Fowls Escape Hunter's Guns
Oklahoma City.—Despite the army of hunters that swarmed the fields, this fall to shoot prairie chickens, more than 50,000 of the fowls escaped, it was estimated by Ben Mobley, head of the Oklahoma game and fish department.

The prairie chickens is an elusive target, much harder to hit than quail, hunters maintain. For this reason many of the birds survived.

An open season was declared on the work of its foreign competitors. Hollywood, owing to the fall of sterling, is faced with a much less profitable British market. The new pound combined with the quota system and enterprise at Elstree should transform every cinema theatre in Great Britain.

Noise Abatement Move
Planned by Oxford
Oxford, Eng.—A society for the abatement of noise caused by motor traffic has been formed here, and is the first of its kind in Britain.

This noise and its accompanying vibration are said to be a menace to the safety of colleges and historic buildings, and a serious hindrance to study. Already more than 100 subscriptions for the society have been received from the occupants of houses in two roads alone. It is thought that many other towns will hasten to follow the example set by this new Oxford movement.

By the looks of it the new English car featuring engine at rear meets the approval of this fair sex.

Canadians Planning Now For Eclipse in August, '32

Montreal.—A rare opportunity for Canadians to view from a convenient point a total eclipse of the sun, and one which will not be repeated for 27 years, will be provided on August 21 next year.

The "zone of totality" is roughly 100 miles wide but for scientific purposes it is desirable to be located as closely as possible to the central line. In the 1932 eclipse this line will cross the Canadian National Railway between Montreal and Quebec, originating in the Arctic regions, the shadow will sweep down across Hudson Bay, and cross the St. Lawrence near Mackinac and Pierreville, some 50 miles east of Montreal.

Six Billion Estimate
of Canada's Wealth
Ottawa.—It is estimated by the Dominion Bureau of Statistics that the total capital invested in Canada is \$17,500,000,000, which 65 per cent is owned in the Dominion, 20 per cent in the United States, 13 per cent in Great Britain and 2 per cent in other countries. This figure includes the bonded indebtedness of Dominion, provincial and municipal governments and all other investments in domestic enterprises such as homes and farms. The total national wealth is estimated at \$60,000,000,000, of which 65 per cent is owned in the Dominion, 20 per cent in the United States, 13 per cent in Great Britain and 2 per cent in other countries account for less than 1 per cent.

Branch plants, it is explained, are considered to be any companies incorporated in Canada with a combined capital of \$1,756,229,000, of which 17 per cent is owned in the Dominion. The United States owns 1,073,000,000, Great Britain 14 per cent, and other countries account for less than 1 per cent.

Out of Control
James Truslow Adams in Harper's Weekly Magazine (New York): "The 'wave lengths' of our life have been steadily getting shorter, the rhythm faster, by a process over which we have no control. Scientific discovery, whether cause or effect of the latest acceleration in tempo, cannot be halted without a complete collapse of our civilization which is based upon it. We must now go on seeking new inventions, new sources of power or crash—a new era in mass drive. If we are to become adjusted, it is evident that in some way we have got to order our lives differently. We have got to bring back to the human, quickened tempo some sense of leisure and secure for ourselves a respite from the hailstorm of sensation and need for constant adjustment, some new habit patterns, that will enable us to control our ourselves nervously, to rise above the plane of sensation, and to concentrate on the things of the spirit. Only thus can we regain control of our individuality and our lives in the whirlwind fan which we shall otherwise dissolve."

Flowers that Bloom in Spring
Blossom in Fall in Indiana
Bedford, Ind.—The flowers that bloom in the spring seem to have their dates mixed in parts of Indiana. An apple tree is blooming here. In Marion housewife's it is bloom, while from Warsaw came a report that the cherry tree in the Rev. D. V. Williams' Back yard, which failed to have any blossoms last spring, is covered with them now.

Owl Laughs

Passerby (running into house after hearing scream)—"If you don't cut beating your child I'll call the police." Man's Voice (from within)—"This ain't no child. It's my wife." Passerby—"Oh, pardon me. I'm so sorry I intruded."

A little girl who had been left to watch the soup was presently heard to sing out: "Oh, mother, come quick, the soup is getting better than the rest."

Hostess—"Are you really a bank examiner, Mr. Tomkins?" Mr. Tomkins—"Yes, madam, I happen to be." Hostess—"Then I hope you will have time to examine my bank. No matter how much we shake it, nothing will come out of it."

The lack of money also is the root of a good bit of evil. Rival suitors for the hand of a modern girl often run neck and neck. There must be some difference in price; every now and then someone gets hold of the wrong box and the undertaker is called in. Properly may be just around the corner, but nobody has as yet succeeded in locating the particular corner. We have no quarrel with those who can't, but we have unlimited contempt for those who won't.

Bride—"You mustn't expect me to give my girlhood ways up all at once." Mother—"I don't expect you to. You are taking allowance from your father just as if nothing had happened."

Nurse—"Are you going to give my patient something to slow down his heart action?" Doctor—"Yes, an elderly nurse."

Mother—"Mabel's young man, has taken offense at something. Have you said anything to him?" Father—"Not a word. I haven't seen him since I mailed him last month's light bill."

Today, I believe in today. It is all I possess. Tomorrow is only as it makes the life of today fuller and freer. To-morrow depends upon the present—I must make good today, or I will have no tomorrow to possess money. The tribute of respect which cannot be measured in dollars is paid by our friends and neighbors to the man who honestly serves.

Frank—"What is puppy love?" Tom—"The beginning of a dog's life."

"But the only thing impressive about a staling ring is its setting capacity."

Fashion Note: Girls don't object to two-piece bathing suits as long as they don't have to wear both pieces at the same time.

Young Wife—"Oh, Tom, it's just about a year since our honeymoon, when we spent that glorious day on the sands. I wonder how well we'll spend our anniversary?" Tom (glomly)—"On the rocks."

One wealthy-lad farmer asked a football player if the team didn't get cold trotting around the field without any stockings on. People who carry dice bottles never should sit on stones. It must take a lot of thought to pick a party leader that all factions of the party can't be mad at.

Tom—"Well, I've decided to pin my faith to that girl." Dick—"Charitable resolve. A No word in kind needs something pinned to her more than she."

Protect Your Boy From coughs and colds. SCOTT'S EMULSION of Norwegian Cod Liver Oil Builds Resistance Easy to Take. Acid Stomach Completely Relieved by Frank's Vegetable Pills. Mr. Frank C. of Blackburn, writes: "I have suffered long from acid stomach and constipation, but since being cured by your wonderful Scott's Little Liver Pills I can eat anything. Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGETABLE and have a definite, lasting effect upon the liver. They cure Constipation, indigestion, Bilelessness, Headaches, Nervousness, All Druggists. 25c & 50c per box."

Every Month She's "Sick Again" Reduce the Acid. Tired Sick again... doubled with cramps. The bowels are nice... awfully patient. But it was so embarrassing... everybody in the office knew that the "sick" wasn't well! Then a girl friend told her what to do. Not just any pills, but Scott's Vegetable Compound. It's a wonderful medicine to use during these "trying" times. It keeps you up. Drives away those blues. Keeps you in good health. You try a box of the new tablets? Lydia E. Pinkham's VEGETABLE COMPOUND. SUE No. 44-31
