Some of the oldest have not yet even been explained, and some, perhaps, should not be called lightning at ali, though they are doubtless electrical.

Mr. Talman begins with an account of an exceptionally weird electrical display reported by Dr. Walter Knoche, for many years director of the weather service of Chile. We read:

"He was traveling by steamboat down the Rio Paraguay in South 1986 and some of the centuries, but it remains one of the contraction."

She Dances on"Bad Days"too

SHE never watches the calendar ... never has to "break" a date. She dances ... and enjoys it.

The modern girl has learned how to ease those "trying times". A few days before . . . you'll find her tak-ing Lydia E. Pinkham's Vegetable Gone are those headaches . . : those backaches . . . those morbid, stay-at-home blues. Won't you buy a box of the new
