### Fire Averted

On Sunday morning last about 8 o'clock, Mr. J. B. McKicken noticed a flash in Mr. H. A. Wride's chopping mill. He at once notified Mr. Wride, who arrived at the mill it was filled with smoke and upon investigation it was discovered the insulation had burned completely from the electric wiring and had by that time burned itself out. Mr. Wride made a careful survey and decided there was no immediate danger and returned to his home. About 10:30 he went back again to make sure everything was alright and discovered a tiny blaze beside the switch box which he was able to extinguish before it had made any headway. However had it not been for the fact he had not returned to the building at the time it would soon have been the scene of a conflagration. It was thought to have been caused by the electric storm earlier in the morning.
