HEALTH

There are those who criticize the education of the public with regard to the symptoms of disease.

This explanation is made to our readers to help them understand the purpose we have in mind when we continue to refer to the early symptoms of disease.

The cure of cancer is possible if the disease is recognized and treated at its beginning while it is still a local condition.

There is no cure for cancer unless the patient is recognized in themselves the symptoms which should arouse suspicion of the presence of cancer.
