countries. It is not reasonable that the taxpayers in general should pay as much as they have been payalong of the cost of such education for the relatively limited proportion of the population which takes advantage of our facilities for university education.

To Drop Bands was advantage of the same general type, are being built to let at a few shillings more. It is only fair that the people who a week by private enterprise with get the direct benefit should foot a the aid of loans from the Council.—
arger part of its cost than they Industrial Britain.

SOUND AND DISTANCE

SOUND AND DISTANCE

It was found during the war that the firing on the Western Front could be heard in this country only in sum mer, and at like distances in Germany, only in winter. This alternation, which was very consistent, was due to the change of the past weeks, since more than one farmer has told us that when approached these men absolutely refuse to go on a farm, some of them boasting of their ability to "get by" without working.

According to Government statistics, farm workers are in more demand than has been the case for which prevailed in the upper atmosphere the high temperatures which prevailed in the upper atmosphere which prevailed in the upper atmosphere at the firing on the Western Front could be heard in this country only in sum mer, and at like distances in Germany, only in winter. This alternation, which was very consistent, was due to the change of the prevailing wind in the upper atmosphere. At a height of 12 miles the wind was generally from the east in summer, and from the west in winter. This reversal was connected with the great range of the changes of temperature in the course of the year in the upper atmosphere in Arctic regions, but no satisfactory explanation had yet been given to the high temperatures which prevailed in the upper atmosphere in Arctic regions, but no satisfactory explanation had yet been given to the high temperatures which prevailed in the upper atmosphere in Arctic regions, but no satisfactory explanation had yet been given to the high temperatures which prevailed in the upper atmosphere in Arctic regions, but no satisfactory explanation had yet been given to the high temperatures.
