Young Men Find Economic Barriers To Early Marriage

Chicago—Marriage is increasing in the United States, but the money angle is giving it a new trend, Dr. William F. Ogburn, noted University of Chicago sociologist, says.

"There are more married young men than ever before," he said in a paper prepared for a scientific journal, and "there are more married older men than married older women."

The answer, he explained, was in the fact: "Young men find economic barriers to marriage which young women do not meet, since the man is the breadwinner."

"Widowers," he continued "probably supply many of the older men for marriage with younger women."

"That widowers remarry in greater numbers than widows is shown by the fact that the number of widowers at any one time is about one-half as great as the number of widows, a fact that can not be due to sex differences in death rates."

Cigars for women, made from Havana leaf of choicest and midwest variety, in several sizes and shapes, some little bigger than a cigarette, have been introduced here by importers.

THE REMARKABLE ROMANCE OF AN INDUSTRIAL DICTATOR

Velvet and Steel

By PEARL BELLAIRS

"KROPPS" This must have been Hannek's cabin on his other trips, she surmised; and the workmanlike grey poplin curtains, cushions and bedspread betrayed typically masculine taste.

He showed them round. The boys were silent. Maude's face was very pink, and Mr. Denby was silent. He praised everything, and there was something so servile in his smooth flattery that he was only one among them of whom Joan was ashamed, though she had come with the intention of being ashamed of nothing.

Mr. Denby had a dark blue suit which he had worn for sixteen years on Sundays. This he proposed to wear with a dicky front and collar, made in one piece. Joan would have let him do so, but Mrs. Denby was so upset about it that Joan took pity on her and herself bought him some plain soft collars to go with his ordinary working shirt, while Mrs. Denby made him a tie. Altogether, when they came to reckon up their expenses on the morning of their departure, they found that they were so much depleted by unusual expenditures that there would be nothing for Mrs. Denby to live on while they were away.

Punctually at nine a.m. next day the big crew drew up outside the Denbys' house, driven by Hannek's chauffeur. To the extreme excitement of the neighbours all the Denbys saw Mrs. Denby piled into it to go away.

Chapter XIII
By the time the car arrived in Southampton the excitement which merely passing through the country had awakened in Jimmy and Joan was enough to reconcile Joan to the business of going on this trip.

Eyes and mouths wide open, in the car, she stared at the Denbys' chauffeur. To the extreme excitement of the neighbours all the Denbys saw Mrs. Denby piled into it to go away.

Her family stood on the quay awkwardly, wondering what to do, and though Joan had not meant to be first aboard the ship or appear to lead them in any way as though she approved of the trip, she was compelled out of kindness to come forward and take the others into her charge. She saw that for their sakes she would have to drop her defensive attitude and take an active part in the proceedings.

"Come along—let's go aboard!" she said cheerfully. "You go first, Maude! Father, you take Ben!"

Taking Jimmy by the hand she led him up the gangway. By the time she had taken two steps up it Hannek appeared at the top, in flannel trousers and grey sweater.

Mr. Denby and the boys were sharing two beds and a couch in one stateroom, while Maude and Joan had the principal stateroom, which was divided into two bedrooms, two beds, and one which did not match the other Joan guessed to have been moved in for the occasion.

CHAPPED SKIN? NO!
Snow On The Prairie
What is lovelier than snow at night? Cherry trees stand in the orchard, heavy with phantom bloom. And pines are white snow weeping under the silver of the heavens. Flecks of it dust on a pale moon. Drift silently.

BUSINESS IN WEST BETTER

In Saskatchewan — Cash Registers Ring Again After Six Years.

Swift Current. — The depression doesn't live here any more. This hub of the southwest portion of Saskatchewan has been silent with confidence and the wheel of better business is slowly starting to turn again. Cash registers are ringing and people are asking the price of farms.

After six years of watching grasshoppers eat what drought failed to dry up or dust storms blow away, the district had a crop this fall. It was not a large crop but it has brought back confidence, business men assert. Cash registers are ringing and people are asking the price of farms.

Farmers have a little money after years of self-denial and they are coming to town. In rattling old family chariots long distances to purchase necessities and supplies for the long winter months.

W. W. Smith, member of the Saskatchewan Legislature, has received numerous letters about farm lands in the district from points in Alberta and Manitoba. Small houses in the city are at a premium, he said, and many are in the hands of speculators.

"You bear business is picking up!" Mr. Smith queried in response to a question. "But, have you ever been on a Saturday night? You have to elbow your way into the stores."

Many farmers who left the district in swirling dust storms a few years ago are starting to return. A cavalier of confidence has brought about the boom. Buying power has thrown the period of economic distress for a season.

SOMETHING OLD—SOMETHING NEW
Some recipes are so good that no change is given to changing them. Each year they taste better. Pickled Beets, Mustard Relish, Celery Pickle, Pear Jam all come from grandmother's cook-book: while Jam, Jam, Carrot Ketchup, and Apple in Cranberry Juice are quite new and unusual. The following recipes were prepared and tested by Mrs. Edith L. Elliot, Fruit Branch, Dominion Department of Agriculture.

Pickled Beets
Wash beets. Cut off tops leaving about one inch of stems to prevent bleeding. Cook until tender. Remove stems and cut beets in small white but if large, cut in slices. Pack in a crock or in jars and in each jar put one tablespoon of horseradish. Pour over them a pickle made by mixing one cup vinegar, 1/2 cup water, 1/2 cup sugar, one teaspoonful salt, boil together and pour over beets.

Mustard Relish
1 small cabbage
6 large onions
1 head celery
1 large cauliflower
12 green tomatoes
2 green peppers
2 red peppers
12 apples

Put all through the mincer; add 2 cups sugar, 2 quarts vinegar, 1 teaspoon turmeric, 1 lb. mustard, 1 teaspoon curry powder, 2 tablespoons salt, 2 tablespoons white pepper, 2 tablespoons celery seed. Mix well and cook ten minutes, bottle while hot.

Celery Pickle
6 heads celery, 2 onions, put through the mincer.
Add 1 cup brown sugar, 1/2 lb. mustard, 2 tablespoons salt, 1 tablespoon pepper, 2 quarts vinegar, 1/2 teaspoon turmeric, 1 lb. and simmer slowly 1 1/2 hours. Bottle while hot.

Pear Jam
10 cups coarsely chopped pears
4 cups sugar
1/2 cup chopped preserved ginger
1/2 cup chopped raisins
Boil all together until thick and clear.

Jewel Jam
4 cups chopped quinces
4 cups chopped apples
2 cups cranberries
2 cups water
Cook cranberries with water and wine and cores of apples. Drain and add to quinces and apples. Cook three hours in a low oven (52 degrees F.). Stir three times during the first hour to prevent rice from setting. Serve either hot or cold.

Baked Steaks
One and one-half pounds sirloin steak, 4 medium sliced carrots, 2 good sized onions, 2 small turnips, 1/2 cup butter, 1/2 cup flour.
Trim steak and dredge with flour. Put in a baking pan and cover with carrots and turnips which have been pared and cut in dice. Sprinkle with salt and pepper.
Pour a few table spoonfuls of water over vegetables. Bake in a moderate oven for 45 minutes. Peel onions and cut in halves. Dip in melted butter and arrange over vegetables and meat. Continue to bake 45 more minutes or until steak and vegetables are tender.

Apples in Cranberry Juice
Peel and quarter apples which will not break down in cooking (know apples by name). Pack in jars. To each pint jar allow 1 cup cranberries, 1 cup water and 1 cup sugar. Add water to cranberries and stir and cores of apples, cook slowly ten minutes, drain, add sugar and bring to a boil, pour over apples. Sterilize ten minutes in a hot water bath, or fifteen minutes in the oven at 275 degrees F.

Apple Sauce
A method for making apple sauce quickly and satisfactorily is as follows:
Wash the apples; cut in eighths, add sufficient water to prevent burning. Cook until tender, in covered saucepan, press through a strainer, sweeten to taste. This method retains full food value and gives minimum waste.

Apple Souffle
1 cup grated raw apple, or 1 pint milk
1 egg
3 tablespoons sugar
1 grated apple
Beat eggs, add sugar, then milk. Strain. Add grated apple and bake in one crust.

Apple Souffle
1 cup grated raw apple, or 1 pint milk
1 egg
3 tablespoons sugar
1 grated apple
Beat eggs, add sugar, then milk. Strain. Add grated apple and bake in one crust.

Apple Souffle
1 cup grated raw apple, or 1 pint milk
1 egg
3 tablespoons sugar
1 grated apple
Beat eggs, add sugar, then milk. Strain. Add grated apple and bake in one crust.

Apple Souffle
1 cup grated raw apple, or 1 pint milk
1 egg
3 tablespoons sugar
1 grated apple
Beat eggs, add sugar, then milk. Strain. Add grated apple and bake in one crust.

Inventor Proclaims 'Flying Suit' Success

Buff, Alta.—Development of a "flying suit" making flight possible without the aid of airplanes is claimed by John Kropec, 68-year-old inventor.

Kropec, a native of Yugoslavia, who quit his job in a hotel here to devote his whole time to the flying suit, said he had completed a model which, in tests, has proven its efficiency. It has yet to be tried out by man.

He has completed an aluminum suit with metal wings and a series of springs, operated on the principle of the gramophone. Kropec calls his invention the "metal man." The suit is designed for attaching to the shoulders and around the waist. The wings are attached to a tube containing the power springs.

Once started, the machine may be pedaled by treading a device for that purpose. A ground level start, however, is not possible. The wearer would have to jump from a height to get it into the air.

A sticky coat inflated with hydrogen balloons fastened to the lining, is another feature of the flying suit.

Manners are the happy ways of doing things; each one a stroke of genius or of love, now repeated and hardened into custom, they form the last rich varnish, with which the routine of life is washed, and its details adorned. If they are superficial, so are the deep-drops which give such a depth to the morning meadows.—Emerson.
