MOTOR INSURANCE

There are many motorists on the highways today who are by no means in a financial position to provide compensation for damages they may cause. However, the way is open to them through insurance, to protect those who may be the victims of their carelessness, or accidental mishaps.—Chatham News.

CASH PRICE OF SPEED

A car capable of getting 35 miles out of a gallon of gasoline, when driven 20 miles an hour, for example, will get only 15.4 to the gallon, according to the bureau figures, when pushed up to 40 miles an hour. At 50 miles an hour the same car will get 14.6 miles to the gallon, at 60 miles an hour it will get 12.6 miles, at 70 miles an hour it will get 11.6 miles and at 80 miles an hour it will get 8.8 miles per gallon. In addition to this, nearly seven times as much oil is used up at 50 miles an hour as at 20 miles an hour. These are facts well deserving of publicity.—Hamilton Express.

TAKING NO CHANCES

The buildings upon which \$200,000 was spent for a Boy Scout jamboree at the Ontario State Fair, have been abandoned since June 1, and the danger of infection was thought to be too great. The present occupant of the White House was himself the victim of such an attack when he was 39 years of age and prior to that he had been a great all round athlete.—Brantford Express.

FARMERS OF PEEL COUNTY ARE BUYING

The Conservators have good news about the farmers of Peel County. It states that "implement sales in Brampton this year have exceeded sales for any of the last five years. Even the boom years following the Great War and those preceding the depression did not produce the volume of business that has been handled so far this season. More than 200 new binders have been sold and more than two score rebuilt machines. One dealer sold two new threshing machines and a large number of small cultivators.

REAL NEWS

It is to be expected that the "big news story of the year" our vote goes for the report that one thousand jobs are to be opened up for men in Hamilton in the immediate future.—Hamilton Herald.

THE EMPIRE

It is to be expected that the "big news story of the year" our vote goes for the report that one thousand jobs are to be opened up for men in Hamilton in the immediate future.—Hamilton Herald.

KILLING THE OLD AND THE YOUNG

But as the situation on the roads continues to be, we do not think there is any ground for the gloomy view that the safety campaign is more or less played out. It takes a long time to build up the habit of self-protection and the dangers of the road. The fact that fatalities and injuries are below those of last year is a pretty convincing proof that safety habits are gaining ground, and there is no good reason whatever why the improvement has ceased. Indeed, the Ministry of Transport's analysis of accidents by age groups indicates once again where education and propaganda should be directed with special energy. Only one-sixth of the killed were aged 15-24. One-third were over 55. One-half—a triangle figure—were under 15. It is clearly the young and the old who are in the greatest danger, and upon whom should be concentrated the warnings and instructions of the campaign.—London Daily Herald.

AS IN CANADA

When criticism is so easy and when there are so many critics it is not surprising that much commotion is heard of the policy and practice of the Australian Broadcasting Commission. Six hundred thousand people in the Commonwealth each pay £1 a year for listeners' licenses, and those who listen to broadcasts number millions. But because criticism is so frequent and inevitable it ought not to be disregarded.—London Daily Herald.

CONQUER SAND MENACE

Behind the Church at St. Sulpice, near the monastery at Oka, in Quebec, were hills of drifting sand. Recently the Village of Oka was in danger of becoming buried. Then the monks of St. Sulpice devised a plan. They set out thousands of small white pine trees until the sand hills were completely covered by them. In four years, the drifting of the sands were noticeably retarded. Ten years after planting these trees, the sands were almost completely bound down by the roots of the trees and by the carpet of fallen pine-needles. To-day, of all these drifting areas, there remains only one small sand bank, and it is left open due to the fact that people take from it loads of sand to make cement.—From Forest and Outdoors.

Anchor Catches Anchor!

When the Canadian Consular lifted her anchor out of the waters of the Caribbean down Jamaica recently, she "landed" a huge anchor with links more than two feet long. This anchor, how it got where it was, and what it belonged to, is a mystery. The Jamaican Government will place it in a museum.

SASK. WHEAT CROP IS FAIR

60 Per Cent. Is Cut—Yields Vary in Different Parts Of Province

Regina—Despite frost and rain little material change has taken place in Saskatchewan's general crop situation during the past two weeks, according to reports received by the statistics branch of the provincial department of agriculture.

FIREARMS IN THE HOME

In Pittsburgh the city mayor has found three men in a home, were found dead from bullet wounds. A girl, 11 years old, was in the kitchen; her brother, 13, was in his own room. Police said it was a case of accidental shooting, a "bullet of sorrow." In Calgary last week a boy, shooting at birds, accidentally killed a 15-year-old girl. One wonder how many more lives must be needlessly sacrificed before the people decide that firearms are not suitable furnishings in a home.—Edmonton Journal.

ALGOMA SERVICE

Have you met the alert filing station attendant who as a final touch, said to the driver: "Now, may I clean your spectacles?"—Sault Ste. Marie.

Contracts in Ontario For Dominion Works Announced By Ottawa

Ottawa—Contracts aggregating slightly more than \$400,000 for public works throughout Canada were awarded by the Government, according to a list issued recently by the Department of Public Works. The largest of the contracts is for an extension to the King's Wharf at Quebec, which was awarded to a firm in Montreal.

Outstanding Woman Leader Is Dead

London—Dame Elizabeth Mary Cadbury, outstanding leader in educational, peace, housing and social efforts for many years, died here recently.

It is to be expected that the "big news story of the year" our vote goes for the report that one thousand jobs are to be opened up for men in Hamilton in the immediate future.—Hamilton Herald.

H. G. Wells To Write Exclusively For Films

Word from London brings the news that H. G. Wells plans to abandon his regular writing and devote himself entirely to creating and adapting stories for the screen. The noted author's name call for the publication of each screen play in a magazine at the time of its release as a motion picture, giving emphasis to the screen play as a new literary form. He stated that he will associate himself with Alexander Korda for at least the next two years.

Cement Mixing

A sack of cement is equal to one cubic foot. An easy way to decide proper measure for aggregates is to use a half or small box. First see how many times one sack of cement will fill your measure—then use quantities of aggregate on that basis of measurement. The right amount of aggregate is determined by trial. Try 1 sack of cement, 2 cu. ft. of sand and 2 cu. ft. of pebbles or broken stone, with the amount of water as specified above. If this mix is too stiff use less sand and pebbles in other batches. If it is too wet add more sand and pebbles. Do not vary the quantities of mixing water from the amounts given. The final mixture should be placed in a bucket and tested for strength by dropping it from a height of 4 feet. Sloppy mixes should be avoided.

SCOUTING Here There Everywhere

The summer's usual list of war activities has included the usual list of rescue by Boy Scouts, and, unfortunately, an attempted rescue which cost the life of one young Scout. This was Patrol Leader Ernest Callow, 17, of Wellington, Ont., who gave his life in an unsuccessful attempt to rescue a full grown man. The man clutched him and the boy was unable to free himself.
