CHAPTER II.

Jake lowered his hands, bit off a huge chew of tobacco, and climbed down into the road. He bent over the fallen man and felt his breast and then his head, and swore admiringly.

"Hurt much, Pete?" he asked of "Hurt much, Pete?" he asked of the other guard. "This here is the neatest crease yuh ever saw. Sonny is a shootin' son of a gun."

came to Moleville on account of this particular outlaw. He has practically ruined the Aztec mine. And I happen to be the Laurier, the snake that, owns the laurier, the snake that, owns the complete of the particular outlaw. He has practically ruined the Aztec mine. IV. THE CONSEQUENCES, Gen. 3: 7, 8.

IV. THE CONSEQUENCES, Gen. 3: 7, 5.
These early sinners had hoped to
gain knowledge of the highest, but
the knowledge they won was merely
that they were naked: Sin produces
shame. For they had now to cover
themselves, and they chose fig-leaves.
Sin also separates man from his God.
In picturesque simplicity the story
tells how God walked in his garden
in the cool breezes of the morning and

in the cool breezes of the morning and how Adam and Eve could not look into

Latest Advances of Science Electric Plows Tested in Europe

Pills of Fertilizer Germans Speed Cooking—New Radium Field To Be Developed in Canada

Some 200 electric plows are success- to find gold worth about \$22 an ounce fully operating in Europe. They are and discovered radium valued at well expensive but efficient. Costing as over \$1,800,000 at present prices for expensive but efficient. Costing as they do from \$15,000 to \$20,000 each, they are beyond the reach of the average farmer. In France they are rented. Community utilization seems to be the practice so that the power company by which a plow may be owned makes the most of its investment and the possibility of selling electric energy.

sibility of selling electric energy.

An electric plow travels along at the company has engaged the services of a rate of about three miles an hour and Belgian expert, Mr. Pochon, and on his covers as many as thirty acres a day. The cost of electric current at 2 cents a kilowatt-hoar amounts to only 60 cents an acre. A contractor who owns a plow and hires himself out to farm-ment for readium extraction.

ers charges from \$3.50 to \$6 a day.
Allowing the usual rate for interest on the investment depreciation and operthe investment depreciation and operating costs, he ought to make money.

There is nothing resembling the usual gasoline tractor. Two portable drums are set up at opposite ends of the field along a straight line. A steel rope from one drum is fastened to the rear of the plow and paid out as the plow travels along: a similar rope
